SOCRATES Dr. Hoff Maarten,Alsaeed Abraheem,Dr. Carl Adams,Saurabh Chandra,Peter Asare-Nuamah,Darko Emmanuel Agyepong,Ojo Patrick,Dr. Nandita Kaushal,Dr. Inderjeet Singh Sodhi,Shreyasi Ghosh,Stuti Saxena,Dr. Wahengbam Jyotirmoy Singh,2016-12-02 Editorial We are living in an era of digitization thus moving towards a digital government. The use of ICT in public-administration is beneficial and it is not mere a coincidence that the top 10 countries in e-government implementation (according to UN E-Government Survey 2016) are flourishing democracies. There has been a sharp rise in the number of countries using e-government to provide public services online through one stop-platform. According to the 2016 survey, 90 countries now offer one or more single entry portal on public information or online services, or both and 148 countries provide at-least one form of online transaction services. More and more countries are making efforts through e-government to ensure and increase inclusiveness, effectiveness, accountability and transparency in their public institutions. Across the globe, data for public information and security is being opened up. The 2016 survey shows that 128 countries now provide data-sets on government spending in machine readable formats. E-government and innovation seems to have provided significant opportunities to transform public administration into an instrument of sustainable development. The governments around the globe are rapidly transforming. The use of information and communication technology in public administration - combined with organizational change and new skills- seems to be improving public services and democratic processes and strengthening support to public policies. There has been an increased effort to utilize advanced electronic and mobile services that benefits all. Fixed and wireless broadband subscriptions have increased unevenly across regions, with Europe leading, but Africa still lagging behind. We have to focus on these substantial region disparities and growing divide. All countries agreed, in SDG 9, that a major effort is required to ensure universal access to internet in the least developed countries. The rise of Social media and its easy access seems to have enabled an increasing number of countries moving towards participatory decision making, in which developed European countries are among the top 50 performers. But, the issues of diminishing collective thinking and rising Individual thinking are some rising issues that we will have to deal with in the future. There are more sensitive issues like the new

classification of citizens into literate-illiterate, e-literate and e-illiterate, that the governments need to look upon. It is a good sign that many developing countries are making good progress. Enhanced e-participation can support the realization of the SDGs by enabling more participatory decision making, but the success of e-government will ultimately depend upon our ability and capability to solve the contrasting issues raised due to this transition with sensitivity. In this issue of SOCRATES we have discussed, this new era of Digital Government. We have focused on what we have learned from the past and the future we want. From discussions on the role of e-governance within the local government settings in a modern democratic state to the experience of an academia with online examination, we have tried to include every possible aspect of e-government. Paper authored by Dr. Hoff Maarten, aims to outline the role of e-governance within the setting of a local government in a modern democratic state. It is agreed that a local governmental organization needs to be fit for the purpose of serving its citizens. Fits can be tested both through universally acknowledged principles, and drivers that suit modern on-demand organizations. Paper authored by Mr. Alsaeed Abraheem and Dr. Carl, proposes a conceptual framework which captures the main factors (both enablers and barriers) influence and contributes toward a successful implementation of eServices in countries that have unstable status. The paper draws upon Osborn and Gaebler's work, 'reinventing government', which identifies 10 principles of government transformation. This is used to examine eGov examples in the case of Syria along with previous work covering barriers and enablers to eGov activities within countries that have unstable status. The resulting derived conceptual framework provides a base to understand eGov activity for nations going through geopolitical uncertainty. Paper authored by Mr. Saurabh Chandra highlights the initiatives taken by the Governments in India at various levels to modernise their processes and functions for delivery of information and services to the citizens, using the Information and Communication technology [ICT]. It also highlights E-Government uptake in different parts of the world, highlighting its need in India, as in developing countries like India, there is no comprehensive data on actual e-government uptake on a global scale. Paper authored by Mr. Peter Asare-Nuamah and Mr. Darko Emmanuel Agyepong highlights the various legal policies and framework that support e-governance in Ghana as well as the challenges of implementing e-governance initiatives. The findings of the study indicate that several polices and frameworks support e-governance in Ghana but their implementations are burdened with social, cultural, political and legal constraints. The study provides some recommendations that are necessary to tackle the challenges of e-governance implementation. Paper authored by Mr. Ojo Patrick highlights battling sub-Saharan African countries. The perspective in this paper is that the emergence of democratic governments in this region occurred through lopsided process which impacts on their governance structures. Consequently, the institutionalization of liberal democracy has been omitted; the absence of which creates gaps between aspiration for and struggle by African people for democracy on the one hand, and the actual performance of democratic governments on the other hand. The paper identifies structural deficiencies in the current pattern of governance as the political missing link in

