**Housing Market Dynamics in Africa** El-hadj M. Bah,Issa Faye,Zekebweliwai F. Geh,2018-03-12 This open access book

utilizes new data to thoroughly analyze the main factors currently shaping the African housing market. Some of these factors include the supply and demand for housing finance, land tenure security issues, construction cost conundrum, infrastructure provision, and low-cost housing alternatives. Through detailed analysis, the authors investigate the political economy surrounding the continent's housing market and the constraints that behind-the-scenes policy makers need to address in their attempts to provide affordable housing for the majority in need. With Africa's urban population growing rapidly, this study highlights how broad demographic shifts and rapid urbanization are placing enormous pressure on the limited infrastructure in many cities and stretching the economic and social fabric of municipalities to their breaking point. But beyond providing a snapshot of the present conditions of the African housing market, the book offers recommendations and actionable measures for policy makers and other stakeholders on how best to provide affordable housing and alleviate Africa's housing deficit. This work will be of particular interest to practitioners, non-governmental organizations, private sector actors, students and researchers of economic policy, international development, and urban development.

**Oil to Cash** Todd Moss, Caroline Lambert, Stephanie Majerowicz, 2015-06-10 Oil to Cash explores one option to help countries with new oil revenue avoid the so-called resource curse: just give the money directly to citizens. A universal, transparent, and regular cash transfer would not only provide a concrete benefit to regular people, but would also create powerful incentives for citizens to hold their government accountable. Oil to Cash details how and where this idea could work and how policymakers can learn from the experiences with cash transfers in places like Mexico, Mongolia, and Alaska.

**Stakeholders** Andrew L. Friedman, Samantha Miles, 2006-04-13 The research on social discourse in societies, firms, and organizations written by researchers working in fields such as Management, Corporate Governance, Accounting and Finance, Strategy, Sociology, and Politics often make reference to the term 'stakeholder'. Yet the concept of the 'stakeholder' is unclear, and research around it often muddled. This book provides an analysis, classification, and critique of the various strands of theory about stakeholders. The authors place these theories both in the context of their philosophical underpinnings, and their practical and policy implications. Practical examples based on new data are used to examine a diverse range of stakeholders, and the relationships stakeholders have with their organizations. This is the first book on stakeholder theory to propose a critical analysis, both at the macro and micro level, that is framed and guided by theory. Written to provide both order and clarity to research into the concept of the stakeholder, the book is also written as an introduction for students. It includes chapter introductions, useful tables and figures, short vignettes on key concepts and issues, and discussion questions.
