Peter Kivisto, Thomas Faist

Habits of the Heart, 1989 Bellah led a team of sociologists in interviewing some 200 Americans on love, work, success and values. Blending interviews with historical analysis, they explore what habits of the heart move Americans, and what beliefs and practices shape their character and social order. They examine the traditions Americans use to make sense of themselves and their society and show that while individualism creates self-reliant heroes, it also destroys the fabric of community and the capacity for commitment to one another. Most of the people interviewed--wives and husbands, managers, psychotherapists, local businessmen and civic activists--are split between a public world of competitive striving and a private world supposed to provide the meaning and love that make the competitive jungle bearable. Varieties of Civil Religion Robert N. Bellah, Phillip E. Hammond, 2013-11-01 In 1980, Varieties of Civil Religion was the latest statement in the field of civil religion pioneered by Robert Bellah. Over thirty years later, scholarly interest in the field continues to grow. By examining the force of religion in politics and society, this book offers a comparative treatment that deepens the understanding of American civil religion and provides a lens for exploring civil religion in other societies, particularly those of Italy, Mexico, and Japan. Bellah and Hammond trace the historical development of the peculiarly American brand of civil religion as they unravel its sometimes baffling intricacies. Themes include the conviction that America is a chosen country and American power in the world is identical with divine will. The book also examines the vigorous counterbalance that has opposed unjust wars or demanded racial and social justice. Altogether, the health of a civil religion may be a prime indication of the overall health of any society. The authors state that when civil religious symbols are co-opted by ultraconservatives, and the philosophy of liberalism seems less adequate as a guide for public or private lives, a revival of public philosophy is urgently needed. Varieties of Civil Religion supports such a revival by making the religious aspect of our central tradition understandable in a nonreactionary way. It also reaffirms that American civil religion, with its deeper tradition of openness, tolerance, and ethical commitment, can make an essential contribution to a global order of civility and justice.

The Robert Bellah Reader Robert N. Bellah, 2006-10-09 Perhaps best known for his coauthored bestselling books

Habits of the Heart and The Good Society, Robert N. Bellah is a truly visionary leader in the social study of religion. For more than four decades, he has examined the role of religion in modern and premodern societies, attempting to discern how religious meaning is formed and how it shapes ethical and political practices. The Robert Bellah Reader brings together twenty-eight of Bellah's seminal essays. While the essays span a period of more than forty years, nearly half of them were written in the past decade, many in the past few years. The Reader is organized around four central concerns. It seeks to place modernity in theoretical and historical perspective, drawing from major figures in social science, historical and contemporary, from Aristotle and Rousseau through Durkheim and Weber to Habermas and Mary Douglas. It takes the United States to be in some respects the type-case of modernity and in others the most atypical of modern societies, analyzing its common faith in individual freedom and democratic self-government, and its persistent paradoxes of inequality, exclusion, and empire. The Reader is also concerned to test the axiomatic modern assumption that rational cognition and moral evaluation, fact and value, are absolutely divided, arguing instead that they overlap and interact much more than conventional wisdom in the university today usually admits. Finally, it criticizes modernity's affirmation that faith and knowledge stand even more utterly at odds, arguing instead that their overlap and interaction, obvious in every premodern society, animate the modern world as well. Through such critical and constructive inquiry this Reader probes many of our deepest social and cultural quandaries, quandaries that put modernity itself, with all its immense achievements, at mortal risk. Through the practical self-understanding such inquiry spurs, Bellah shows how we may share responsibility for the world we have made and seek to heal it.

Going Solo Eric Klinenberg, 2012-02-02 With eye-opening statistics, original data, and vivid portraits of people who live alone, renowned sociologist Eric Klinenberg upends conventional wisdom to deliver the definitive take on how the rise of going solo is transforming the American experience. Klinenberg shows that most single dwellers—whether in their twenties or eighties—are deeply engaged in social and civic life. There's even evidence that people who live alone enjoy better mental health and have more environmentally sustainable lifestyles. Drawing on more than three hundred in-depth interviews, Klinenberg presents a revelatory examination of the most significant demographic shift since the baby boom and offers surprising insights on the benefits of this epochal change.