the value chain between democracy and development in the region. The paper recommends e-governance; an administrative process that guarantees good governance through accountability and transparency, as the necessary connecting link and panacea to bridging the observable existing gaps. Paper authored by Dr. Nandita Kaushal highlights the Plausibility of E-Governance as a Public Service Delivery Mechanism in India. It argues that there is no doubt, wherever e-governance projects have been conceived, designed and implemented with due regard to the needs of the people there positive outcomes have been visible. However, it has to be acknowledged that most of the projects are facing multiple challenges which are reducing their success rate. It recommends serious consideration to all the issues which are hampering their efficiency. At the same time it suggests measures that must be taken up to maintain the human face of these initiatives. Paper authored by Dr. Inderjeet Singh Sodhi reviews the achievements and progress of e-government in India. The paper briefly discusses various e-government projects in India. The purpose of the paper is to delve into policy and issue of the government of India in making e-government accessible to the common person. It briefly identifies the strategic issues for achievement of e-government. This paper derives a list of key strategic factors that are appropriate for planning, designing, development and implementation of e-government. The paper identifies the range of diverse problems, challenges and barriers planners and developers must face as they work in the e-government projects. The paper discusses prospects and future of e-government in India. The paper highlights the role of government to develop richer and deeper understanding of e-government. Paper authored by Ms. Shreyasi Ghosh attempts to trace the essence of e-government in the modern era of Indian Public Administration today as another new paradigm shift is in the offspring and slowly becoming distinct from the amorphous shape of Public Administration in the Indian context with the ICT-blessed governance, or e-Governance. Paper authored by Ms. Stuti Saxena probes the OGD platform using a qualitative and quantitative lens. This paper shows that OGD usage is popular among the end-users in terms of the number of views and downloads of the datasets. Future research might undertake the empirical investigation of the research hypotheses advanced in the paper. Paper authored by Dr. Jyotirmoy W. Singh is developed by a contributor who has been a national and International online examiner for past six or more years. This paper is based on his experience. It seeks to compare the traditional mode of examination with that of the online examination in citing the mode of High School Leaving Examination of Board of Secondary Education Manipur and International Baccalaureate Organisation (IBO) examination as case studies. I wish scholars and potential readers will find this issue useful. We will bring more special issues focused on e-government and other various dimensions of governance in the near future. Issue Editor Prof. Manoj Dixit Professor and Head, Department of Public Administration, University of Lucknow, Lucknow, India

E-Governance, A Global Journey M. Finger, F.N. Sultana, 2012-09-21 E-governance affects every citizen. New information and communication technologies (ICTs) have made public services easier to access and information easier to obtain; fines

and taxes can be processed more rapidly and votes can be counted faster. Channeling the potential of ICTs in the public sector has affected how states, and governments at all levels, do business. It will inevitably shape how they will continue to change in the future. This book has grown out of an executive training program, leading to an Executive Master's degree in e-governance, from Switzerland's École Polytechnique Fédérale de Lausanne (EPFL). Participants in this Master's program came from all over the world; from government, the private sector and non-governmental organizations. They were all interested in electronic governance and motivated by the desire to learn from the numerous and varied e-governance experiences worldwide. The 12 chapters have been written by 10 participants, one manager and one professor involved in the program. The book is divided into four sections: e-governance visions; local e-governance; transversal e-governance issues and the future of e-governance. E-governance has already led to many significant changes in the way society operates, and this book provides some insight into how this has been achieved, as well as taking a look at the further developments which may happen in the future.

