The Handbook of Language Assessment Across Modalities Tobias Haug,Wolfgang Mann,Ute Knoch,2021-12-21 The identification of language problems and subsequent evaluation of interventions depend in part on the availability of useful and psychometrically robust assessments to determine the nature and severity of their problems and monitor progress. The purpose of these assessments may be to measure a child's language proficiency, that is, how they perform relative to other children and whether they have the language level expected and needed for schooling, or they may have a specifically clinical purpose, to identify the occurrence and nature of a disorder. The purpose of assessment is key to the aspects of language targeted in an assessment and the methods used to target these. In the case of spoken English, there are many language assessments ranging from broad language tests to more narrowly focused measures, reflecting the complexity of the language system and its use--

Gravel Roads Ken Skorseth,2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been more of an art than a science and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Material Feminisms: New Directions for Education Carol Taylor, Gabrielle Ivinson, 2018-02-02 Material Feminisms: New Directions for Education provides a range of powerful theoretical and innovative methodological examples to illuminate how new material feminism can be put to work in education to open up new avenues of research design and practice. It poses challenging questions about the nature of knowledge production, the role of the researcher, and the critical endeavour arising from inter- and post-disciplinarity. Working with diffractive methodologies and new materialist ecological epistemologies, the book offers resources for hope which widen the scope for how educational problems are interrogated, and provides a political counter-movement to neo-positivist, outcomes-based approaches within education. Inspired by writers such as Barad, Bennett, and Deleuze and Guattari, the book makes a radical break with cognitive, dualist, and universal conceptions of human subjectivity and intelligence in education. By taking its starting point as the co-constitutiveness of discourse, materiality, corporeality, and place, the book foregrounds educational practices as material enactments of multiple, non-linear, entangled, affective, and relational forces. It offers new insights into how gender, class, and ethnicity are constituted in, and by, material assemblages that are often submerged or 'unseen'. This book is an essential starting place for those intrigued by what new theoretical accounts of materiality, posthumanism, and affect can offer educational research. Diffractive methodologies challenge readers to take a fuller range of actors into account than in 'objective' humanist methodologies, and in so doing to pay closer attention to what data is. It invites researchers to engage with long-standing feminist concerns about power and knowledge production in research processes. This book was originally published as a special issue of Gender and Education.

Unspeakable Susan Burch, Hannah Joyner, 2007-11-19 Junius Wilson (1908-2001) spent seventy-six years at a state mental hospital in Goldsboro, North Carolina, including six in the criminal ward. He had never been declared insane by a medical professional or found guilty of any criminal charge. But he was deaf and black in the Jim Crow South. *Unspeakable* is the story of his life. Using legal records, institutional files, and extensive oral history interviews--some conducted in sign language--Susan Burch and Hannah Joyner piece together the story of a deaf man accused in 1925 of attempted rape, found insane at a lunacy hearing, committed to the criminal ward of the State Hospital for the Colored Insane, castrated, forced to labor for the institution, and held at the hospital for more than seven decades. Junius Wilson's life was shaped by some of the

major developments of twentieth-century America: Jim Crow segregation, the civil rights movement, deinstitutionalization, the rise of professional social work, and the emergence of the deaf and disability rights movements. In addition to offering a bottom-up history of life in a segregated mental institution, Burch and Joyner's work also enriches the traditional interpretation of Jim Crow by highlighting the complicated intersections of race and disability as well as of community and language. This moving study expands the boundaries of what biography can and should be. There is much to learn and remember about Junius Wilson--and the countless others who have lived unspeakable histories.

Reconceptualizing Schizophrenia Sarah Kamens, 2023-04-14 This volume presents a novel, international research study that reconceptualizes schizophrenia through an investigation of ways in which the first-hand experiences of those with a diagnosis differ from conventional diagnostic definitions. Offering insight into the history of psychiatric taxonomies in general and the invention of the schizophrenia diagnosis in particular, *Reconceptualizing Schizophrenia* maps the emergence of uncertainties about the empirical and conceptual status of contemporary diagnostic systems. Particular focus is given to the heterogeneity problem, or the problem of wide empirical variation within and between disorder categories. At the heart of this book are interviews with mental health service users with psychotic-disorder diagnoses in New York City and Jerusalem. Through a detailed portrait of their existential and socio-institutional worlds, the book unveils a way of being-in-the-world characterized by the experience of feeling profoundly vulnerable and unsafe in an inhospitable world as well as foreclosed from belonging to one or more human communities. As this psychological portrait of urhomelessness unfolds, the reader becomes slowly aware of the relationships between psychotic experiences – often thought to be bizarre or ‘un-understandable’ – and the timeless ways in which all humans seek to dwell in the world. Making an important contribution to the phenomenological-existential literature on psychosis, and demonstrating interdisciplinary and transcultural approaches to understanding anomalous experiences, this volume will be of great interest to researchers and scholars of transcultural psychiatry, clinical psychology, and critical theory.

