More Geometry Snacks Ed Southall,Vincent Pantaloni,2018 More Geometry Snacks, like its highly successful predecessor, is a mathematical puzzle book filled with geometrical figures and questions designed to challenge, confuse and ultimately enlighten enthusiasts of all ages. Each puzzle is carefully designed to draw out interesting phenomena and relationships between the areas and dimensions of various shapes. Furthermore, unlike most puzzle books, the authors offer multiple approaches to solutions so that once a puzzle is solved, there are further surprises, insights and challenges to be had. As a teaching tool, More Geometry Snacks enables teachers to promote deep thinking and debate over how to solve geometry puzzles. Each figure is simple, but often deceptively tricky to solve - allowing for great classroom discussions about ways in which to approach them. By offering numerous solution approaches, the book also acts as a tool to help encourage creativity and develop a variety of strategies to chip away at problems that often seem to have no obvious way in.

**Teaching Religious Education** Elaine McCreery,Sandra Palmer,Veronica Voiels,2008-05-21 Many trainee primary teachers are uncertain as to the place and purpose of RE in primary schools. This book is designed to alleviate such fears and

give trainees the security and confidence to teach RE effectively. Trainees are encouraged to recognise their own religious position and understand how they handle their own beliefs and commitments in the classroom. In addition, they will learn how to be sensitive to children's religious viewpoints, allowing children to share their beliefs in a secure and supportive environment. A range of strategies help readers to provide engaging and appropriate RE across the primary age phase.

**How to Multiply Your Baby's Intelligence** Glenn Doman, Janet Doman, 2014-01-08 Time and again, the work performed at The Institutes for the Achievement of Human Potential has demonstrated that children from birth to age six are capable of learning better and faster than older children. *How To Teach Your Baby To Read* shows just how easy it is to teach a young child to read, while *How To Teach Your Baby Math* presents the simple steps for teaching mathematics through the development of thinking and reasoning skills. Both books explain how to begin and expand each program, how to make and organize necessary materials, and how to more fully develop your child's reading and math potential. *How to Give Your Baby Encyclopedic Knowledge* shows how simple it is to develop a program that cultivates a young child's awareness and understanding of the arts, science, and nature—to recognize the insects in the garden, to learn about the countries of the world, to discover the beauty of a Van Gogh painting, and much more. *How To Multiply Your Baby's Intelligence* provides a comprehensive program for teaching your young child how to read, to understand mathematics, and to literally multiply his or her overall learning potential in preparation for a lifetime of success. The Gentle Revolution Series: The Institutes for the Achievement of Human Potential has been successfully serving children and teaching parents for five decades. Its goal has been to significantly improve the intellectual, physical, and social development of all children. The groundbreaking methods and techniques of The Institutes have set the standards in early childhood education. As a result, the books written by Glenn Doman, founder of this organization, have become the all-time best-selling parenting series in the United States and the world.

**Make It Stick** Peter C. Brown, Henry L. Roediger III, Mark A. McDaniel, 2014-04-14 To most of us, learning something the hard way implies wasted time and effort. Good teaching, we believe, should be creatively tailored to the different learning styles of students and should use strategies that make learning easier. *Make It Stick* turns fashionable ideas like these on their head. Drawing on recent discoveries in cognitive psychology and other disciplines, the authors offer concrete techniques for becoming more productive learners. Memory plays a central role in our ability to carry out complex cognitive tasks, such as applying knowledge to problems never before encountered and drawing inferences from facts already known. New insights into how memory is encoded, consolidated, and later retrieved have led to a better understanding of how we learn. Grappling with the impediments that make learning challenging leads both to more complex mastery and better

retention of what was learned. Many common study habits and practice routines turn out to be counterproductive. Underlining and highlighting, rereading, cramming, and single-minded repetition of new skills create the illusion of mastery, but gains fade quickly. More complex and durable learning come from self-testing, introducing certain difficulties in practice, waiting to re-study new material until a little forgetting has set in, and interleaving the practice of one skill or topic with another. Speaking most urgently to students, teachers, trainers, and athletes, *Make It Stick* will appeal to all those interested in the challenge of lifelong learning and self-improvement.

*Making Good Progress?* Daisy Christodoulou, 2017-02-09 *Making Good Progress?* is a research-informed examination of formative assessment practices that analyses the impact Assessment for Learning has had in our classrooms. *Making Good Progress?* outlines practical recommendations and support that Primary and Secondary teachers can follow in order to achieve the most effective classroom-based approach to ongoing assessment. Written by Daisy Christodoulou, Head of Assessment at Ark Academy, *Making Good Progress?* offers clear, up-to-date advice to help develop and extend best practice for any teacher assessing pupils in the wake of life beyond levels.