Religion in Human Evolution Robert N. Bellah, 2017-05-08 A New York Times Book Review Editors' Choice An ABC Australia Best Book on Religion and Ethics of the Year Distinguished Book Award, Sociology of Religion Section of the American Sociological Association Religion in Human Evolution is a work of extraordinary ambition—a wide-ranging, nuanced probing of our biological past to discover the kinds of lives that human beings have most often imagined were worth living. It offers what is frequently seen as a forbidden theory of the origin of religion that goes deep into evolution, especially but not exclusively cultural evolution. “Of Bellah's brilliance there can be no doubt. The sheer amount this man knows about

religion is otherworldly...Bellah stands in the tradition of such stalwarts of the sociological imagination as Emile Durkheim and Max Weber. Only one word is appropriate to characterize this book's subject as well as its substance, and that is 'magisterial.'" —Alan Wolfe, New York Times Book Review "Religion in Human Evolution is a magnum opus founded on careful research and immersed in the 'reflective judgment' of one of our best thinkers and writers." —Richard L. Wood, Commonweal

China's Catholics Richard Madsen,2023-12-22 After suffering isolation and persecution during the Maoist era, the Catholic Church in China has reemerged with astonishing vitality in recent years. Richard Madsen focuses on this revival and relates it to the larger issue of the changing structure of Chinese society, particularly to its implications for the development of a civil society. Madsen knows China well and has spent extensive time there interviewing Chinese Catholics both young and old, the true believers and the less devout. Their stories reveal the tensions that have arisen even as political control over everyday life in China has loosened. Of particular interest are the rural-urban split in the church, the question of church authority, and the divisions between public and underground practices of church followers. All kinds of religious groups have revived and flourished in the post-Mao era. Protestants, Buddhists, Daoists, practitioners of folk religions, even intellectuals seeking more secularized answers to ultimate concerns are engaged in spiritual quests. Madsen is interested in determining if such quests contain the resources for constructing a more humane political order in China. Will religion contribute to or impede economic modernization? What role will the church play in the pluralization of society? The questions he raises in China's Catholics are important not only for China's political future but for all countries in transition from political totalitarianism. After suffering isolation and persecution during the Maoist era, the Catholic Church in China has reemerged with astonishing vitality in recent years. Richard Madsen focuses on this revival and relates it to the larger issue of the changing structure of C

Citizenship Peter Kivisto,Thomas Faist,2015-08-12 A significant addition to the growing body of literature on citizenship, this wide-ranging overview focuses on the importance, and changing nature, of citizenship. It introduces the varied discourses and theories that have arisen in recent years, and looks toward future scholarship in the field. Offers an analytical assessment of the various thematic discourses and provides guidance in pulling together those discrete themes into a larger, more comprehensive framework Identifies the four broadly conceived themes that shape the many discourses on contemporary citizenship - inclusion, erosion, withdrawal, and expansion Includes a thorough introduction to the subject

Everyday Conceptions of Emotion J.A. Russell,José-Miguel Fernández-Dols,Anthony S.R. Manstead,Jane C. Wellenkamp,2013-06-29 In Everyday Conceptions of Emotion, prominent anthropologists, linguists and psychologists come together for the first time to discuss how emotions are conceptualised by people of different cultures and ages, speaking different languages. Anger, fear, jealousy and emotion itself are concepts that are bound up with the English language,

embedded in a way of thinking, acting and speaking. At the same time, the metaphors underlying such concepts are often similar across languages, and children of different cultures follow common developmental pathways. The book thus discusses the interplay of social and cultural factors that humans share in their development of an understanding of the affective side of their lives. For researchers interested in emotion, development of concepts and language, cultural and linguistic influences on psychological processes.

Why Love Hurts Eva Illouz, 2013-05-20 Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

Tokugawa Religion Robert N. Bellah, 2008-06-30 Robert N. Bellah's classic study, *Tokugawa Religion* does for Japan what Max Weber's *The Protestant Ethic and the Spirit of Capitalism* did for the West. One of the foremost authorities on Japanese history and culture, Bellah explains how religion in the Tokugawa period (160-1868) established the foundation for Japan's modern industrial economy and dispels two misconceptions about Japanese modernization: that it began with Admiral Perry's arrival in 1868, and that it rapidly developed because of the superb Japanese ability for imitation. In this revealing work, Bellah shows how the native doctrines of Buddhism, Confucianism and Shinto encouraged forms of logic and understanding necessary for economic development. Japan's current status as an economic superpower and industrial model for many in the West makes this groundbreaking volume even more important today than when it was first published in 1957. With a new

introduction by the author.

