Sarah Elaine Eaton, Julia Christensen Hughes

The Big Data Agenda Annika Richterich, 2018-04-13 This book highlights that the capacity for gathering, analysing, and utilising vast amounts of digital (user) data raises significant ethical issues. Annika Richterich provides a systematic contemporary overview of the field of critical data studies that reflects on practices of digital data collection and analysis. The book assesses in detail one big data research area: biomedical studies, focused on epidemiological surveillance. Specific case studies explore how big data have been used in academic work. The Big Data Agenda concludes that the use of big data in research urgently needs to be considered from the vantage point of ethics and social justice. Drawing upon discourse ethics and critical data studies, Richterich argues that entanglements between big data research and technology/ internet corporations have emerged. In consequence, more opportunities for discussing and negotiating emerging research practices and their implications for societal values are needed.

Sustainable Enterprise Value Creation Richard Samans, Jane Nelson, 2022-05-27 This Open Access book provides a practical guide to the creation of sustainable enterprise value and implementation of the principles of stakeholder capitalism for corporate boards and management teams. The authors argue that business leadership is on the threshold of a new era driven by major shifts in technology, society, political economy and climate change. They set this transition in international and historical context and outline a comprehensive leadership agenda for fully integrating environmental, social, governance (ESG) and data stewardship risks and opportunities into corporate governance, strategy, reporting and partnerships. This

systematic approach is illustrated with good practices by leading companies and includes an explanation of how sustainability reporting is making the leap into formal accounting standards set by the same body that oversees international financial accounting standards and what companies should do to prepare. The book's combination of scholarly analysis and practical guidance make it a valuable resource for anyone seeking to navigate the new business context, whether from the perspective of a board director, C-suite executive, manager, policymaker, scholar or student. This is an open access book.

Economics Of G20: A World Scientific Reference (In 2 Volumes) Manmohan Agarwal,2020-03-20 The G20 (or Group of Twenty) is an international body established to manage the global economy, and includes members from developing economies. This reference set examines the issues facing developing countries and studies the role that the G20 can play in light of continuing challenges and objectives to meet the UN's Sustainable Development Goals (SDG). Volume 1 sets out the state of the world economy and the intricate functions of the G20 in policy coordination and economic cooperation. It also deals with the interests and strategies of some developing country members of the G20. These chapters answer questions such as what the country expects from the G20, the strategies adopted to achieve its ends, the extent to which it sees itself as a representative of developing countries in its region and how does it seek to represent them. The G20 has also centred its efforts around helping countries achieve the UN Sustainable Development Goals (SDGs). Volume 2 concentrates on trade issues and the prospects of achieving the SDGs. In this context, it examines whether the SDGs themselves are a desirable goal in terms of what the nature of development is which underlies these goals.

Contemporary Security Issues in Africa William A. Taylor, 2018-12-07 As a comprehensive resource for readers interested in contemporary security issues in Africa, this compelling book details the impact of complex challenges in Africa and explains why addressing them grows increasingly important. Presenting both general overviews and specific case studies, this book introduces contemporary security issues in Africa, home to more than thirty of the fifty most fragile nations in the world. It covers the past three decades of conflict on the continent, focusing on such topics as weak and failing states, ethnic conflict and civil wars, natural resources and environmental security, political violence and terrorism, piracy and maritime security, food security and poverty, international responses, and future prospects. The core of the book comprises detailed analysis of the nexus between culture, politics, and security in Africa, while the volume as a whole examines key regional and transnational security issues affecting Africa and their implications at the state, regional, and international levels. The book explores the dynamic role that African nations play in influencing international security and investigates and

articulates factors heightening the importance of Africa's role in international affairs.

