Using Understanding by Design in the Culturally and Linguistically Diverse Classroom Amy J. Heineke, Jay McTighe, 2018-07-11 How can today's teachers, whose classrooms are more culturally and linguistically diverse than ever before, ensure that their students achieve at high levels? How can they design units and lessons that support English learners in language development and content learning—simultaneously? Authors Amy Heineke and Jay McTighe provide the answers by adding a lens on language to the widely used Understanding by Design® framework (UbD® framework) for curriculum design, which emphasizes teaching for understanding, not rote memorization. Readers will learn * the components of the UbD framework; * the fundamentals of language and language development; * how to use diversity as a valuable resource for instruction by gathering information about students' background knowledge from home, community, and school; * how to design units and lessons that integrate language development with content learning in the form of essential knowledge and skills; and * how to assess in ways that enable language learners to reveal their academic knowledge. Student profiles, real-life classroom scenarios, and sample units and lessons provide compelling examples of how teachers in all grade levels and content areas use the UbD framework in their culturally and linguistically diverse classrooms. Combining these practical examples with findings from an extensive research base, the authors deliver a useful and authoritative guide for reaching the overarching goal: ensuring that all students have equitable access to high-quality curriculum and instruction.

The Rise of English Rosemary C. Salomone, 2022 A sweeping account of the global rise of English and the high-stakes politics of language Spoken by a quarter of the world's population, English is today's lingua franca - its common tongue. The language of business, popular media, and international politics, English has become commodified for its economic value and increasingly detached from any particular nation. This meteoric rise of English has many obvious benefits to communication. Tourists can travel abroad with greater ease. Political leaders can directly engage their counterparts. Researchers can collaborate with foreign colleagues. Business interests can flourish in the global economy. But the rise of English has very real downsides as well. In Europe, imperatives of political integration and job mobility compete with pride in national language and heritage. In the United States and England, English isolates us from the cultural and economic benefits of speaking other languages. And in countries like India, South Africa, Morocco, and Rwanda, it has stratified society along lines

of English proficiency. In *The Rise of English*, Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far-reaching effects it has on global and local politics, economics, media, education, and business. From the inner workings of the European Union to linguistic battles over influence in Africa, Salomone draws on a wealth of research to tell the complex story of English - and, ultimately, to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders.

Domesticidad en Guerra Beatriz Colomina, 2006

The Anatomy Lesson Philip Roth, 2013-07-02 Philip Roth's *The Anatomy Lesson* was a finalist for the National Book Award and the National Book Critics Circle Award. A comic masterpiece and brilliant finale to the Zuckerman trilogy. The writer Nathan Zuckerman comes down with a mysterious physical affliction--pure pain, beginning in his neck and shoulders, invading his torso and taking possession of his life. Zuckerman, whose work was his life, is unable to write a line. Now his work is trekking from one doctor to the next--from orthopedist to osteopath to neurologist to psychiatrist--but none can find a cause for the pain and nobody can assuage it. So begins Philip Roth's strangely comic new novel, *The Anatomy Lesson*. In it, we find Nathan Zuckerman beset at age forty not only by his pain but by his past. He seriously wonders if he ought to be a novelist at all. At his wit's end, bewildered by both the obstinate pain and the isolating profession, and unconsolable by his harem of Florence Nightingales--Gloria, his accountant's wildly mothering wife; Jaga, the depressed Polish refugee from the hair-treatment clinic (to add to his suffering, Zuckerman is going bald); Diana, the distressingly self-possessed Finch College heiress; and the temptingly levelheaded painter Jenny--Zuckerman tries to pin his catastrophe on some source he can confront. There is no shortage of candidates. Zuckerman's brother blames his acerbic bestseller Carnovsky, for ruining the lives of their late parents, and will have nothing to do with him. There's the critic Milton Appel, once Zuckerman's literary conscience, now his scourge--the Grand Inquisitor of Inquiry magazine, the New York Jewish cultural monthly. Searching desperately for a diagnosis that will lead to a cure, Zuckerman asks himself if the pain can have been caused by his adversaries, or by his astonishingly intractable grief for his mother, or by the disgust he has come to feel for the literary vocation he once loved. And while he is wondering, his dependence on painkillers grows into an addiction to Percodan, marijuana, and hundred-proof vodka. In the last half of *The Anatomy Lesson*, Zuckerman breaks out of invalid imprisonment in his Manhattan apartment and sets off on a journey to escape the pain, the adversaries, the grief, and the career--a journey into a new existence, a search for a second life. Persuaded that a doctor's life is everything a writer's is not, Zuckerman flies to Chicago with the intention of applying to medical school at his alma mater. Though the pain he encounters there is worse even than what he's fled, the startling quest for the second life provides some of the funniest scenes in all of Roth's fiction. With the serious playfulness and extravagant insistence characteristic of his work, Roth, in his fourteenth published book, presents an astonishing antithesis to *The Magic Mountain*: *The Anatomy Lesson* is a great comedy of illness. Roth's strength

