Making in America Suzanne Berger, 2013-08-23 How America can rebuild its industrial landscape to sustain an innovative

economy. America is the world leader in innovation, but many of the innovative ideas that are hatched in American start-ups, labs, and companies end up going abroad to reach commercial scale. Apple, the superstar of innovation, locates its production in China (yet still reaps most of its profits in the United States). When innovation does not find the capital, skills, and expertise it needs to come to market in the United States, what does it mean for economic growth and job creation? Inspired by the MIT Made in America project of the 1980s, Making in America brings experts from across MIT to focus on a critical problem for the country. MIT scientists, engineers, social scientists, and management experts visited more than 250 firms in the United States, Germany, and China. In companies across America—from big defense contractors to small machine shops and new technology start-ups—these experts tried to learn how we can rebuild the industrial landscape to sustain an innovative economy. At each stop, they asked this basic question: “When you have a new idea, how do you get it into the market?” They found gaping holes and missing pieces in the industrial ecosystem. Even in an Internet-connected world, proximity to innovation and users matters for industry. Making in America describes ways to strengthen this connection, including public-private collaborations, new government-initiated manufacturing innovation institutes, and industry/community college projects. If we can learn from these ongoing experiments in linking innovation to production, American manufacturing could have a renaissance.

Quantitative Marketing and Marketing Management Adamantios Diamantopoulos, Wolfgang Fritz, Lutz Hildebrandt, 2013-01-31 Quantitative marketing has been gaining importance during the last decade. This is indicated by the growing number of model- and method-oriented studies published in leading journals as well as by the many successful applications of quantitative approaches in pricing, advertising, new product planning, and market segmentation decisions. In addition, market research has clearly benefitted from applying advanced quantitative models and methods in practice. Some 60 researchers – among them worldwide leading scholars – offer a broad overview of quantitative approaches in marketing. They not only highlight diverse mathematical and methodological perspectives, but also demonstrate the relevance and practical consequences of applying quantitative approaches to marketing problems.

That Winter Pamela Gillilan, 1986 Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

Antecedents to Modern Rwanda Jan Vansina, 2005-03-09 To understand the genocide and other dramatic events of Rwanda's recent past, one must understand the history of the earlier realm. Jan Vansina provides a critique of the history recorded by early missionaries and court historians and provides a bottom-up view, drawing on hundreds of grassroots narratives. He describes the genesis of the Hutu and Tutsi identities, their growing social and political differences, their bitter feuds, revolts, and massacres, and the relevance of this dramatic history to the post-genocide Rwanda of today. 2001 French edition, Katharla Publishers

The Cohesion of Oppression Catharine Newbury, 1988 Focusing on Kenya and Tanzania, this important study suggests that the solution to third world hunger lies in the interaction of political development and the mobilization of technical resources. The book clarifies as never before the role of political institutions in successful new technology diffusion; shows the similarities between capitalist and socialist states' approaches to technology; and traces the development of assistance projects.

Bodyscapes® Allan I. Teger, 2012 Can there be more than one reality at a time, and can we experience them both? These were the questions that led photographer and former psychology professor Allan I. Teger to create this collection of black and white Bodyscapes(R). At first glance, Bodyscapes appear to be landscapes; a second look shows that they are in fact nude bodies with small toys and miniatures set on them. Spanning a 35-year period, this collection shows more than 110 black and white images photographed in a single exposure without any post processing or manipulation. The body becomes the setting for golfing, skiing, mountain climbing, surfing, and other sports. Other images feature landscapes ranging from rolling

farmlands to beaches and outer space. They are fun, beautiful, and sensual, but always in good taste. This elegant portfolio of Teger's images is an ideal, reality-bending addition to any art photography library.
