Procedural Environmental Rights Jerzy Jendrośka, Magdalena Bar, 2017 'Procedural Environmental Rights: Principle X in Theory and Practice' provides an overview of various aspects of the current status, development and practice of rights of access to information, public participation in decision-making and access to justice in environmental matters following their codification as non-binding principles in Principle X of the Rio Declaration.

How is Your MPA Doing? Robert S. Pomeroy, John E. Parks, Lani M. Watson, 2004 Guidebook which aims to improve MPA management by providing a framework that links the goals and objectives of MPAs with indicators that measure management effectiveness. The framework and indicators were field-tested in 18 sites around the world, and results of these pilots were incorporated into the guidebook. Published as a result of a 4-year partnership of IUCN's World Commission on Protected Areas-Marine, World Wildlife Fund, and the NOAA National Ocean Service International Program Office.

Mainstreaming Biodiversity for Sustainable Development OECD, 2018-07-10 Drawing on experiences and insights from 16 megadiverse countries, this report examines how biodiversity is being mainstreamed in four key areas.

The Aarhus Convention Stephen Stec, Susan Casey-Lefkowitz, Jerzy Jendrośka, United Nations. Economic Commission for Europe, Regional Environmental Center for Central and Eastern Europe, 2000 The Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters (Aarhus Convention) was adopted at the Fourth Ministerial Conference Environment for Europe in Aarhus, Denmark, on 25 June 1998, Thirty-nine countries and the European Community have since signed it. The Aarhus is a new kind of environmental agreement. It links environmental rights with human rights. The Convention focuses on the interactions between the public and public authorities in a democratic context and it is creating a new process for public participation in the negotiation and implementation of international agreements. This guide provides both a general overview and a detailed article-by-article analysis of the Convention. The guide also analyses each provision of the Convention to clarify both the fixed obligations, the obligations that allow for some flexibility, and the options for implementation in each case.

Olympic Cities Gavin Poynter, Iain MacRury, 2009 Drawing upon historical, cultural, economic and socio-demographic perspectives, this book examines the role of London's hosting the 2012 Olympic and Paralympic Games as a means to

promote urban regeneration and social renewal in East London and the Thames

Environmental Justice in India Gitanjali Nain Gill,2016-11-10 Modern environmental regulation and its complex intersection with international law has led many jurisdictions to develop environmental courts or tribunals. Strikingly, the list of jurisdictions that have chosen to do this include numerous developing countries, including Bangladesh, Kenya and Malawi. Indeed, it seems that developing nations have taken the task of capacity-building in environmental law more seriously than many developed nations. *Environmental Justice in India* explores the genesis, operation and effectiveness of the Indian National Green Tribunal (NGT). The book has four key objectives. First, to examine the importance of access to justice in environmental matters promoting sustainability and good governance Second, to provide an analytical and critical account of the judicial structures that offer access to environmental justice in India. Third, to analyse the establishment, working practice and effectiveness of the NGT in advancing a distinctively Indian green jurisprudence. Finally, to present and review the success and external challenges faced and overcome by the NGT resulting in growing usage and public respect for the NGT's commitment to environmental protection and the welfare of the most affected people. Providing an informative analysis of a growing judicial development in India, this book will be of great interest to students and scholars of environmental justice, environmental law, development studies and sustainable development.

The Nature Principle Richard Louv,2012-04-17 For many of us, thinking about the future conjures up images of Cormac McCarthy's *The Road*: a post-apocalyptic dystopia stripped of nature. Richard Louv, author of the landmark bestseller *Last Child in the Woods*, urges us to change our vision of the future, suggesting that if we reconceive environmentalism and sustainability, they will evolve into a larger movement that will touch every part of society. This New Nature Movement taps into the restorative powers of the natural world to boost mental acuity and creativity; promote health and wellness; build smarter and more sustainable businesses, communities, and economies; and ultimately strengthen human bonds. Supported by groundbreaking research, anecdotal evidence, and compelling personal stories, Louv offers renewed optimism while challenging us to rethink the way we live.

The Precautionary Principle and International Law:The Challenge of Implementation David Freestone, Ellen Hey,1996-01-01 Papers presented at the meetings facilitated by the Sanders Institute at the Faculty of Law of the Erasmus University Rotterdam and the Law School of the University of Hull.