has always been the ability to depict the boisterous, the farcical, and the extreme in human behavior while revealing at the same time a world that immediately strikes the reader as real--what the English critic Hermione Lee has called, in writing of Roth's career, a manner at once...brash and thoughtful...lyrical and wry, which projects through comic expostulations and confessions of the speakers a knowing, humane authority. The Anatomy Lesson is one of Roth's finest achievements in this vein.

Architecture of the Everyday Deborah Berke, Steven Harris, 2012-04-17 Ordinary. Banal. Quotidian. These words are rarely used to praise architecture, but in fact they represent the interest of a growing number of architects looking to the everyday to escape the ever-quickenening cycles of consumption and fashion that have reduced architecture to a series of stylistic fads. *Architecture of the Everyday* makes a plea for an architecture that is emphatically un-monumental, anti-heroic, and unconcerned with formal extravagance. Edited by Deborah Berke and Steven Harris, this collection of writings, photo-essays, and projects describes an architecture that draws strength from its simplicity, use of common materials, and relationship to other fields of study. Topics range from a website that explores the politics of domesticity, to a transformation of the sidewalk in Los Angeles' Little Tokyo, to a discussion of the work of Robert Venturi and Denise Scott Brown. Contributors include Margaret Crawford, Peggy Deamer, Deborah Fausch, Ben Gianni and Mark Robbins, Joan Ockman, Ernest Pascucci, Alan Plattus, and Mary-Ann Ray. Deborah Berke and Steven Harris are currently associate professors of architecture at Yale University, and have their own practices in New York City.

Enhancing the Effectiveness of Team Science National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Team Science, 2015-07-15 The past half-century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research, referred to as team science. Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? *Enhancing the Effectiveness of Team Science* synthesizes and integrates the available research to provide guidance on assembling the science team; leadership, education and professional development for science teams and groups. It also examines institutional and organizational structures and policies to

support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals. This report offers major public policy recommendations for science research agencies and policymakers, as well as recommendations for individual scientists, disciplinary associations, and research universities. Enhancing the Effectiveness of Team Science will be of interest to university research administrators, team science leaders, science faculty, and graduate and postdoctoral students.

Exhibiting Atrocity Amy Sodaro, 2018-01-23 Today, nearly any group or nation with violence in its past has constructed or is planning a memorial museum as a mechanism for confronting past trauma, often together with truth commissions, trials, and/or other symbolic or material reparations. Exhibiting Atrocity documents the emergence of the memorial museum as a new cultural form of commemoration, and analyzes its use in efforts to come to terms with past political violence and to promote democracy and human rights. Through a global comparative approach, Amy Sodaro uses in-depth case studies of five exemplary memorial museums that commemorate a range of violent pasts and allow for a chronological and global examination of the trend: the U.S. Holocaust Memorial Museum in Washington, DC; the House of Terror in Budapest, Hungary; the Kigali Genocide Memorial Centre in Rwanda; the Museum of Memory and Human Rights in Santiago, Chile; and the National September 11 Memorial Museum in New York. Together, these case studies illustrate the historical emergence and global spread of the memorial museum and show how this new cultural form of commemoration is intended to be used in contemporary societies around the world.

