Pete Sharma,Barney Barrett

The Cambridge Guide to Blended Learning for Language Teaching Michael McCarthy,2015-02-18 A volume concerned with best practice in blended learning for language teaching. The Cambridge Guide to Blended Learning for Language Teaching makes the case that it is pedagogy, rather than technology, that should underpin the design of blended learning programmes. The book is organised into five sections: Connecting Theories and Blended Learning; Implications for Teaching; Rethinking Learner Interaction; Case Studies; The Future of Blended Learning. With its research-informed and practitioner-focused approach, this book is ideal for language teachers and language centre managers looking to broaden their understanding of pedagogy and blended learning. It will also be of interest to anyone working on blended learning course design or delivering teacher training courses.

Creating Effective Blended Language Learning Courses Daria Mizza,Fernando Rubio,2020-10 Using an innovative framework, this book provides the rationale, strategies, and tools to create optimal blended language learning courses.

Using Technology in Foreign Language Teaching Rahma Al-Mahrooqi,Salah Troudi,2014-10-17 Language learning is a complex and challenging endeavor. For students to achieve the desired proficiency in English as a Foreign Language (EFL) their institutions need to invest time, effort and huge resources in order to cater for different learning styles. To be cost effective, many language-teaching institutions strive to provide intensive foreign language (FL) instruction to reduce the time period needed to learn the target language. This explains the current interest in combining differe...

The Handbook of Technology and Second Language Teaching and Learning Carol A. Chapelle,Shannon Sauro,2019-12-05 The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in

language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.

Blended Learning Pete Sharma, Barney Barrett, 2007 The ideal companion for any teacher interested in the use of technology in the language classroom, Blended Learning provides a practical overview of the technology currently available. It combines basic information for the technological novice with sophisticated ideas for using technology in the classroom. Teachers are offered practical ideas and suggestions for ways to use technology to enhance and support students' learning. The authors also examine the implications of the use of technology for language teaching methodology in general.

Blended Learning: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-08-18 Traditional classroom learning environments are quickly becoming a thing of the past as research continues to support the integration of learning outside of a structured school environment. Blended learning, in particular, offers the best of both worlds, combining classroom learning with mobile and web-based learning environments. *Blended Learning: Concepts, Methodologies, Tools, and Applications* explores emerging trends, case studies, and digital tools for hybrid learning in modern educational settings. Focusing on the latest technological innovations as well as effective pedagogical practice, this critical multi-volume set is a comprehensive resource for instructional designers, educators, administrators, and graduate-level students in the field of education.

The Design and Implementation of Blended Language Courses in Tertiary Education Sylvia Maciaszczyk, 2019-05-15 The book proposes a comprehensive framework for blended language course design. It builds extensively on existing literature on the subject and draws from empirical research presented therein. The framework will be of help for blended language course authors and designers, as well as publishers, heads of studies, teacher trainers, decision makers at all levels and also language teachers.

Sustainability of Blended Language Learning Programs Cynthia Nicholas Palikat, Paul Gruba, 2021-11-23 This book focuses on the investigation of the sustainability of technology integration in the context of language programs and is based on an 18-month longitudinal study of a blended EAP (English for Academic Purposes) language program situated within a university pathways course. The integration of technology into language teaching and learning in academic English programs often demands substantial investment in professional development, curriculum change, and technological resources. Given the intense effort required, sustainability of such efforts has gained importance, focus, and urgency. Situated in the context of English for Academic Purposes (EAP) programs, this book frames, and investigates, the sustainability of technology integration through a series of case studies of specific technologies: tablet devices, a Learning Management System, and an interactive presentation app. The authors explore sustainable integration of technology; the use of argument-based approaches as a basis for research design; and participant ethnography as a form of data collection. The book concludes by looking at the implications of the research and proposes that change management concepts be applied to better introduce, implement, and most importantly, sustain change involving educational technology integration. The content will be of interest

to scholars in TESOL and applied linguistics as well as professional language educators who will benefit from insights into sustaining technology integration in their programs.

Contemporary Perspectives in E-Learning Research Gráinne Conole, Martin Oliver, 2006-11-22 E-learning is at an exciting point in its development; its potential in terms of research is great and its impact on institutional practices is fully recognised. This book defines e-learning as a field of research, highlighting the complex issues, activities and tensions that characterise the area. Written by a team of experienced researchers and commented upon by internationally recognised experts, this book engages researchers and practitioners in critical discussion and debate about the findings emerging from the field and the associated impact on practice. Key topics examined include: access and inclusion the social-cultural contexts of e-learning organisational structures, processes and identities technical aspects of learning research – using tools and resources approaches to learning and teaching practices and associated learning theories designing for e-learning and the management of educational resources professional roles and identities the evolution of e-assessment collaboration, motivation and educational evaluation. Contemporary Perspectives in E-Learning Research provides a synthesis of research, giving readers a grounding in contemporary e-learning scholarship whilst identifying the debates that make it such a lively and fast-moving area. A landmark text in an evolving field, this book will prove invaluable for all researchers, practitioners, policy makers and students who engage with e-learning.

The Impact of Information on Modern Humans Elena G. Popkova, 2018-03-06 This book features contributions from various spheres of socio-humanitarian sciences presented at the scientific and practical conference on “Humans as an Object of Study by Modern Science,” which took place in Nizhny Novgorod (Russian Federation) on November 23–24, 2017. The conference was organized by Kozma Minin Nizhny Novgorod State Pedagogical University and the non-profit organization “Institute of Scientific Communications.” Presenting the results of multidisciplinary studies as well as new approaches, the target audience of the book includes postgraduates, lecturers at higher educational establishments, and researchers studying socio-humanitarian sciences. The complex study of humans by representatives of various socio-humanitarian sciences (philosophy, pedagogics, jurisprudence, social sciences, and economics) allows a comprehensive concept of the field to be developed. Selecting humans as an object of research opens wide possibilities for studying various issues related to their activities, while considering humans within multiple sciences means that the methods of induction and deduction can be combined to achieve precise results. This book includes the results of leading scientific studies on the following key issues: establishment of an information economy under the influence of scientific and technical progress: new challenges and opportunities; information and communication technologies as a new vector of development of the modern world economy; specifics and experience of using new information and communication technologies in developed and developing countries; problems of implementing new information and communication technologies in the modern economy; and priorities of using

new information and communication technologies in the modern economy.

This powerful book: • examines the reality of design in practice • shares tools and resources to guide practice • analyses design within complex systems • discusses the influence of open resources on design • includes design principles for mobile learning • explores practitioner development in course teams • presents scenarios for design for learning in an uncertain future Illustrated by case studies from across disciplines and supported by a helpful appendix of tools and resources for researchers, practitioners and teachers, the second edition of Rethinking Pedagogy for a Digital Age is an essential guide to designing for 21st Century learning.

Teach a Foreign Language Through Blended Learning Kévin TEMBOURET, Language courses are traditionally offered through classroom courses or only at a distance. Blended Learning offers a balanced mix of language training: part of the classroom courses and part using the computer tools available. Hybrid learning increases the success rate and communication within a group. It empowers learners who are no longer limited to discovering a language only through a teacher. Learning is done by the teacher and the learner. Through this method, teach a language in a methodical, fun and didactic way. With this book, set yourself the objective of offering a pedagogy geared towards the success of an entire group, united in learning. Once you have reached your goal, encourage this same group to communicate with each other. Or even to discover the culture of the language learned in a group.