The Ordeal of Elizabeth Marsh Linda Colley,2009-01-21 In this remarkable reconstruction of an eighteenth-century woman's extraordinary and turbulent life, historian Linda Colley not only tells the story of Elizabeth Marsh, one of the most distinctive travelers of her time, but also opens a window onto a radically transforming world.Marsh was conceived in

Jamaica, lived in London, Gibraltar, and Menorca, visited the Cape of Africa and Rio de Janeiro, explored eastern and southern India, and was held captive at the court of the sultan of Morocco. She was involved in land speculation in Florida and in international smuggling, and was caught up in three different slave systems. She was also a part of far larger histories. Marsh's lifetime saw new connections being forged across nations, continents, and oceans by war, empire, trade, navies, slavery, and print, and these developments shaped and distorted her own progress and the lives of those close to her. Colley brilliantly weaves together the personal and the epic in this compelling story of a woman in world history.

International Law and the Protection of “Climate Refugees” Giovanni Sciacaluga, 2020-08-05 This book studies the topic of forced climate migrants (commonly referred to as “climate refugees”) through the lens of international law and identifies the reasons why these migrants should be granted international protection. Through an analysis focused on climate change and human rights international law, it points out the legal principles and rules upon which an international obligation to protect persons forced to migrate due to climate change is emerging. Sciacaluga advocates for a state obligation to protect climate migrants when their origin countries have become extremely environmentally fragile due to climate change—to the point of becoming unable to guarantee the exercise of inalienable human rights in their territories. Turning to the future, this book then investigates the current elements on which a “forced climate migrants law” could be built, ultimately arguing for the duty to provide some form of assistance to forced climate migrants in a third state within the international legal system.

Tourism Congestion Management at Natural and Cultural Sites World Tourism Organization, 2004 This guidebook contains practical guidance for effective congestion management practices at natural and cultural tourist sites, drawing on a number of detailed case studies. Congestion management practices are explained at different levels, linking actions between demand, destination and site management. Sections cover: types of tourism congestion and consequences; key stakeholders involved; and sustainable tourism development issues.

Managing Sport Mega-events Stephen Frawley, 2017 Managing Sport Mega-Events identifies and evaluates the current issues and complexities faced by those charged with the responsibility of managing these mega-sport events. The book draws on leading international sport management scholars, each whom have expertise in the organisation of mega-sport events. It makes valuable contribution to the existing literature.

Historical Pollution Francesco Centonze, Stefano Manacorda, 2017-08-05 This volume examines legal matters regarding the prevention and fighting of historical pollution caused by industrial emissions. Historical pollution refers to the long-term or delayed onset effects of environmental crimes such as groundwater or soil pollution. Historical Pollution presents and

compares national legal approaches, including the most interesting and effective mechanisms for managing environmental problems in relation with historical pollution. It features interdisciplinary and international comparisons of traditional and alternative justice mechanisms. This book will be of interest to researchers in criminology and criminal justice and related areas, such as politics, law, and economics, those in the public and private sectors dealing with environmental protection, including international institutions, corporations, specialized national agencies, those involved in the criminal justice system, and policymakers.

Il territorio Adriatico Giuseppe de Vergottini, Guglielmo Cevolin, Valeria Piergigli, Ivan Russo, 2019-08-01 La sezione dedicata specificamente ai profili economico-aziendali mette in risalto un'evidenza, ossia la prossimità al mare Adriatico, che è stata da sempre per l'Italia elemento determinante nel suo sviluppo economico e che, a tutt'oggi, non cessa di rappresentare una irrinunciabile opportunità di crescita. Siffatto elemento di perdurante dominanza non può essere scisso dai cardinali, recenti, processi di stabilizzazione economico-politica - si fa riferimento, evidentemente, alla creazione del libero scambio regionale, all'ampliamento dell'Unione Europea, alla progressiva caduta dei veti doganali - che, coinvolgendo diversi livelli di governo del territorio - hanno favorito ed accelerato le più diverse dinamiche di collaborazione imprenditoriale e cooperazione economico-finanziaria, a loro volta rafforzate dalla prospettiva (europea) di progressiva semplificazione della gestione dei flussi di merci e persone. Nonostante la peculiare attenzione dedicata agli aspetti storici, giuridici ed urbanistico-ambientali, la presente opera non poteva mancare di occuparsi dei progressi delle più aggiornate tecnologie, con particolare riferimento alle ricadute sul cruciale - in termini sia occupazionali che economici - settore turistico. La rete telematica, infatti, ha rivoluzionato negli ultimi decenni la comunicazione (contribuendo peraltro a generare un nuovo linguaggio internazionale sul piano della comunicazione economico-finanziaria di impresa) e, conseguentemente, il modo di collocare i prodotti per le imprese, facendo sì che mutasse nel contempo il processo di raccolta delle informazioni, di valutazione delle diverse alternative e, per logica conseguenza, l'effettiva possibilità di scelta di prodotti e servizi nell'interesse del consumatore, particolarmente nell'ambito dei servizi legati all'ospitalità e al benessere. Un fattore altrettanto strategico per lo sviluppo dell'area è legato agli investimenti (nazionali ed internazionali) nel compartimento delle cosiddette piattaforme logistiche: ossia le grandi infrastrutture fisiche e tecniche che, oltre a consentire lo smistamento merci (prima di giungere alla destinazione finale attraverso l'intermodalità), offrono servizi di logistica avanzata ad alto valore aggiunto (si tratta in linea di prima approssimazione di scali, porti fluviali, interporti, aeroporti, piattaforme aeroportuali e altri approdi accomunati dalla medesima natura manifatturiera e movimentante delle merci, in grado di generare servizi ad alto valore aggiunto per le imprese industriali). Gli esiti della ricerca qui presentata evidenziano poi, in modo articolato ma non meno sistematico, la dimensione composita assunta dai processi di integrazione fra le aree transnazionali dell'Alto Adriatico nell'evoluzione dei due decenni appena trascorsi. Vengono pertanto in rilievo essenziali opportunità di

