Car Guys vs. Bean Counters Bob Lutz,2011-06-09 A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the waste and personality worship of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

Global Capital Supply and Demand Zia Qureshi,1996-01-01 Annotation This report examines the possibility that global demand for capital will tend to outstrip supply, thus putting upward pressure on global real interest rates. The paper discusses the demand for foreign capital in developing countries, the effect of this demand on savings in industrial countries, and net capital flows from industrial to developing countries. The analysis of trends over the next 10 to 15 years suggests that a large rise in international real interest rates is unlikely as long as fiscal consolidation in industrial countries remains on track.
