Odd-ivar Lekang

Salmon Farming Odd-ivar Lekang,2022-07-31 Aquaculture production is expanding worldwide in both volume and scope, with a number of new species being introduced to aquaculture every year. Salmon Farming provides an overview of aquaculture production systems focusing on Atlantic salmon farming, which will enable users to: produce broodstock, juveniles and adult fish develop a production plan for juvenile and ongrowing farms evaluate and optimize the key working operations on juvenile and ongrowing farms identify the factors that are important for economic and sustainable production identify the factors that affect the rate of production, how these factors can be changed, and what effects such changes have adopt the best procedures for season-independent smolt production understand water quality requirements and evaluate the suitability based on water analysis prepare documents for production control and propose amendments prepare working plans for smolt production and ongrowing production farms establish maintenance routines/plans for smolt production and ongrowing production estimate the investment and running cost for the main components of smolt and ongrowing farms remain up to date with the laws and regulations that need to be considered in aquaculture production planning internationally stay abreast of new trends in the industry. Salmon Farming gives an overview of aquaculture production systems focusing on Atlantic salmon farming. However, much of the subject coverage and overall structure of the book are directly transferable to other species, with much of the core of the book being species-independent and applicable internationally. 5m Books

Regional review on status and trends in aquaculture development in Latin America and the Caribbean - 2020 Wurmman, C. Soto, D., Norambuena, R.,2022-01-06 This document reviews the development of the aquaculture industry in the Latin America and the Caribbean region over the past decade. In 2018 aquaculture production in the region amounted to an estimated 3.1 million tonnes of aquatic products (excluding seaweeds) worth USD 17.2 billion at first sale. This food sector is vastly concentrated in a few countries with the combined output from Brazil, Chile, Colombia, Ecuador and Mexico representing over 85 percent of the total regional production. Atlantic salmon, rainbow trout, tilapia, whiteleg shrimp and the Chilean mussel collectively contributed 80.4 percent and 85.9 percent of the regional production by volume and value,

respectively. Marine aquaculture has been the dominant production environment in the region for the past two decades, accounting for 70.1 percent of the farmed output in 2018. Production models vary widely, with a concentration of large-scale companies in Chile, while primarily small- and/or medium-size operations in Brazil, Peru and several other countries. Introduced species remain top on the list among those farmed such as tilapia and the different salmonids both of which have contributed to local livelihoods and employment. Tilapia farming has contributed significantly to food security in many countries of the region while the largest proportion of farmed salmon has been destined to the export markets. Production prospects remain promising, however the industry requires in general better governance, the adoption at all levels of appropriate technologies and best practices, and renewed efforts to guarantee environmental sustainability and social acceptance as well as competitiveness and foresight to deal with climate and market changes. The small island developing states (SIDS) face additional challenges including limited expertise, high production costs, poor seed supplies, as well as extreme and destructive weather events. The report discusses issues that require wider regional attention for the aquaculture sector to grow. Key recommendations focus on governance-related improvements highlighting the need for solid sectoral development plans, support policies, and effective rules and regulations. The promotion of a stronger cooperation among the countries in the region as well as further afield on technical matters, species diversification and equal support to small and large-scale farming operations are identified as key elements to foster investment and help the region gain a solid position among world aquatic food producers.

The Welfare of Fish Tore S. Kristiansen, Anders Fernö, Michail A. Pavlidis, Hans van de Vis, 2020-07-01 This book investigates how fish experience their lives, their amazing senses and abilities, and how human actions impact their quality of life. The authors examine the concept of fish welfare and the scientific knowledge behind the inclusion of fish within the moral circle, and how this knowledge can change the way we treat fish in the future. In many countries fish are already protected by animal welfare legislation in the same way as mammals, but in practice there is still a major gap between how we ethically view these groups and how we actually treat them. The poor treatment of fish represents a massive animal welfare problem in aquaculture and fisheries, both in terms of the number of animals affected and the severity of the welfare issues. Thanks to its interdisciplinary scope, this thought-provoking book appeals to professionals, academics and students in the fields of animal welfare, cognition and physiology, as well as fisheries and aquaculture management.