The EU-Russia Borderland Heikki Eskelinen, Ilkka Liikanen, James W. Scott, 2013-05-20 After the collapse of the Soviet Union, there were high hopes of Russia's modernisation and rapid political and economic integration with the EU. But now, given its own policies of national development, Russia appears to have 'limits to integration'. Today, much European political discourse again evokes East/West civilisational divides and antagonistic geopolitical interests in EU-Russia relations. This book provides a carefully researched and timely analysis of this complex relationship and examines whether this turn in public debate corresponds to local-level experience - particularly in border areas where the European Union and Russian Federation meet. This multidisciplinary book - covering geopolitics, international relations, political economy and human geography - argues that the concept 'limits to integration' has its roots in geopolitical reasoning; it examines how Russian regional actors have adapted to the challenges of simultaneous internal and external integration, and what kind of strategies they have developed in order to meet the pressures coming across the border and from the federal centre. It analyses the reconstitution of Northwest Russia as an economic, social and political space, and the role cross-border interaction has had in this process. The book illustrates how a comparative regional perspective offers insights into the EU-Russia relationship: even if geopolitics sets certain constraints to co-operation, and market processes have led to conflict in cross-border interaction, several actors have been able to take initiative and create space for increasing cross-border integration in the conditions of Russia's internal reconstitution.

Civil Society, Education and Human Formation Janis T. Ozolins, 2017-04-07 Education has been widely criticised as being too narrowly focused on skills, capacities and the transference of knowledge that can be used in the workplace. As a result of the dominance of economic rationalism and neo-liberalism, it has become commodified and marketed to potential customers. As a consequence, students have become consumers of an educational product and education has become an industry. This volume draws together a number of different perspectives on what is meant by 'human formation', argues that for a much richer conception of education, and addresses the lack of attention to human fulfilment.

Battleground: Religion Daniel L. Smith-Christopher, 2008-12-30 Is there a controversial issue in the contemporary world that does not involve religion? Whether it's a debate over the beginning of life, or on sexuality and family life, or on the stewardship of humans over the environment, almost all of the most contentious matters that impact today's society involve people's deeply held religious beliefs. *Battleground: Religion* helps clarify these complex topics by examining how various religious beliefs and practices impact current political, social, and cultural debates. Each of the approximately 100 entries examines a hot-button issue—from war and peace to the culture wars—and discusses, in a balanced and objective way, the points of view on these topics from all parts of the religious spectrum. Students will come away from *Battleground: Religion* with a better understanding of the issues that they will be encountering for years to come. Each entry includes a bibliography

or resources for further information.

Shutting Out the Sun Michael Zielenziger, 2009-05-06 The world's second-wealthiest country, Japan once seemed poised to overtake America. But its failure to recover from the economic collapse of the early 1990s was unprecedented, and today it confronts an array of disturbing social trends. Japan has the highest suicide rate and lowest birthrate of all industrialized countries, and a rising incidence of untreated cases of depression. Equally as troubling are the more than one million young men who shut themselves in their rooms, withdrawing from society, and the growing numbers of "parasite singles," the name given to single women who refuse to leave home, marry, or bear children. In *Shutting Out the Sun*, Michael Zielenziger argues that Japan's rigid, tradition-steeped society, its aversion to change, and its distrust of individuality and the expression of self are stifling economic revival, political reform, and social evolution. Giving a human face to the country's malaise, Zielenziger explains how these constraints have driven intelligent, creative young men to become modern-day hermits. At the same time, young women, better educated than their mothers and earning high salaries, are rejecting the traditional path to marriage and motherhood, preferring to spend their money on luxury goods and travel. Smart, unconventional, and politically controversial, *Shutting Out the Sun* is a bold explanation of Japan's stagnation and its implications for the rest of the world.

The Puritan Culture of America's Military Ronald Lorenzo, 2016-02-24 This book explores Puritanism and its continuing influence on U.S. and military law in the Global War on Terror, exploring connections between Puritanism and notions of responsibility in relation to military crimes, superstitious practices within the military, and urges for revenge. Engaging with the work of figures such as Durkheim, Fauconnet and Weber, it draws on primary data gathered through participation and observation at the U.S. Army courts-martial following events at Abu Ghraib, Operation Iron Triangle, the Baghdad canal killings and a war crimes case in Afghanistan, to show how Puritan cultural habits color and shape both American military actions and the ways in which these actions are perceived by the American public. A theoretically sophisticated examination of the cultural tendencies that shape military conduct and justice in the context of a contemporary global conflict, *The Puritan Culture of America's Military* will appeal to scholars across the social sciences with interests in social theory and sociology, cultural studies, politics and international relations and military studies.