Drawdown Paul Hawken, 2018-02-22 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

Hiroshima M. G. Sheftall, 2024-09-10 The first volume in a two-book series about each of the atomic bomb drops that ended the Pacific War based on years of irreplicable personal interviews with survivors to tell a story of devastation and resilience In this vividly rendered historical narrative, M. G. Sheftall layers the stories of hibakusha—the Japanese word for atomic bomb survivors—in harrowing detail, to give a minute-by-minute report of August 6, 1945, in the leadup and aftermath of the world-changing bombing mission of Paul Tibbets, Enola Gay, and Little Boy. These survivors and witnesses, who now have an average age over ninety years old, are quite literally the last people who can still provide us with reliable and detailed testimony about life in their cities before the bombings, tell us what they experienced on the day those cities were obliterated, and give us some appreciation of what it has entailed to live with those memories and scars during the subsequent seventy-plus years. Sheftall has spent years personally interviewing survivors who lived well into the twenty-first century, allowing him to construct portraits of what Hiroshima was like before the bomb, and how catastrophically its citizens' lives changed in the seconds, minutes, days, weeks, months, and years afterward. He stands out among historians due to his fluency in spoken and written Japanese, and his longtime immersion in Japanese society that has allowed him, a white American, the unheard-of access to these atomic bomb survivors in the waning years of their lives. Their trust in him is evident in the personal and traumatic depths they open up for him as he records their stories. *Hiroshima* should be required reading for the modern age. The personal accounts it contains will serve as cautionary tales about the horror and insanity of nuclear warfare, reminding them—it is hoped—that the world still lives with this danger at our doorstep.

Other People's Children Lisa Delpit, 2006-08-01 The classic, groundbreaking analysis of the role of race in the

classroom and a guide for teaching across difference, from the MacArthur Award-winning educator “Phenomenal. . . . [This book] overcomes fear and speaks of truths, truths that otherwise have no voice.” —San Francisco Review of Books In this groundbreaking, radical analysis of contemporary classrooms, MacArthur Award-winning author Lisa Delpit develops the theory that teachers must be effective “cultural transmitters” in the classroom, where prejudice, stereotypes, and assumptions often breed ineffective education. Delpit suggests that many academic problems attributed to children of color are actually the result of miscommunication, as primarily white teachers educate “other people’s children” and perpetuate the imbalanced power dynamics that plague our system. Now a classic of educational thought and a must-read for teachers, administrators, and parents striving to improve the quality of America’s education system, *Other People’s Children* has sold over 150,000 copies since its original publication. Winner of an American Educational Studies Association Critics’ Choice Award and *Choice* magazine’s Outstanding Academic Book Award, this anniversary edition features a new introduction by Delpit as well as important framing essays by Herbert Kohl and Charles Payne.

They also have experience in a range of settings—museums, after-school programs, science and technology centers, media enterprises, aquariums, zoos, state parks, and botanical gardens. *Learning Science in Informal Environments* is an invaluable guide for program and exhibit designers, evaluators, staff of science-rich informal learning institutions and community-based organizations, scientists interested in educational outreach, federal science agency education staff, and K-12 science educators.

