The Italian Party Christina Lynch, 2018-03-20 This novel of love and espionage in 1950s Italy “plays like a confectionary Hollywood romance with some deeper notes reminiscent of John le Carré” (Publishers Weekly). Tuscany, 1956. Newlywed American couple Scottie and Michael have arrived in Tuscany with a lot of luggage and some heavy secrets. Scottie has no idea that her husband is a covert CIA operative. Michael has no idea that Scottie is pregnant with someone else’s child. When Scottie’s young Italian teacher disappears, her search for him leads her to some dark truths about herself, her marriage, and her country. Michael is dedicated to saving the world from communism. But he’s starting to realize he’s just a pawn in a much different game. Driven apart by lies, Michael and Scottie must find their way through a maze of history, memory, hate and love to a new kind of complicated truth. Half glamorous fun, half an examination of America’s role in the world, and filled with sun-dappled pasta lunches, prosecco, charming spies and horse racing, *The Italian Party* is “dashing, fun, sexy and witty—a fun read on multiple levels” (Historical Novel Society Magazine).

The Burgundian Code, 2010-11-24 Gives the reader a portrayal of the social institutions of a Germanic people far richer and more exhaustive than any other available source.—from the Foreword, by Edward Peters From the bloody clashes of the third and fourth centuries there emerged a society that was neither Roman nor Burgundian, but a compound of both. The Burgundian Code offers historians and anthropologists alike illuminating insights into a crucial period of contact between a developed and a tribal society.

The Compassionate Mind Approach to Recovering from Trauma Deborah Lee, Sophie James, 2012-07-19 Terrible events are very hard to deal with and those who go through a trauma often feel permanently changed by it. Grief, numbness, anger, anxiety and shame are all very common emotional reactions to traumatic incidents such as an accident or death of a loved one, and ongoing traumatic events such as domestic abuse. How we deal with the aftermath of trauma and our own

emotional response can determine how quickly we are able to 'move on' and get back to 'normality' once more. An integral part of the recovery process is not only recognising and accepting how our lives may have been changed but also learning to deal with feelings of shame - an extremely common reaction to trauma. 'Recovering from Trauma' uses the groundbreaking Compassion Focused Therapy to help the reader to not only develop a fuller understanding of how we react to trauma, but also to deal with any feelings of shame and start to overcome any trauma-related difficulties.

Introduction to Criminology Frank E. Hagan,Leah E. Daigle,2019-01-02 This is one of the best texts I have seen in a while...It makes the world of criminology less daunting and more relevant. —Allyson S. Maida, St. John's University *Introduction to Criminology*, Tenth Edition, is a comprehensive introduction to the study of criminology, focusing on the vital core areas of the field—theory, method, and criminal behavior. With more attention to crime typologies than most introductory texts, Hagan and Daigle investigate all forms of criminal activity, such as organized crime, white collar crime, political crime, and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. Origin and Evolution of the Universe Royal Society of Canada,Canadian Institute for Advanced Research,1987 Does the universe have the character it has because of design? In this collection of essays first presented at a symposium sponsored by the Canadian Institute for Advanced Research and the Royal Society of Canada, seventeen scientists and philosophers re-examine the Argument by Design in light of current scientific theories. Scientists in such diverse fields as cosmology, physics, geology, biology, and psychology provide syntheses of the state of their respective disciplines with

regard to questions such as the origin or evolution of the universe and of life, the interaction of life and terrestrial environment, and verbal communication in prehumans. Contributions by philosophers cover such areas as arguments for a designer and the question of whether nature's laws and initial conditions could be viewed as fine tuned for the production of life. Many of the chapters demonstrate the awe-inspiring success of modern science in explaining the universe in terms of fairly straightforward natural laws, countering those versions of the design argument which try to find evidence of God's activities in the supposed failures of scientific laws to cover various phenomena.