Time, Freedom and the Self Michelle Shir-Wise, 2019-04-10 While abundant research has investigated time use, much less attention has been given to the cultural meanings attached to free time and what these may express with regard to conceptions of freedom and the self. In an attempt to fill this gap, Michelle Shir-Wise examines not only what people do in their free time, but also how they perceive, interpret and experience it, and in what way it relates to notions of happiness, freedom and the ideal self. *Time, Freedom and the Self* draws on contemporary theoretical debates concerning the relation between discourse, cultural repertoires, subjective meaning and agency, as well as literature around the sociology of leisure,

to inform a unique interpretation of free time (“disciplined freedom”), developed in the light of questionnaires and in-depth interviews with middle-class, middle-aged participants in suburban Israel.

Care Ethics and Political Theory Daniel Engster, Maurice Hamington, 2015 Care Ethics and Political Theory brings together new chapters on the nature of care ethics and its implications for politics from some of the most important philosophers working in the field today. Chapters take up long-standing questions about the relationship between care and justice and develop guidelines for the development of a care-based justice theory. Care ethics is further applied to issues such as security, privacy, law, and health care where little work has been previously done. By bringing care ethics into conversation with non-Western and subaltern cultures, the contributing authors further show how care ethics can guide and learn from other traditions. A final set of chapters uses care ethics to challenge dominant moral and political paradigms and offer an alternative foundation for future moral and political theory. The book as a whole makes the case for care ethics as an equal or superior approach to morality and politics compared with liberalism, luck egalitarianism, libertarianism, the capabilities approach, communitarianism, and other political theories. The volume includes many of the leading care scholars in the world today engaging in both theoretical and applied discussions of this burgeoning field of study. Ultimately, Care Ethics and Political Theory endeavors to find realistic methods and ways of thinking to create a more caring world.

The Ethos of Medicine in Postmodern America Arnold R. Eiser, 2013-12-24 Has postmodern American culture so altered the terrain of medical care that moral confusion and deflated morale multiply faster than both technological advancements and ethical resolutions? The Ethos of Medicine in Postmodern America is an attempt to examine this question with reference to the cultural touchstones of our postmodern era: consumerism, computerization, corporatization, and destruction of meta-narratives. The cultural insights of postmodern thinkers—such as Foucault, Deleuze and Guattari, Lyotard, Baudrillard, Bauman, and Levinas—help elucidate the changes in healthcare delivery that are occurring early in the twenty-first century. Although only Foucault among this group actually focused his critique on medical care itself, their combined analysis provides a valuable perspective for gaining understanding of contemporary changes in healthcare delivery. It is often difficult to envision what is happening in the psychosocial, cultural dynamic of an epoch as you experience it. Therefore it is useful to have a technique for refracting those observations through the lens of another system of thought. The prism of postmodern thought offers such a device with which to “view the eclipse” of changing medical practice. Any professional practice is always thoroughly embedded in the social and cultural matrix of its society, and the medical profession in America is no exception. In drawing upon the insights of key Continental thinkers such as American scholars, this book does not necessarily endorse the views of postmodernism but trusts that much can be learned from their insight. Furthermore, its analysis is informed by empirical information from health services research and the sociology of medicine. Arnold R. Eiser develops a new understanding of healthcare delivery in the twenty-first century and suggests

positive developments that might be nurtured to avoid the barren “Silicon Cage” of corporate, bureaucratized medical practice. Central to this analysis are current healthcare issues such as the patient-centered medical home, clinical practice guidelines, and electronic health records. This interdisciplinary examination reveals insights valuable to anyone working in postmodern thought, medical sociology, bioethics, or health services research.

Let Your Voice Be Heard Joan Hebert Reisinger, 2012-10-08 People are moving to the margins of the Catholic Church. As one dialogue partner states, I left the Church to beat the rush. Yet, another remarks, I just wonder. I have to ask, who's on the margins? I'm not sure. **Let Your Voice Be Heard** details original practical theology research that endeavors to understand the dynamics on the margins of the Roman Catholic Church in dialogue with fifty dialogue partners from across the United States. Practical theology, the theology of marginality of Jung Young Lee, reciprocal ethnography, and the communication theory of Mikhail Bakhtin join in a cross-disciplinary dialogue. In conversation with dialogue partners, Joan Hebert Reisinger seeks the reasons why Catholics over the age of twenty-one who were once active and involved in the Catholic Church find themselves on the margins of the Church and how they understand their own marginality. The dialogue partners speak of new ways of being Church emerging on the margins. This emerging Church is marked by inclusive relationships that include dialogue that does not seek agreement or consensus, a critical and thoughtful recalling of memories and narratives of the Catholic faith tradition, and appropriation of these in new and creative ways.