Unsettled States Dana Luciano, Ivy Wilson, 2014-08-15 In *Unsettled States*, Dana Luciano and Ivy G. Wilson present some of the most exciting emergent scholarship in American literary and cultural studies of the “long” nineteenth century. Featuring eleven essays from senior scholars across the discipline, the book responds to recent critical challenges to the boundaries, both spatial and temporal, that have traditionally organized scholarship within the field. The volume considers these recent challenges to be aftershocks of earlier revolutions in content and method, and it seeks ways of inhabiting and amplifying the ongoing unsettledness of the field. Written by scholars primarily working in the “minor” fields of critical race

and ethnic studies, feminist and gender studies, labor studies, and queer/sexuality studies, the essays share a minoritarian critical orientation. Minoritarian criticism, as an aesthetic, political, and ethical project, is dedicated to finding new connections and possibilities within extant frameworks. *Unsettled States* seeks to demonstrate how the goals of minoritarian critique may be actualized without automatic recourse to a predetermined “minor” location, subject, or critical approach. Its contributors work to develop practices of reading an “American literature” in motion, identifying nodes of inquiry attuned to the rhythms of a field that is always on the move.

The Advocate, 2001-08-14 *The Advocate* is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

Gender Change in Academia Birgit Riegraf, Brigitte Aulenbacher, Edit Kirsch-Auwärter, Ursula Müller, 2010-07-15
Editors’ Foreword The fundamental changes currently taking place in the national and international science landscapes can no longer be overlooked. Within those changes, reforms do not go ‘as planned’ but, as is always the case with processes of rationalization, have a series of unintended effects. At the same time it becomes increasingly clear who in this process are the winners and who are the losers, although this is still subject to fluctuation and change. This can be illustrated by two examples from current events: Where the range of taught courses is concerned, as part of the Bologna Process the new structuring of student study paths and their organisation is aimed at unifying the European area of science to ensure a study that is equally permissive and efficient. However, it is to be deplored that the mobility of students has become more restricted because of an increasing specialisation in the available study paths. Also, bachelor degrees do not meet with the anticipated high response from the labour market in all countries, so that the master’s degree is becoming more or less a ‘must’, while at the same time the number of study places on master’s courses is limited. Instead of the intended reduction in the duration of study time in comparison to the previous German ‘Magister’ and ‘Diplom’, rather a prolongation in the duration of studies has been recorded.

Borderline, Narcissistic, and Schizoid Adaptations Elinor Greenberg, 2016-09-12 *Borderline, Narcissistic, and Schizoid Adaptations* demystifies the diagnosis and treatment of personality disorders. It offers clear and practical advice on how to differentiate and treat clients who have made Borderline, Narcissistic, or Schizoid adaptations. Elinor Greenberg begins with an overview of the topic of personality disorders, reframes these disorders as adaptations, and then explains the treatment interventions that work best for each type of adaptation. Later chapters describe how to do specific interventions that deal with commonly encountered treatment issues such as: How to undo a Narcissistic shame-based self-hating depression, How to judge a Schizoid client's sense of interpersonal safety from their dreams, and How to help Borderline clients reach their goals. Each type of intervention is explained in detail, ample clinical examples are given, as is how and when to utilize the method in the client's treatment. Both beginning therapists and experienced clinicians alike will find this

book a useful resource that will expand their understanding and effectiveness with this often challenging group of clients.

Militant Islam Stephen Vertigans, 2008-10-30 *Militant Islam* provides a sociological framework for understanding the rise and character of recent Islamic militancy. It takes a systematic approach to the phenomenon and includes analysis of cases from around the world, comparisons with militancy in other religions, and their causes and consequences. The sociological concepts and theories examined in the book include those associated with social closure, social movements, nationalism, risk, fear and 'de-civilising'. These are applied within three main themes; characteristics of militant Islam, multi-layered causes and the consequences of militancy, in particular Western reactions within the 'war on terror'. Interrelationships between religious and secular behaviour, 'terrorism' and 'counter-terrorism', popular support and opposition are explored. Through the examination of examples from across Muslim societies and communities, the analysis challenges the popular tendency to concentrate upon 'al-Qa'ida' and the Middle East. This book will be of interest to students of Sociology, Political Science and International Relations, in particular those taking courses on Islam, religion, terrorism, political violence and related regional studies.