From Government to E-Governance: Public Administration in the Digital Age Islam, Muhammad Muinul,Ehsan, Mohammad,2012-07-31 *From Government to E-Governance: Public Administration in the Digital Age* will aim to provide relevant theoretical frameworks, past experiences, and the latest empirical research findings in the area of public administration systems that existed in earlier civilizations, as well as e-governance-introduced modern times. Digital Governance Michael E. Milakovich, 2021-09-28 The application of digital information and communication technologies (ICTs) to reform governmental structures and public service is widely and perhaps naively viewed as the 21st century savior, the enlightened way to reinvigorate democracy, reduce costs, and improve the quality of public services. This book examines the transition from e-government to digital governance in light of the financial exigencies and political controversies facing many governments. The chapters concentrate on strategies for public sector organizational transformation and policies for improved and measurable government performance in the current contentious political environment. This fully updated second edition of *Digital Governance* provides strategies for public officials to apply advanced technologies, manage remote workforces, measure performance, and improve service delivery in current crisis-driven administrative and political environments. The full implementation of advanced digital governance requires fundamental changes in the relationship between citizens and their governments, using ICTs as catalysts for political as well as administrative communication. This entails attitudinal and behavioral changes, secure networks, and less dependence on formal bureaucratic structures (covered in Part I of this book); transformation of administrative, educational, and security systems to manage public services in a more citizen-centric way (covered in Part II); the integration of advanced digital technologies with remote broadband wireless internet services (Part III); and the creation of new forms of global interactive citizenship and self-governance (covered in Part IV). Author Michael E. Milakovich offers recommendations for further improvement and civic actions to stimulate important instruments of governance and public administration. This book is required reading for political science, public administration, and public policy courses, as well as federal, state, and local government officials.

Strategic Planning and Implementation of E-Governance P.K. Suri, Sushil, 2016-09-06 The book is based on practical experience gained during the planning and execution of e-governance projects in India coupled with extensive research based on six national/multi-state-level agriculture related projects. It assesses e-governance projects in terms of desired project outcomes and analyzes performance from the viewpoints of three key groups - planners, implementers and beneficiaries. It highlights six constructs: extent of planning, comprehensiveness of strategy formulation, effectiveness of strategy implementation, changing situation, stakeholder competence levels and flexibility of processes, which are applied to reveal shortfalls in the existing planning and implementation system for e-governance projects in India. It also identifies a set of significant strategic variables influencing performance based on three independent opinion surveys of stakeholders located across the country, and uses these variables as the basis of strategic gap analyses of some major ongoing agriculture related projects. Furthermore it presents lessons learned from cross-case quantitative and qualitative analyses in the form of a generalized strategic framework for improving performance. Offering an overview of major e-governance projects, it uses several illustrative examples to address the underlying issues and to support the study findings and recommendations. It also

presents a novel approach of building strategic alliances across related departments to achieve effective e-governance. The book will be of interest to the practitioners in government as well corporates who are engaged in planning and implementation of e-governance projects spanning across various layers of government. In Indian context, the learning issues are likely to trigger appropriate corrective measures for generating better value from the several flagship projects envisaged under the Digital India Programme. Further, it will interest the academic audience working on the strategic framework and constituting constructs. It will also benefit business students and application software architectures who aspire for a consulting career in the area of e-governance.

Digital Social Work Lauri Goldkind, Lea Wolf, Paul P. Freddolino, 2019 In a digitally powered society, social workers are frequently challenged to embrace new interventions and enhance existing strategies in order to effectively promote social justice. The cases in this volume present engaging examples of technology tools in use across micro, mezzo, and macro practice, thereby illuminating the knowledge, skills, and values required of those who practice social work 2.0.

The Routledge International Handbook of Public Administration and Digital Governance Sarah Giest, Ian Roberge, 2024-12-30 The Routledge Handbook of Public Administration and Digital Governance is a comprehensive, cutting-edge guide for students, scholars, practitioners of public policy, public administration and digital governance. The book demonstrates the diverse nature of digital government through a series of case studies from different regions across the globe, including Africa, the Americas, Asia and Europe. The book uses these cases to highlight various aspects and implications of the intersection of digital technologies and public administration. These include impact of practices and principles of public administration, the effects of particular technologies/tools and the relationship between state and citizen. The book also addresses barriers and enablers to the adoption of digital technology, with select chapters focusing on artificial intelligence (AI) in governmental contexts by leading practitioners and scholars. Rather than providing region-specific lessons, the cases identify common challenges, offering a more holistic understanding of public administration in the digital era. With contributions from both practitioners and scholars, this handbook will be a compelling resource for those researching, studying or working in public administration, public leadership, information systems, political science and other related fields.

E-Governance and Civic Engagement: Factors and Determinants of E-Democracy Manoharan, Aroon, 2011-10-31 This book examines how e-government facilitates online public reporting, two-way communication and debate, online citizen participation in decision-making, and citizen satisfaction with e-governance--Provided by publisher.

Human-Centered System Design for Electronic Governance Saeed, Saqib, Reddick, Christopher G., 2013-03-31 As e-government policies and procedures become widely practiced and implemented, it is apparent that the success of technology in e-government hangs on its consistency with human practices. Human-Centered System Design for Electronic

Governance provides special attention to the most successful practices for implementing e-government technologies. This highly regarded publication highlights the benefits of well designed systems in this field, while investigating the implications of poor practices and designs. This book is beneficial for academics, researchers, government officials, and graduate students interested and involved in design of information systems within the context of e-government.