integrazione in ambito turistico, logistico, industriale e di comunicazione economico-finanziaria fra le differenti regioni adriatiche in un'ottica tesa a risaltare le principali linee strategiche di crescita per le imprese affacciate sul medesimo specchio d'acqua. Siffatte rinnovate e rafforzate strategie comuni hanno contribuito, nell'ultimo ventennio, a creare e sviluppare una vera e propria globalizzazione delle manifatture nonché del flusso di beni, servizi e capitali. Un approccio globale che è risultato assolutamente vincente per raccogliere e vincere la sfida rappresentata da beni di consumo sempre più complessi (in quanto costituiti da numerose componenti) la cui realizzazione richiede il coinvolgimento di più Paesi in un'ottica di miglior sfruttamento dei vantaggi comparati rivelati. Si può dunque riscontrare una sempre più stretta interdipendenza tra il distretto Nord-Est italiano e le altre aree dell'Alto Adriatico in cui sono identificabili percorsi macro-regionali di specializzazione che coinvolgono taluni territori

Common Principles of Tort Law Gert Brüggemeier, 2004 Article 288 (2) EC, on liability of the European Community and its organs, refers to the common principles of tort law in the Member States. There are at least two good reasons for looking into these general principles: in nearly all developed Western legal orders, tort law is determined through judge-made law, which now requires a comparative orientation by means of principles and systemized casuistry; and the various attempts to Europeanize private law - from mere restatements to a comprehensive European Civil Code - are all grounded in these common principles of contract law, tort law, property law and so on. This book's somewhat unconventional contribution takes its cue not so much from the politically defined EC Europeanization, but rather from the transnationality of law. By comparing tort law in the EC member state, Germany, and the non-EC member, the US (two of the most developed western industrial nations), this publication endeavors to develop principles which serve as a basis for generalization. These principles claim validity for the civil-law and common-law legal orders of Western civilizations, which includes the EC with its respective Member States. This title is aimed at a learned European audience interested in legal harmonization, but also addresses comparatists in the civil-law and common-law legal world and mixed jurisdictions outside of Europe. Its main focus is to contribute to the further development of tort law. The idea of a tort law system based on general principles and specific rules grows out of the continental natural-law tradition of civil law, but increasingly principle-oriented works are also found in common law. This book develops a common level of international work on structures and concepts of modern tort law.

Health Risks of Ozone from Long-range Transboundary Air Pollution Markus Amann, 2008 Ozone is a highly oxidative compound formed in the lower atmosphere (from gases originating to a large extent from anthropogenic sources) by photochemistry driven by solar radiation. Owing to its highly reactive chemical properties, ozone is harmful to vegetation, materials and human health. In the troposphere, ozone is also an efficient greenhouse gas. This report summarizes the results of a multidisciplinary analysis to assess the effects of ozone on health. The analysis indicates that ozone pollution

affects the health of most of the populations of the WHO European Region, leading to a wide range of health problems. The effects include some 21,000 premature deaths each year in 25 countries in the European Union on and after days with high ozone levels. Current policies are not sufficient to reduce ozone levels in the Region or their impact in the next decade.