The Politics of Resilience and Transatlantic Order Gordon Friedrichs, Sebastian Harnisch, Cameron G. Thies, 2019-05-17 This edited volume bridges the analytical divide between studies of transatlantic relations, democratic peace theory, and foreign policy analysis, and improves our theoretical understanding of the logic of crises prevention and resolution. The recent rise of populism and polarization in both the U.S.A and Europe adds to a host of foreign policy crises that have emerged in transatlantic relations over the last two decades. Through examining how democracies can manage to sustain and maintain mechanisms of crisis resilience that are embedded in the democratic peace, and particularly transatlantic relations, this book helps enhance the understanding of inter-democratic crisis resolution across issue areas. In doing so, it addresses some of the most important and prevalent crises of our time, such as anti-terrorism intervention in Afghanistan; Iran's nuclear program; burden-sharing within North Atlantic Treaty Organization NATO; key aspects of the international order, such as binding norms for cyber security and the integration of China into the Western-led international economic order; as well as domestic order shifts, such as the British vote to leave the European Union (EU) and the impact of the Trump administration populist foreign policy on transatlantic crisis resolution. This book will be of key interest to students and scholars of International Relations, Transatlantic Studies, Foreign Policy Analysis, and Comparative Politics.

Bending the trends to promote health and well-being World Health Organization, 2022-07-15

European Yearbook of International Economic Law 2021 Jelena Bäumler, Christina Binder, Marc Bungenberg, Markus Krajewski, Giesela Rühl, Christian J. Tams, Jörg Philipp Terhechte, Andreas R. Ziegler, 2022-07-06 Volume 12 of the EYIEL focuses on "The Future of Dispute Settlement in International Economic Law". While new forms of dispute settlement are emerging, others are in deep crisis. The volume starts off with reflections on Dispute Settlement and the World Trade Organisation, most prominently the crisis of the Appellate Body, but also addressing international intellectual property law and the African Continental Free Trade Area. This is followed by a section on Dispute Settlement and Investment Protection/International Investment Law, which includes articles on the summary dismissal of claims, the margin of appreciation doctrine, the use of conciliation to settle sovereign debt disputes, and contract-based arbitration in light of Achmea and Hagia Sophia at ICSID. Further contributions consider the emerging role of commercial courts, the dejudicialization of international economic law, dispute settlement in the UK-EU Withdrawal Agreement, reference

mechanisms in dispute resolution clauses, and UNCLOS.

FinTech in Financial Inclusion: Machine Learning Applications in Assessing Credit Risk Majid

Bazarbash,2019-05-17 Recent advances in digital technology and big data have allowed FinTech (financial technology) lending to emerge as a potentially promising solution to reduce the cost of credit and increase financial inclusion. However, machine learning (ML) methods that lie at the heart of FinTech credit have remained largely a black box for the nontechnical audience. This paper contributes to the literature by discussing potential strengths and weaknesses of ML-based credit assessment through (1) presenting core ideas and the most common techniques in ML for the nontechnical audience; and (2) discussing the fundamental challenges in credit risk analysis. FinTech credit has the potential to enhance financial inclusion and outperform traditional credit scoring by (1) leveraging nontraditional data sources to improve the assessment of the borrower's track record; (2) appraising collateral value; (3) forecasting income prospects; and (4) predicting changes in general conditions. However, because of the central role of data in ML-based analysis, data relevance should be ensured, especially in situations when a deep structural change occurs, when borrowers could counterfeit certain indicators, and when agency problems arising from information asymmetry could not be resolved. To avoid digital financial exclusion and redlining, variables that trigger discrimination should not be used to assess credit rating.

Displacement, Belonging, and Migrant Agency in the Face of Power Tamar Mayer, Trinh Tran,2022-06-29 This book centres the voices and agency of migrants by refocusing attention on the diversity and complexity of human mobility when seen from the perspective of people on the move; in doing so, the volume disrupts the binary logics of migrant/refugee, push/pull, and places of origin/destination that have informed the bulk of migration research. Drawn from a range of disciplines and methodologies, this anthology links disparate theories, approaches, and geographical foci to better understand the spectrum of the migratory experience from the viewpoint of migrants themselves. The book explores the causes and consequences of human displacement at different scales (both individual and community-level) and across different time points (from antiquity to the present) and geographies (not just the Global North but also the Global South). Transnational scholars across a range of knowledge cultures advance a broader global discourse on mobility and migration that centres on the direct experiences and narratives of migrants themselves. Both interdisciplinary and accessible, this book will be useful for scholars and students in Migration Studies, Global Studies, Sociology, Geography, and Anthropology.