Ocean/aquatic food systems: Interactions with ecosystems, fisheries, aquaculture, and people Barry Antonio Costa-Pierce, Helgi Thor Thorarensen, Åsa Strand, 2023-12-15

Chilean Salmon Teodoro Wigodski, 2024-11-28 Chilean Salmon: Shared Responsibility offers a revealing look at salmon aquaculture in Chile, an industry at the crossroads of business ethics and environmental sustainability. Through an engaging narrative, Teodoro Wigodski S., a distinguished academic and business director, explores the complexities and challenges

of this prominent industry, which is vital to both the national economy and global well-being. Drawing from his experience as president of the Puerto Montt Port Company and his handling of the ISA virus crisis, Wigodski delves deeply into the conflicts with local communities and environmental organizations, highlighting the opportunities for a development that respects economic, social, and environmental values. This book is the result of rigorous research, including visits and interviews in both Chile and Norway. This journey, both intellectual and physical, not only unveils the internal challenges faced by the industry but also serves as a call to action to foster sustainable practices. Poised to become an essential resource in the debate over the future of aquaculture, the book functions as an educational tool for students and professionals from various disciplines. More than a mere collection of data, the work invites dialogue about shared responsibility in the sustainable development of the salmon industry. Discover the intricate relationship between business ethics, environmental sustainability, and economic development. This book is essential reading for those committed to building a future where harmony between industry and nature prevails.

Sustainable Blue Revolution in India Latha Shenoy, Shridhar Rajpathak, 2021-05-31 This book provides comprehensive information on several dimensions of blue revolution in a structured form. Material provided in the book has been gathered from several relevant published sources and views expressed are based on practical field experience of the authors. Blue revolution would be one of the big game changers for the Indian economy. The subject of sustainable development of fisheries sector being very vast, concerted efforts have been made to accommodate all the relevant elements. Very little reading material with proper analysis is currently available and this book is expected to bridge the gap and project way-forward to achieve sustainable development of fisheries and aquaculture in India under the blue revolution. The book is organised under 13 chapters covering wide ranging subjects that include fish production, processing, marketing, exports/imports of fishery products; ecolabelling; role of industry in promoting sustainability in fishing and aquaculture; sustainability issues in marine/inland fisheries/aquaculture; and fisheries regulations and legislations. Information has been provided on Sustainable Development Goals (SDGs) particularly SDG 14 (Life Below Water); components of blue economy; Government of India fisheries development initiatives; and executive summary of recently launched PMMSY. Emerging plant and cell-based seafood segment; overall impacts of climate change; and impact of recent pandemic COVID-19 on fisheries and aquaculture are discussed under separate chapters. Finally, a chapter on 'Way Forward' is included that suggests practical management measures, technology infusion, technical interventions along with few innovative concepts and approaches towards achieving blue revolution. Note: T&F does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Organic Aquaculture Giuseppe Lembo, Elena Mente, 2019-03-28 This book addresses, reviews and evaluates key themes in organic aquaculture and is set out to show how these relate to the challenges and bottlenecks for a responsible organic

aquaculture production in Europe. The key themes reflect the main challenges facing the organic aquaculture industry: guarantee and certification system, nutrition, reproduction, production system design and animal welfare. In addition, it assesses the impact of new and future potential development of new knowledge to update and modify the criteria and standards for organic aquaculture. Organic aquaculture is an alternative production approach driven by the growing interest in sustainable utilization of resources. It is rightly viewed as an important contributor to the economy and to the well-being and health of communities. This work will contribute to the scientific knowledge that needs to strengthen effective organic aquaculture. The collation of information on research and data will be of applied value to researchers, university students, end users and policy authorities in the EU and worldwide.

