Integrating Critical and Contextual Studies in Art and Design Jenny Rintoul, 2016-11-18 Integrating Critical and Contextual Studies in Art and Design examines the relationship between two aspects of art education that appear at times inseparable or even indistinguishable, and at others isolated and in conflict: Critical and Contextual Studies (CCS) and studio practice. Underpinned by international contexts, this book is rooted in British art and design education and draws upon

contemporary case studies of teaching and learning in post-compulsory settings in order to analyse and illustrate identities and practices of CCS and its integration. The chapters in this book are divided into three sections that build on one another: 'Discourse and debate'; 'Models, types and tensions'; and 'Proposals and recommendations'. Key issues include: knowledge hierarchies and subject histories and identities; constructions of 'theory' and the symbiotic relationship between theory and practice; models and practices of CCS within current post-compulsory British art and design education; the reification of ubiquitous terms in the fields of art and design and of education: intuition and integration; approaches to curriculum integration, including design and management; and suggestions for integrating CCS in art and design courses, including implications for pedagogy and assessment. *Integrating Critical and Contextual Studies in Art and Design* offers a comprehensive analysis of the current drive towards integration within art education, and elucidates what we understand by the theory and practice of integration. It explores the history, theory, teaching and student experience of CCS, and will be of interest to lecturers, teachers and pedagogues involved in art and design as well as researchers and students of art education.

Ethical Agility in Dance Noyale Colin, Catherine Seago, Kathryn Stamp, 2023-11-24 This edited collection examines the potential of dance training for developing socially engaged individuals capable of forging ethical human relations for an ever-changing world and in turn frames dance as a fundamental part of human experience. This volume draws together a range of critical voices to reflect the inclusive potential of dance. The contributions offer perspectives on contemporary dance training in Britain from dance educators, scholars, practitioners and artists. Through examining the politics, values and ethics of learning dance today, this book argues for the need of a re-assessment of the evolving practices in dance training and techniques. Key questions address how the concept of 'technique' and associated systems of training in dance could be redefined to enable the collaboration of skills and application of ideas necessary to twenty-first-century dance. The editors present these ideas in different modes of writing. This collection of essays, conversations and manifestos offers a way to explore, debate and grasp the shifting values of contemporary dance. Examining these values in the applied field of dance reveals a complex and contrasting range of ideas, encompassing broad themes including the relationships between individuality and collectivity, rigour and creativity, and virtuosity and inclusivity. This volume points to ethical techniques as providing a way of navigating these contrasting values in dance. It serves as an invaluable resource for academics as well as practitioners and students.

Developing Numeracy in Further Education Graham Hall, Suzanne Slaney, 2016-10-03 This book presents examples of numeracy applications developed in a wide range of courses in a Further Education college in Wales. The numeracy case studies are not limited to simple arithmetic and tasks involving shape and space, but include more advanced topics such as: statistical analysis, mathematical modelling, calculus and design of algorithms. A broad definition of numeracy is adopted by the authors, in line with the range of numeracy skills expected and valued by employers. In addition to a knowledge of mathematical techniques, numeracy is considered to include: problem solving, especially in the design of solutions to non-routine tasks; communication of mathematical results in formats which are suitable for the intended audience and facilitate decision making; an ability to use computer technology to collect and process data; and a familiarity with number which allows appropriate levels of accuracy to be chosen, estimates made and errors detected.

Education, Skills and Social Justice in a Polarising World Bill Esmond, Liz Atkins, 2022-01-25 This book explains how education policies offering improved transitions to work and higher-level study can widen the gaps between successful and disadvantaged groups of young people. Centred on an original study of ongoing further education and apprenticeship reforms in England, the book traces the emergence of distinctive patterns of transition that magnify existing societal inequalities. It illustrates the distinction between mainly male 'technical elites' on STEM-based courses and the preparation for low-level service roles described as 'welfare vocationalism', whilst digital and creative fields ill-suited to industry learning head for a 'new economy precariat'. Yet the authors argue that social justice can nevertheless be advanced in the spaces between learning and work. The book provides essential insights for academics and postgraduate students researching technical, vocational and higher education. It will also appeal to professionals with interests in contemporary educational policy and emerging practice.

Developing Tenacity Bill Lucas, Ellen Spencer, 2018-04-20 The UK's All-Party Parliamentary Group on Social Mobility recently proposed the adoption by schools of specific interventions in the areas of resilience and character; meanwhile, across the Atlantic, an end-of-high-school 'score' for grit is also being considered in the USA. In line with this growing consensus, an increasing body of evidence suggests that cultivating these competencies is key to success both in school and in later life. In *Developing Tenacity*, the second instalment in the *Pedagogy for a Changing World* series, Lucas and Spencer show educators how. Delving beyond 'grit' and 'growth mindset', and encompassing more than the formal curriculum, *Developing Tenacity* draws on the co-authors' research at the University of Winchester's Centre for Real-World Learning to offer a powerful synthesis of what it takes for learners to persevere when confronted with challenges. The resulting analysis depicts the true value of tenacity inside and outside the educational setting and provides teachers with action-oriented

strategies as to how the four key 'habits' of tenacity confidence, control, commitment and connectivity can be developed in learners. The wealth of teaching and learning methods presented is accompanied by practical suggestions on how to embed tenacity more systematically into the curriculum, providing plenty of stimuli for lesson planning and for the drip-feeding of everyday activities which boost learners' agency and self-efficacy. The authors also investigate the effectiveness of various pedagogical approaches including developmental self-evaluation, deliberate practice and service learning and share inventive assessment methods which teachers can employ to track learners' progress along the way. Lucas and Spencer then go further by showcasing case studies that illustrate the successful adoption of a capabilities approach by various educational institutions, and offer expert advice on how teachers can overcome any potential obstacles as they journey towards cultivating a tenacious learning culture in their classrooms. Suitable for all teachers and school leaders in both primary and secondary settings who want to instil a strong sense of tenacity in their pupils' approach to learning. Click here to watch Prof Bill Lucas and Prof Guy Claxton's video 'Putting the heart and the hand back into schools'. Developing Tenacity has been named a finalist in the 2018 INDIES Book of the Year Awards in the education category.

Managerial Cultures in UK Further and Vocational Education John Baldwin,Neil Raven,Robin Webber - Jones,2022-06-09 This book offers unique insights into the impact of the rise of a managerialist culture in Further Adult and Vocational Education (FAVE) in England. It will also raise awareness of the consequences of the imposition of top-down models of educational change and improvement upon the practices of educational leaders, middle and senior managers and policy professionals across the FAVE sector. The overall aim of this book is to understand the language, policies, values and approaches currently espoused in post-16 learning. Often these are driven by, or measured by, technical-rational approaches which can have a negative impact on individuals working in the sector, lead to a narrowing of the curriculum and range of

assessment opportunities, and do not support student progression. The authors propose tentative, researched, and evidence-based suggestions for new ways of working which might, ultimately, have a significant benefit to post-16 learning. The book will appeal to those engaged in researching education – either as academics, policy makers, trainees, or practitioners who are interested in ways of reflecting on, researching into, and improving practice.
