Media and Digital Management Eli M. Noam, 2019-01-23 Being a successful manager or entrepreneur in the media and digital sector requires creativity, innovation, and performance. It also requires an understanding of the principles and tools of management. Aimed at the college market, this book is a short, foundational volume on media management. It summarizes the major dimensions of a business school curriculum and applies them to the entire media, media-tech, and digital sector. Its chapters cover—in a jargonless, non-technical way—the major functions of management. First, creating a media product: the financing of projects, and the management of technology, HR, production operations, intellectual assets, and government relations. Second, harvesting the product created: market research, marketing, pricing, and distribution. And third, the control loop: media accounting and strategy planning. In the process, this book becomes an indispensable resource for those aiming for a career in the media and digital field, both in startups and established organizations. This book is designed to help those aiming to join the media and digital sector to become creative managers and managerial creatives. It aims to make them more knowledgeable, less blinded by hype, more effective, and more responsible.

Why Startups Fail Tom Eisenmann, 2021-03-30 If you want your startup to succeed, you need to understand why startups fail. “Whether you’re a first-time founder or looking to bring innovation into a corporate environment, Why Startups Fail is essential reading.”—Eric Ries, founder and CEO, LTSE, and New York Times bestselling author of The Lean Startup and The Startup Way Why do startups fail? That question caught Harvard Business School professor Tom Eisenmann by surprise when he realized he couldn’t answer it. So he launched a multiyear research project to find out. In Why Startups Fail, Eisenmann reveals his findings: six distinct patterns that account for the vast majority of startup failures. • Bad Bedfellows. Startup success is thought to rest largely on the founder’s talents and instincts. But the wrong team, investors, or partners can sink a venture just as quickly. • False Starts. In following the oft-cited advice to “fail fast” and to “launch before you’re ready,” founders risk wasting time and capital on the wrong solutions. • False Promises. Success with early adopters can be misleading and give founders unwarranted confidence to expand. • Speed Traps. Despite the pressure to “get big fast,”

hypergrowth can spell disaster for even the most promising ventures. • Help Wanted. Rapidly scaling startups need lots of capital and talent, but they can make mistakes that leave them suddenly in short supply of both. • Cascading Miracles. Silicon Valley exhorts entrepreneurs to dream big. But the bigger the vision, the more things that can go wrong. Drawing on fascinating stories of ventures that failed to fulfill their early promise—from a home-furnishings retailer to a concierge dog-walking service, from a dating app to the inventor of a sophisticated social robot, from a fashion brand to a startup deploying a vast network of charging stations for electric vehicles—Eisenmann offers frameworks for detecting when a venture is vulnerable to these patterns, along with a wealth of strategies and tactics for avoiding them. A must-read for founders at any stage of their entrepreneurial journey, *Why Startups Fail* is not merely a guide to preventing failure but also a roadmap charting the path to startup success.

The Business Model Innovation Process Yariv Taran, Harry Boer, Christian Nielsen, 2021-11-21 *Business Model Innovation Process: Preparation, Organization and Management* examines a range of critical questions that merit thoughtful interdisciplinary consideration, such as: Why do business models, and their innovation in particular, matter today? How can the process of business model innovation be understood, organized and managed adequately under increasingly volatile, uncertain, complex and ambiguous technological, business and geo-political conditions? What should decision-making and risk-management look like under these conditions, with managers whose rationality is bounded? The book offers a detailed

account of the relatively unknown process of business model innovation by looking into the intersection of strategic, operations and innovation management, organizational design, decision-making and performance management. In doing so, this book addresses fundamental issues, and introduces new ideas and theoretical perspectives. In envisioning and thinking about various potential scenarios of business model innovation and understanding how to organize for each of these under different conditions, the book provides original arguments and suggestions for practitioners. For that purpose, the book also offers many compelling real-life examples of business models and their innovation. Combining theory and practice, this book is an essential read for researchers and academics of business model innovation, as well as strategic management, digital transformation, innovation management and organizational change. It will also be of direct interest to practitioners and business leaders seeking new perspectives to increase their competitive advantage.

Confronting the Challenges of Participatory Culture Henry Jenkins,2009-06-05 Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the digital divide from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. The Purchasing Chessboard Christian Schuh, Joseph L. Raudabaugh, Robert Kromoser, Michael F. Strohmer, Alenka Triplat, 2011-11-27 The approach used on a given spend item should largely depend on the balance between supply power and demand power. That is the logic behind the bestselling Purchasing Chessboard®, used by hundreds of corporations worldwide to reduce costs and increase value with suppliers. The 64 squares in the Purchasing Chessboard provide a rich reservoir of methods that can be applied either individually or combined. And because many of these methods are not customarily used by procurement, the Purchasing Chessboard is also the perfect tool for helping buyers to think and act outside the box and find new solutions. A well-proven concept that works across all industries and all categories in any given situation, it is little wonder that business leaders and procurement professionals alike are excited by, and enjoy strategizing around, the Purchasing Chessboard. This second edition of The Purchasing Chessboard addresses the new realities of a highly volatile economic environment and describes the many—sometimes surprising—ways in which the Purchasing Chessboard is being used in today's business world. Yet despite all of the great achievements of procurement executives and their teams, they do not always receive the recognition they deserve. In response, the authors have developed and outlined within the book an unequivocal approach to measure procurement's impact on a company's performance—Return on Supply Management Assets (ROSMA®).

The Friction Project Robert I. Sutton, Huggy Rao, 2024-01-30 The definitive guide to eliminating the forces that make it harder, more complicated, or downright impossible to get things done in organizations. Find out why Adam Grant says If every leader took the ideas in this book seriously, the world would be a less miserable, more productive place. Every organization is plagued by destructive friction. Yet some forms of friction are incredibly useful, and leaders who attempt to improve workplace efficiency often make things even worse. Drawing from seven years of hands-on research, The Friction Project by bestselling authors Robert I. Sutton and Huggy Rao teaches readers how to become “friction fixers.” Sutton and Rao kick off the book by unpacking how skilled friction fixers think and act like trustees of others’ time. They provide friction forensics to help readers identify where to avert and repair bad organizational friction and where to maintain and inject good friction. Then their help pyramid shows how friction fixers do their work, from reframing friction troubles they can’t fix right now, so they feel less threatening, to designing and repairing organizations. The heart of the book digs into the causes and solutions for five of the most common and damaging friction troubles: oblivious leaders, addition sickness, broken connections, jargon monoxide, and fast and frenzied people and teams. Sound familiar? Sutton and Rao are here to help. They wrap things up with lessons for leading your own friction project, including linking little things to big things; the power of civility, caring, and love for propelling designs and repairs; and embracing the mess that is an inevitable part of the process (while still trying to clean it up).