Information Technology Governance in Public Organizations Lazar Rusu, Gianluigi Viscusi, 2017-07-18 This book examines trends and challenges in research on IT governance in public organizations, reporting innovative research and new insights in the theories, models and practices within the area. As we noticed, IT governance plays an important role in generating value from organization's IT investments. However there are different challenges for researchers in studying IT governance in public organizations due to the differences between political, administrative, and practices in these organizations. The first section of the book looks at Management issues, including an introduction to IT governance in public organizations; a systematic review of IT alignment research in public organizations; the role of middle managers in aligning strategy and IT in public service organizations; and an analysis of alignment and governance with regard to IT-related policy decisions. The second section examines Modelling, including a consideration of the challenges faced by public administration; a discussion of a framework for IT governance implementation suitable to improve alignment and communication between stakeholders of IT services; the design and implementation of IT architecture; and the adoption of enterprise architecture in public organizations. Finally, section three presents Case Studies, including IT governance in the context of e-government strategy implementation in the Caribbean; the relationship of IT organizational structure and IT governance performance in the IT department of a public research and education organization in a developing country; the relationship between organizational ambidexterity and IT governance through a study of the Swedish Tax Authorities; and the role of institutional logics in IT project activities and interactions in a large Swedish hospital.

E-Government and Websites Aron Manoharan, 2014-11-13 This book presents a citizen-centric perspective of the dual components of e-government and e-governance. E-government refers to the practice of online public reporting by government to citizens, and to service delivery via the Internet. E-governance represents the initiatives for citizens to participate and provide their opinion on government websites. This volume in the Public Solutions Handbook Series focuses on various e-government initiatives from the United States and abroad, and will help guide public service practitioners in their transformation to e-government. The book provides important recommendations and suggestions oriented towards practitioners, and makes a significant contribution to e-government by showcasing successful models and highlighting the lessons learned in the implementation processes. Chapter coverage includes: * Online fiscal transparency * Performance reporting * Improving citizen participation * Privacy issues in e-governance * Internet voting * E-government at the local level

E-Government Success around the World: Cases, Empirical Studies, and Practical Recommendations Gil-Garcia, J. Ramon, 2013-06-30 While some e-government projects fail to deliver the expected benefits due to numerous technical, organizational, institutional, and contextual factors, information technology continues to be utilized by international governments to achieve countless benefits. *E-Government Success around the World: Cases, Empirical Studies, and Practical Recommendations* presents the latest findings in the area of e-government success. Written for academics and professionals, this book aims to improve the understanding of e-government success factors and cultural contexts in the field of governmental information technologies in various disciplines such as political science, public administration, information and communication sciences, and sociology.

Decolonization of e-Government Research and Practice Kelvin J. Bwalya, 2018-12-01 With the rapid increase in the implementation of e-Government in Africa and across the world, the need to investigate the key bottlenecks (issues) caused by the failure of a large number of e-Government projects cannot be ignored. The main purpose of this book is to contribute to the current scholarly and intellectual discourse on different aspects of e-Government such as understanding the critical issues in design, implementation and monitoring. This book specifically intends to bring out contextual issues that hugely impact on the probability for e-Government failure or success. It also differentiates itself by carefully exploring the issue of context-awareness (informed by the local context) for e-Government design and implementation, which has not been pursued in any publication in e-Government before, although it has been used in other information computational contexts. Therefore, the many theses within this book are concerned with e-Government design approaches, implementation policies and requirements, and monitoring dimensions need to be informed by the contextual characteristics in which they are implemented. This book contributes to the body of knowledge by presenting an in-depth analysis of a case of e-Government implementation. Therefore, this book has its facts backed by intermittent reference to an empirical study done in Zambia to accentuate issues in design, adoption, usage and monitoring of e-Government projects. The case articulates the methodological issues in the design and measurement of e-Government. The use of a combination of structural equation modelling (SEM), exploratory factor analysis (EFA) and advanced techniques such as principal component analysis (PCA) in investigating different aspects of e-Government in a developing country context has not been done in any previous research. The novel methodological nuances articulated in this book can go a long way toward understanding the factors explaining successful implementation of e-Government. Previous publications have used basic statistical approaches devoid of adequate scientific or statistical rigour such as descriptive statistics to arrive at factors influencing the success or failure of e-Government. Furthermore, this book contributes to the body of knowledge by emphasising the different dimensions and issues of the multidimensional perspectives of e-Government. The book explores tangible pointers for design and implementation of e-Government, giving it the thrust to potentially guide actual implementation of e-Government in African

setups.