Routledge Handbook of Gender and Agriculture Carolyn E. Sachs, Leif Jensen, Paige Castellanos, Kathleen Sexsmith, 2020-10-28 The Routledge Handbook of Gender and Agriculture covers major theoretical issues as well as critical empirical shifts in gender and agriculture. Gender relations in agriculture are shifting in most regions of the world with changes in the structure of agriculture, the organization of production, international restructuring of value chains, climate change, the global pandemic, and national and multinational policy changes. This book provides a cutting-edge assessment of the field of gender and agriculture, with contributions from both leading scholars and up-and-coming academics as well as policymakers and practitioners. The handbook is organized into four parts: part 1, institutions, markets, and policies; part 2, land, labor, and agrarian transformations; part 3, knowledge, methods, and access to information; and part 4, farming people and identities. The last chapter is an epilogue from many of the contributors focusing on gender, agriculture, and shifting food systems during the coronavirus pandemic. The chapters address both historical subjects as well as ground-breaking work on gender and agriculture, which will help to chart the future of the field. The handbook has an international focus with contributions examining issues at both the global and local levels with contributors from across the world. With contributions from leading academics, policymakers, and practitioners, and with a global outlook, the Routledge Handbook of Gender and Agriculture is an essential reference volume for scholars, students, and practitioners interested in gender and agriculture. Chapter 13 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

The Routledge Handbook of Indigenous Environmental Knowledge Thomas F. Thornton, Shonil A. Bhagwat, 2020-11-29 This volume provides an overview of key themes in Indigenous Environmental Knowledge (IEK) and anchors them with brief but well-grounded empirical case studies of relevance for each of these themes, drawn from bioculturally diverse areas around the world. It provides an incisive, cutting-edge overview of the conceptual and philosophical issues, while providing constructive examples of how IEK studies have been implemented to beneficial effect in ecological restoration, stewardship, and governance schemes. Collectively, the chapters in the Routledge Handbook of Indigenous Environmental Knowledge

cover Indigenous Knowledge not only in a wide range of cultures and livelihood contexts, but also in a wide range of environments, including drylands, savannah grassland, tropical forests, mountain landscapes, temperate and boreal forests, Pacific and Indian Ocean islands, and coastal environments. The chapters discuss the complexities and nuances of Indigenous cosmologies and ethno-metaphysics and the treatment and incorporation of IEK in local, national, and international environmental policies. Taken together, the chapters in this volume make a strong case for the potential of Indigenous Knowledge in addressing today's local and global environmental challenges, especially when approached from a perspective of appreciative inquiry, using cross-cultural methods and ethical, collaborative approaches which limit bias and inappropriate extraction of IEK. The book is a guide for graduate and advanced undergraduate teaching, and a key reference for academics in development studies, environmental studies, geography, anthropology, and beyond, as well as anyone with an interest in Indigenous Environmental Knowledge. Chapters 10 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

The State of World Fisheries and Aquaculture 2018 Food and Agriculture Organization of the United Nations, 2018-07-10
The 2018 edition of *The State of World Fisheries and Aquaculture* emphasizes the sector's role in achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, and measurement of progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and highlights the importance of rights-based governance for equitable and inclusive development. As in past editions, the publication begins with a global analysis of trends in fisheries and aquaculture production, stocks, processing and use, trade and consumption, based on the latest official statistics, along with a review of the status of the world's fishing fleets and human engagement and governance in the sector. Topics explored in Parts 2 to 4 include aquatic biodiversity; the ecosystem approach to fisheries and to aquaculture; climate change impacts and responses; the sector's contribution to food security and human nutrition; and issues related to international trade, consumer protection and sustainable value chains. Global developments in combating illegal, unreported and unregulated fishing, selected ocean pollution concerns and FAO's efforts to improve capture fishery data are also discussed. The issue concludes with the outlook for the sector, including projections to 2030. As always, *The State of World Fisheries and Aquaculture* aims to provide objective, reliable and up-to-date information to a wide audience, including policy-makers, managers, scientists, stakeholders and indeed all those interested in the fisheries and aquaculture sector.

