**Feedback Systems** Karl Johan Åström,Richard Murray,2021-02-02 The essential introduction to the principles and applications of feedback systems—now fully revised and expanded This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of Feedback Systems is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

*Digital Economies at Global Margins* Mark Graham,2019-02-12 Investigations of what increasing digital connectivity and the digitalization of the economy mean for people and places at the world's economic margins. Within the last decade, more than one billion people became new Internet users. Once, digital connectivity was confined to economically prosperous parts of the world; now Internet users make up a majority of the world's population. In this book, contributors from a range of

disciplines and locations investigate the impact of increased digital connectivity on people and places at the world's economic margins. Does the advent of a digitalized economy mean that those in economic peripheries can transcend spatial, organizational, social, and political constraints—or do digital tools and techniques tend to reinforce existing inequalities? The contributors present a diverse set of case studies, reporting on digitalization in countries ranging from Chile to Kenya to the Philippines, and develop a broad range of theoretical positions. They consider, among other things, data-driven disintermediation, women's economic empowerment and gendered power relations, digital humanitarianism and philanthropic capitalism, the spread of innovation hubs, and two cases of the reversal of core and periphery in digital innovation. Contributors Niels Beerepoot, Ryan Burns, Jenna Burrell, Julie Yujie Chen, Peter Dannenberg, Uwe Deichmann, Jonathan Donner, Christopher Foster, Mark Graham, Nicolas Friederici, Hernan Galperin, Catrihel Greppi, Anita Gurumurthy, Isis Hjorth, Lilly Irani, Molly Jackman, Calestous Juma, Dorothea Kleine, Madlen Krone, Vili Lehdonvirta, Chris Locke, Silvia Masiero, Hannah McCarrick, Deepak K. **Why Forests? Why Now?** Frances Seymour, Jonah Busch, 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

**Biofuels, Land Grabbing and Food Security in Africa** Prosper B. Matondi, Kjell Havnevik, Atakilte Beyene, 2011-06-09 The issue of biofuels has already been much debated, but the focus to date has largely been on Latin America and deforestation - this highly original work breaks fresh ground in looking at the African perspective. Most African governments see biofuels as having the potential to increase agricultural productivity and export incomes and thus strengthen their national economies, improving energy balances and rural employment. At the same time climate change may be addressed through reduction of green house gas emissions. There are, however, a number of uncertainties mounting that challenge this scenario. Using cutting-edge empirical case studies, this knowledge gap is addressed in a variety of chapters examining the effects of large-scale biofuel production on African agriculture. In particular, 'land grabbing' and food security issues are scrutinised, both of which have become vital topics in regard to the environmental and developmental governance of African countries. A revealing book for anyone wishing to understand the startling impact of biofuels and land grabbing on Africa.

In the Name of the Otherworld Hermione Lee,2021-06-21 Regarded as a witch and alienated by the majority of her peers, fourteen-year-old orphan Alexandria Richardson wants to be anybody but herself. However, this all changes one day, when the mysterious fountain in her school transports her and her three classmates to a world of magic— the Otherworld. The four of them are brought to the palace of the Otherworld on the rulers' orders, and the shocking truth of Alexandria's identity and parentage is revealed. As Alexandria then participates in a miraculous adventure with her companions, she explores the depths of courage, kindness, and friendship. But will she make it safely back to the Otherworld? Or will she eventually yield to her biggest enemy, someone no other than herself? It's not just an adventure. It's a journey of growth and redemption.

Shock Waves Stephane Hallegatte,Mook Bangalore,Laura Bonzanigo,Marianne Fay,Tamaro Kane,Ulf Narloch,Julie Rozenberg,David Treguer,Adrien Vogt-Schilb,2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win†? situation

so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

*Land Rights of the Indigenous Peoples of the Chittagong Hill Tracts, Bangladesh* Rajkumari Chandra Kalindi Roy, 2000  
Little is known about the Chittagong Hill Tracts of Bangladesh (CHT), an area of approximately 5,089 square miles in southeastern Bangladesh. It is inhabited by indigenous peoples, including the Bawm, Sak, Chakma, Khumi Khyang, Marma, Mru, Lushai, Uchay (also called Mrung, Brong, Hill Tripura), Pankho, Tanchangya and Tripura (Tipra), numbering over half a million. Originally inhabited exclusively by indigenous peoples, the Hill Tracts has been impacted by national projects and programs with dire consequences. This book describes the struggle of the indigenous peoples of the Chittagong Hill Tracts region to regain control over their ancestral land and resource rights. From sovereign nations to the limited autonomy of today, the report details the legal basis of the land rights of the indigenous peoples and the different tools employed by successive administrations to exploit their resources and divest them of their ancestral lands and territories. The book argues that development programs need to be implemented in a culturally appropriate manner to be truly sustainable, and with the consent and participation of the peoples concerned. Otherwise, they only serve to push an already vulnerable people into greater impoverishment and hardship. The devastation wrought by large-scale dams and forestry policies cloaked as development programs is succinctly described in this report, as is the population transfer and militarization. The interaction of all these factors in the process of assimilation and integration is the background for this book, analyzed within the perspective of indigenous and national law, and complemented by international legal approaches. The book concludes with an update on the developments since the signing of the Peace Accord between the Government of Bangladesh and the Jana Sanghati Samiti (JSS) on December 2, 1997.

**How Picturebooks Work** Maria Nikolajeva, Carole Scott, 2013-02-01  
How Picturebooks Work is an innovative and engaging look at the interplay between text and image in picturebooks. The authors explore picturebooks as a specific medium or genre in literature and culture, one that prepares children for other media of communication, and they argue that picturebooks may be the most influential media of all in the socialization and representation of children. Spanning an international range of children's books, this book examines such favorites as Curious George and Frog and Toad Are Friends, along with the works of authors and illustrators including Maurice Sendak and Tove Jansson, among others. With 116 illustrations, How Picturebooks Work offers the student of children's literature a new methodology, new theories, and a new

set of critical tools for examining the picturebook form.

*The Sustainable Chef* Stefan Gössling, C. Michael Hall, 2021-12-09 This book provides the first systematic and accessible text for students of hospitality and the culinary arts that directly addresses how more sustainable restaurants and commercial food services can be achieved. Food systems receive growing attention because they link various sustainability dimensions. Restaurants are at the heart of these developments, and their decisions to purchase regional foods, or to prepare menus that are healthier and less environmentally problematic, have great influence on food production processes. This book is systematically designed around understanding the inputs and outputs of the commercial kitchen as well as what happens in the restaurant from the perspective of operators, staff and the consumer. The book considers different management approaches and further looks at the role of restaurants, chefs and staff in the wider community and the positive contributions that commercial kitchens can make to promoting sustainable food ways. Case studies from all over the world illustrate the tools and techniques helping to meet environmental and economic bottom lines. This will be essential reading for all students of hospitality and the culinary arts.