Peace Came in the Form of a Woman Juliana Barr, 2009-11-30 Revising the standard narrative of European-Indian relations in America, Juliana Barr reconstructs a world in which Indians were the dominant power and Europeans were the

ones forced to accommodate, resist, and persevere. She demonstrates that between the 1690s and 1780s, Indian peoples including Caddos, Apaches, Payayas, Karankawas, Wichitas, and Comanches formed relationships with Spaniards in Texas that refuted European claims of imperial control. Barr argues that Indians not only retained control over their territories but also imposed control over Spaniards. Instead of being defined in racial terms, as was often the case with European constructions of power, diplomatic relations between the Indians and Spaniards in the region were dictated by Indian expressions of power, grounded in gendered terms of kinship. By examining six realms of encounter--first contact, settlement and intermarriage, mission life, warfare, diplomacy, and captivity--Barr shows that native categories of gender provided the political structure of Indian-Spanish relations by defining people's identity, status, and obligations vis-a-vis others. Because native systems of kin-based social and political order predominated, argues Barr, Indian concepts of gender cut across European perceptions of racial difference.

Semiotics as a Tool for Learning Mathematics Adalira Sáenz-Ludlow, Gert Kadunz, 2015-12-17 *Semiotics as a Tool for Learning Mathematics* is a collection of ten theoretical and empirical chapters, from researchers all over the world, who are interested in semiotic notions and their practical uses in mathematics classrooms. Collectively, they present a semiotic contribution to enhance pedagogical aspects both for the teaching of school mathematics and for the preparation of pre-service teachers. This enhancement involves the use of diagrams to visualize implicit or explicit mathematical relations and the use of mathematical discourse to facilitate the emergence of inferential reasoning in the process of argumentation. It will also facilitate the construction of proofs and solutions of mathematical problems as well as the progressive construction of mathematical conceptions that, eventually, will approximate the concept(s) encoded in mathematical symbols. These symbols hinge not only of mental operations but also on indexical and iconic aspects; aspects which often are not taken into account when working on the meaning of mathematical symbols. For such an enhancement to happen, it is necessary to transform basic notions of semiotic theories to make them usable for mathematics education. In addition, it is also necessary to back theoretical claims with empirical data. This anthology attempts to deal with such a conjunction. Overall, this book can be used as a theoretical basis for further semiotic considerations as well as for the design of different ways of teaching mathematical concepts.

Unfinished João Biehl, Peter Locke, 2017-11-16 This original, field-changing collection explores the plasticity and unfinishedness of human subjects and lifeworlds, advancing the conceptual terrain of an anthropology of becoming. People's becomings trouble and exceed ways of knowing and acting, producing new possibilities for research, methodology, and writing. The contributors creatively bridge ethnography and critical theory in a range of worlds on the edge, from war and its aftermath, economic transformation, racial inequality, and gun violence to religiosity, therapeutic markets, animal rights activism, and abrupt environmental change. Defying totalizing analytical schemes, these visionary essays articulate a human

science of the uncertain and unknown and restore a sense of movement and possibility to ethics and political practice. Unfinished invites readers to consider the array of affects, ideas, forces, and objects that shape contemporary modes of existence and future horizons, opening new channels for critical thought and creative expression. Contributors. Lucas Bessire, João Biehl, Naisargi N. Dave, Elizabeth A. Davis, Michael M. J. Fischer, Angela Garcia, Peter Locke, Adriana Petryna, Bridget Purcell, Laurence Ralph, Lilia M. Schwarcz

Re/Orienting Writing Studies William P. Banks, Matthew B. Cox, Caroline Dadas, 2019-04-15 Re/Orienting Writing Studies

is an exploration of the intersections among queer theory, rhetoric, and research methods in writing studies. Focusing careful theoretical attention on common research practices, this collection demonstrates how queer rhetorics of writing/composing, textual analysis, history, assessment, and embodiment/identity significantly alter both methods and methodologies in writing studies. The chapters represent a diverse set of research locations and experiences from which to articulate a new set of innovative research practices. While the humanities have engaged queer theory extensively, research methods have often been hermeneutic or interpretive. At the same time, social science approaches in composition research have foregrounded inquiry on human participants but have often struggled to understand where lesbian, gay, bisexual, transgender, and queer people fit into empirical research projects. *Re/Orienting Writing Studies* works at the intersections of humanities and social science methodologies to offer new insight into using queer methods for data collection and queer practices for framing research.