Electronic Government Marijn Janssen, Karin Axelsson, Olivier Glassey, Bram Klievink, Robert Krimmer, Ida Lindgren, Peter Parycek, Hans J. Scholl, Dmitrii Trutnev, 2017-08-02 This book constitutes the proceedings of the 16th IFIP WG 8.5 International Conference on Electronic Government, EGOV 2017, held in St. Petersburg, Russia, in September 2017, in conjunction with the 9th International Conference on eParticipation, ePart 2017. The 34 revised full papers presented were carefully reviewed and selected from 74 submissions. The papers are clustered under the following topical sections: Smart Governance, Government and Cities; Service delivery; Organizational aspects; Infrastructures; Big and Open Linked Data; Open Government; and Evaluation.

E-Government Strategy, ICT and Innovation for Citizen Engagement Dennis Anderson, Robert Wu, June-Suh Cho, Katja Schroeder, 2015-12-28 This book discusses three levels of e-government and national strategies to reach a citizen-centric participatory e-government, and examines how disruptive technologies help shape the future of e-government. The authors examine how e-government can facilitate a symbiotic relationship between the government and its citizens. ICTs aid this relationship and promote transparencies so that citizens can place greater trust in the activities of their government. If a government can manage resources more effectively by better understanding the needs of its citizens, it can create a sustainable environment for citizens. Having a national strategy on ICT in government and e-government can significantly reduce government waste, corruption, and inefficiency. Businesses, CIOs and CTOs in the public sector interested in meeting sustainability requirements will find this book useful.

Transforming Politics and Policy in the Digital Age Bishop, Jonathan, 2014-04-30 Digital technology and the Internet have greatly affected the political realm in recent years, allowing citizens greater input and interaction in government processes. The mainstream media no longer holds all the power in political commentary. Transforming Politics and Policy in the Digital Age provides an updated assessment of the implications of technology for society and the realm of politics. The book covers issues presented by the technological changes on policy making and offers a wide array of perspectives. This publication will appeal to researchers, politicians, policy analysts, and academics working in e-government and politics.

The New Technocracy Anders Esmark, 2020-04-08 Setting a new benchmark for studies of technocracy, this book shows that a solution to the challenge of populism will depend as much on a technocratic retreat as democratic innovation. Esmark examines the development since the 1980s of a new 'post-industrial' technocratic regime and its complicity in the populist backlash against politics and political elites that is visible today. The new technocracy - a combination of network governance, risk management and performance management - has, the author argues, abandoned the overtly anti-democratic sentiments of its industrial predecessor and proclaimed a new partnership with democracy. The rise of populism, however, is a clear sign that the inherent problems of this partnership have been exposed and that technocracy posing as

democracy will only serve to exacerbate existing problems.

Towards a Sustainable Information Society Ewa Ziemba, 2016-01-14 This book represents an important voice in the scientific discourse on what constitutes a sustainable information society, and provides a new comprehensive and forward-looking approach to such a development. This approach is based on the adoption of information and communication technologies (ICTs) by the main stakeholders of society, including individuals, enterprises, and public administration, who should use ICTs in order to build the welfare of present and future generations, ensure economic growth and socio-cultural development, increase participation in public life, permit personal development, and build the wisdom of society. As such, the book mainly focuses on the role ICTs play in transforming business, public administration and everyday life in the context of the sustainable information society. This volume will appeal to both researchers and practitioners, as it provides significant areas and directions for research on the sustainable information society, and suggests important issues for programming, building and adopting such a society. The book will allow the reader to answer such critical contemporary questions as 'What is the sustainable information society and what role is played by ICTs in this society?'; 'What are the challenges and tasks of people, enterprises, and public administration that lead towards the sustainable information society?'; 'How can ICTs support people, enterprises, and public administration in programming, building and adopting such a society?'; 'What are the factors affecting ICT adoption by people, enterprises, and public administration in this context?'; 'What are the areas that should require a primary focus in order to achieve the most satisfying results of ICT adoption by people, enterprises, and public administration?'; and 'How can ICT adoption by people, enterprises, and public administration be measured here?'

Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a The Evolution And Continuing Challenges Of E Governance Pdf PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a The Evolution And Continuing Challenges Of E Governance Pdf PDF?** Most PDF

editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing

restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