Fish silage production and use in the Caribbean: Feasibility study for Barbados and Saint Kitts and Nevis Food and Agriculture Organization of the United Nations ,2020-09-01 It is estimated that per year in Barbados, 585 tonnes of fish waste are generated at the two main public fish markets, and 936 tonnes of waste are generated at private fish processors across the island. Therefore, Barbados produces an aggregate of 1 521 tonnes of fish waste annually. At present,

approximately 90 percent of fish waste and by-products are discarded at the landfill. To produce fish silage on a large scale in Barbados the baseline cost (based on a 90 percent yield rate) is estimated to be USD 265 920, excluding the cost of fish waste and acids. Sales revenues based on competitor prices range from USD 528 485 to USD 2 044 900. During the fish silage demonstration workshop held from 23 to 26 July 2019 in Bridgetown, the cost of small-scale production (100 kg) was estimated to be USD 900 and USD 254 when using the chemical and biological methods, respectively. The existing regulatory framework has the potential to facilitate the production and utilization of fish silage. However, clearance and permission may have to be institutionalized in order for fish silage to be produced and utilized in, and or as, animal feed. These conclusive findings subsequently prompted FAO to engage in a partnership with the Caribbean Agriculture Research and Development Institute (CARDI), to develop the silage-based feeds and document their effects on the growth performance of select animals.

Routledge Handbook of the South China Sea Zou Keyuan,2021-06-28 The Routledge Handbook of the South China Sea presents a comprehensive and in-depth analysis of South China Sea issues. It evaluates the dynamics of the latest developments and identifies factors that contribute to dispute settlement and a cooperative management regime of one of the most important seas in the world - one which not only contains rich marine resources and distinctive biodiversity but is also a critical sea route for global trade and communications. The Handbook is divided into six parts, each representing a focused area of enquiry: • History and geostrategic landscape • Sovereignty and maritime entitlements • South China Sea policies of major claimants • Natural resources and environment • Cooperation and institutions • Challenges and prospects Written by world-renowned experts and scholars, with specialisms from geography to international law, the volume's 25 chapters contribute interdisciplinary perspectives, reflecting the impact of how South China Sea policies are shaped by national governments and international organizations. As such, the Handbook provides an authoritative reference to South China Sea Studies, useful for students and scholars of international relations, history, maritime and Asian studies.

World Seas: An Environmental Evaluation Jean-Francois Hamel,2018-09-07 World Seas: An Environmental Evaluation, Second Edition, Volume Three: Ecological Issues and Environmental Impacts covers global issues relating to our seas, including a biological description of the coast and continental shelf waters, the development and use of the coast, landfills and their effects, pollutant discharges over time, the effects of over-fishing, and the management methods and techniques used to ensure continued ecosystem functioning. The relative importance of water-borne and airborne routes differ in different parts of the world is explored, along with extensive coverage of major habitats and species groups, governmental, education and legal issues, fisheries effects, remote sensing, climate change and management. This book is an invaluable, worldwide reference source for students and researchers concerned with marine environmental science, fisheries, oceanography and engineering and coastal zone development. - Provides scientific reviews of regional issues, empowering managers and policymakers to make progress in under-resourced countries and regions - Covers environmental

issues arising from the human use of both the sea and its watershed - Presents informed commentary on major trends, problems and successes, and recommendations for the future