Sustainable Development and Energy Transition in Europe and Asia Bernadette Andreosso-O'Callaghan, Sam

Dzever, Jacques Jaussaud, Robert Taylor,2020-02-19 Asian and European countries have adopted different approaches to the conflicting priorities of economic growth and low carbon emissions. In this volume - based on the revised versions of papers presented at the 24th International Euro-Asia Research Conference held in 2019 - the contrasts between the schools of thought of each continent are explored thoroughly. Ranging from topics as diverse as city logistics, shareholder value and

management practices, the EU-Japan Economic Partnership Agreement, Chinas geopolitical insights, sustainable agricultural development in India and the empowerment of women in Vietnam via microfinance, this book addresses sustainable development policies in China and Southeast Asia from many different perspectives.

Wellbeing for Sustainability in the Global Workplace Paola Ochoa, Maria-Teresa Lepeley, Peter Essens, 2018-07-04 Wellbeing in the workplace is an essential element in fostering a worker's sense of being valued, ensuring their engagement, and ultimately leading to higher levels of productivity and organizational performance. This important book specifically adds to the discussion by taking a global perspective, and evaluates wellbeing in the workplace in different countries, identifying both universal issues and specific cultural issues. Chapter authors have been drawn from across five continents and eleven countries to provide ground-breaking research in wellbeing from different regional perspectives, looking at both developed and developing world scenarios. What is clear throughout the book is that organizations that are not people-centered undermine their capacity to attain and maintain quality standards, high performance, and competitiveness. Organizational concerns about workers' wellbeing are growing exponentially due to the global VUCA (volatile, uncertain, complex, ambiguous) environment. In this environment, organizational success is no longer simply based on short-term revenue maximization, capital investments, or sales, but increasingly depends on people's wellbeing, human capital, and the development of human talent to ensure sustained and sustainable growth and performance. This book presents a collection of

studies that address current and forthcoming organizational challenges and offer realistic solutions to support leaders and managers seeking to balance and value the contribution of people with long-term organizational performance.

Sharing Economy and the Impact of Collaborative Consumption de Luna, Iviane Ramos, Fitó-Bertran, Àngels, Lladós-Masllorens, Josep, Liébana-Cabanillas, Francisco, 2019-09-20 The introduction of new technology and technological services worldwide has ushered in a new wave of peer-to-peer and access-driven companies that are disrupting the most established business categories. The emergence of these new business models has upset the flow in contemporary society and transformed people's behavior towards sharing-based economies. Companies and entrepreneurs can see this significant change in people's behavior as both an opportunity and a threat. *Sharing Economy and the Impact of Collaborative Consumption* provides emerging research on the impact that the sharing services are having on society as well as the importance of the sharing economy development in the coming years, dealing with relevant issues such as regulations, the technological aspects involved in these platforms, the impact in the tourism sector, and consumer behavior in relation to these services. Multidisciplinary in nature, this publication establishes links between economics, finance, marketing, consumer behavior, and IT, and covers topics that include e-commerce, consumer behavior, and peer economy. It is ideally designed for researchers, students, business professionals, and entrepreneurs seeking current research on the impact that this industry has on various economic, marketing, and societal aspects of different countries.

The Climate Planner Jason King, 2021-08-25 *The Climate Planner* is about overcoming the objections to climate change mitigation and adaptation that urban planners face at a local level. It shows how to draft climate plans that encounter less resistance because they involve the public, stakeholders, and decisionmakers in a way that builds trust, creates consensus, and leads to implementation. Although focused on the local level, this book discusses climate basics such as carbon dioxide levels in the atmosphere, the Intergovernmental Panel on Climate Change, the Paris Agreement of 2015, worldwide energy generation forecasts, and other items of global concern in order to familiarize urban planners and citizen planners with key concepts that they will need to know in order to be able to host climate conversations at the local level. The many case studies from around the United States of America show how communities have encountered pushback and bridged the implementation gap, the gap between plan and reality, thanks to a commitment to substantive public engagement. The book

is written for urban planners, local activists, journalists, elected or appointed representatives, and the average citizen worried about climate breakdown and interested in working to reshape the built environment.
