Format and Content of the Safety Analysis Report for Nuclear Power Plants International Atomic Energy Agency, 2004 This Safety Guide is intended primarily for use with land based stationary thermal nuclear power plants but it may, in parts, have a wider applicability to other nuclear facilities. It provides recommendations and guidance on the possible format and content of a SAR in support of a request to the State regulatory body for authorization to construct and or operate a nuclear power plant. As such, it contains recommendations on meeting the requirements of Safety guide GS-R-1 Legal and governmental infrastructure for nuclear, radioactive waste and transport safety (2000, ISBN 9201008007)

The EIB Circular Economy Guide European Investment Bank,2020-05-25 The EIB Circular Economy Guide aims to promote a common understanding of circular economy, and raise awareness about and promote circular solutions. The Guide provides information about EIB's lending and advisory activities in this field, and communicates our vision of how the EIB can further support the transition to a circular economy. The Guide is a living document that will be updated in response to our evolving understanding of circular economy needs, opportunities and risks, and growing experience with the appraisal and financing of circular economy projects.

Deception Adrian Levy,Catherine Scott-Clark,2010-08-10 The shocking, three-decade story of A. Q. Khan and Pakistan's nuclear program, and the complicity of the United States in the spread of nuclear weaponry. On December 15, 1975, A. Q. Khan-a young Pakistani scientist working in Holland-stole top-secret blueprints for a revolutionary new process to arm a nuclear bomb. His original intention, and that of his government, was purely patriotic-to provide Pakistan a counter to India's recently unveiled nuclear device. However, as Adrian Levy and Catherine Scott-Clark chillingly relate in their masterful investigation of Khan's career over the past thirty years, over time that limited ambition mushroomed into the world's largest clandestine network engaged in selling nuclear secrets-a mercenary and illicit program managed by the Pakistani military and made possible, in large part, by aid money from the United States, Saudi Arabia, and Libya, and by indiscriminate assistance from China. Based on hundreds of interviews in the United States, Pakistan, India, Israel, Europe, and Southeast Asia, *Deception* is a masterwork of reportage and dramatic storytelling by two of the world's most resourceful investigative journalists. Urgently important, it should stimulate debate and command a reexamination of our national priorities.

Screening Donated Blood for Transfusion-transmissible Infections World Health Organization,2010 Blood transfusion is a life-saving intervention that has an essential role in patient management within health care systems. All Member States of

the World Health Organization (WHO) endorsed World Health Assembly resolutions WHA28.72 (1) in 1975 and WHA58.13 (2) in 2005. These commit them to the provision of adequate supplies of safe blood and blood products that are accessible to all patients who require transfusion either to save their lives or promote their continuing or improving health. --Preface.

The Government of Science Harvey Brooks, 1987-05-01 This is an edited collection of papers written between 1960 and 1967 and dealing with various aspects of science and government, with special attention to policies for the support of research. Most of the papers have previously been published. They deal with a wide range of issues including the following: a review and analysis of the arguments for and against a department of science, an analysis of arguments and criteria for federal support of research in universities and in other research institutions, the role and promise of new technology in meeting educational needs of the future, the role of national science policy in maximizing technology transfer and spurring innovation in the economy, the function of basic research supported by mission-oriented agencies of the federal government, the arguments for and against allocating research resources in terms of specific technology areas such as space and atomic energy instead of in terms of particular social purposes such as health, defense, or food production, the penetration of ideas and styles of thought derived from natural science into the general culture. The book is designed for the general reader, and is intended to outline the thinking of the author about various aspects of what has come to be known as science policy, i.e., the national allocation of scientific and technical resources and the relation between science and other public purposes. While the book does not provide any systematic development or closely knit theoretical structure for scientific policy, it does develop a consistent pattern of thought which is based on considerable practical experience of the author in advising federal agencies on scientific policy and in the actual operations of the various institutions of science inside and outside the government. The papers mostly stress the importance of flexibility and multiple and partially competing centers of decision about science. They point out that the unique strength of the American scientific establishment stems from the fact that science is not isolated from the other functions of government but is closely coupled into all the major missions.

Occupational Radiation Protection International Atomic Energy Agency, 1999 The present Safety Guide provides general

guidance on the establishment of an effective radiation protection programme for occupational exposure, appropriate for the sources of radiation likely to be encountered in a range of industries, medical institutions, educational and research establishments and nuclear fuel cycle facilities. The report further provides the necessary guidance to meet the requirements as laid down in Safety Series No. 115, International Basic Safety Standards for Protection against Ionizing Radiation and for the Safety of Radiation Sources (1996).

Arrangements for the Termination of a Nuclear Or Radiological Emergency International Atomic Energy Agency, 2018 This publication provides guidance and recommendations on arrangements to be made at the preparedness stage, as part of overall emergency preparedness, for the termination of a nuclear or radiological emergency and the subsequent transition from the emergency exposure situation to either a planned exposure situation or an existing exposure situation. It elaborates the prerequisites that need to be fulfilled so that responsible authorities can declare the nuclear or radiological emergency ended and it gives detailed guidance on adapting and lifting protective actions. This publication, jointly sponsored by 10 international organizations (FAO, IAEA, ICAO, ILO, IMO, INTERPOL, OECD/NEA, UN OCHA, WHO and WMO) is intended to assist Member States in the application of IAEA Safety Standards Series Nos GSR Part 3 and GSR Part 7.