Building Industries at Sea - 'Blue Growth' and the New Maritime Economy Kate Johnson,Ian Masters,Gordon Dalton,2022-09-01 Throughout the world there is evidence of mounting interest in marine resources and new maritime industries to create jobs, economic growth and to help in the provision of energy and food security. Expanding populations, insecurity of traditional sources of supply and the effects of climate change add urgency to a perceived need to address and overcome the serious challenges of working in the maritime environment. Four promising areas of activity for 'Blue Growth' have been identified at European Union policy level including Aquaculture; Renewable Energy (offshore wind, wave and tide); Seabed Mining; and Blue Biotechnology. Work has started to raise the technological and investment readiness levels (TRLs and IRLs) of these prospective industries drawing on the experience of established maritime industries such as Offshore Oil and Gas; Shipping; Fisheries and Tourism. An accord has to be struck between policy makers and regulators on the one hand, anxious to direct research and business incentives in effective and efficient directions, and developers, investors and businesses on the other, anxious to reduce the risks of such potentially profitable but innovative investments.The EU H2020 MARIBE (Marine Investment for the Blue Economy) funded project was designed to identify the key technical and non-technical challenges facing maritime industries and to place them into the social and economic context of the coastal and ocean economy. MARIBE went on to examine with companies, real projects for the combination of marine industry sectors into multi-use platforms (MUPs). The purpose of this book is to publish the detailed analysis of each prospective and established maritime business sector. Sector experts working to a common template explain what these industries are, how they work, their prospects to create wealth and employment, and where they currently stand in terms of innovation, trends and their lifecycle. The book goes on to describe progress with the changing regulatory and planning regimes in the European Sea Basins including the Caribbean where there are significant European interests. The book includes:• Experienced chapter authors from a truly multidisciplinary team of sector specialisms• First extensive study to compare and contrast traditional Blue Economy with Blue Growth• Complementary to EU and National policies for multi-use of maritime space

Impact and Management of Marine Biofouling Yigit Kemal Demirel,Eugene Georgiades,Marlene Lejars,Kelli Zargiel Hunsucker,2022-08-04

Coastal Environments in the West of Ireland John B. Roney,Mark Beekey,2022-11-16 This multi-authored study explores how the natural sciences and the humanities together can understand the connections between the natural environment, the built environment, and the cultural heritage of communities along the west coast of Ireland. Knowledge of the sea and marine life, and what they mean to humanity is dependent on both scientific study and local knowledge, which, in

turn, can lead to a greater commitment to sustainability. Until the 1950s, there was little government support for scientific research, nor an interest in helping fisheries beyond near shore catch. Irish fisheries remained small, underfunded, and had difficulty accessing international markets. However, as this book shows, Ireland's cultural heritage demonstrates a deep appreciation for the coastal environment and a sense of place. This is preserved in the Irish language, in poetry, story and music, and in the ways the Irish lived with an often-wild coastal topography.

Unravelling Supply Chain Networks of Fisheries in India Meenakshi Rajeev,Supriya Bhandarkar,2022-01-19 This book on the fisheries sector in India, through primary surveys as well as secondary literature, brings out various nuances of the sector and its trade opportunities, the complexities surrounding the supply chain of fish, as well as the evolution of its marketing channels. A distinctive feature of this book is that it carries out a comprehensive mapping of the fisheries supply chain, by taking into account both marine and freshwater fish. It identifies various players, especially traders who take part in the product flow, irrespective of the impact each of them has on the value provided to the end customer. While members of the supply chain include all individuals or organisations between whom interaction takes place, directly or indirectly from the point of production to consumption, this study also distinguishes between primary and peripheral members to make a complex network more manageable. Moreover, the book provides a comprehensive analysis of the emerging marketing channels- both organised and unorganised- in this highly perishable food segment. It provides important insights into the current scenario, focusing on the emergence of newer forms of marketing such as multinationals and e-retailing, while highlighting how traditional forms such as 'mom-and-pop' shops have continued to sustain, despite the challenges they face. The findings from India are also compared to global experiences of other fish producing and exporting countries such as Bangladesh, Indonesia, and Thailand to offer a comparison of the differences and similarities in the supply chains of various countries. The book provides important takeaways for researchers and PhD scholars working in the area of fisheries as well as supply chains. Since this book is based on field visits to different parts of the country it brings out the ground realities along with interesting insights and important policy implications for the sector, and should, therefore, appeal to policymakers as well.
