The Meaning of Media Anna Catharina Horn, Karl G. Johansson, 2021-05-10 The book highlights aspects of mediality and materiality in the dissemination and distribution of texts in the Scandinavian Middle Ages important for achieving a general understanding of the emerging literate culture. In nine chapters various types of texts represented in different media and in a range of materials are treated. The topics include two chapters on epigraphy, on lead amulets and stone monuments inscribed with runes and Roman letters. In four chapters aspects of the manuscript culture is discussed, the role of authorship and of the dissemination of Christian topics in translations. The appropriation of a Latin book culture in the vernaculars is treated as well as the administrative use of writing in charters. In the two final chapters topics related to the emerging print culture in early post-medieval manuscripts and prints are discussed with a focus on reception. The range of topics will make the book relevant for scholars from all fields of medieval research as well as those interested in mediality and materiality in general.

Change Leadership Tony Wagner, Robert Kegan, Lisa Laskow Lahey, Richard W. Lemons, Jude Garnier, Deborah Helsing, Annie Howell, Harriette Thurber Rasmussen, 2012-06-28 The Change Leadership Group at the Harvard School of Education has, through its work with educators, developed a thoughtful approach to the transformation of schools in the face of increasing demands for accountability. This book brings the work of the Change Leadership Group to a broader audience, providing a framework to analyze the work of school change and exercises that guide educators through the development of their practice as agents of change. It exemplifies a new and powerful approach to leadership in schools.

Disability in Islamic Law Vardit Rispler-Chaim, 2010-11-30 The book analyzes attitudes to people with various disabilities based on Muslim jurists' works in the Middle Ages and the modern era. Very little has been written so far on people with disabilities in a general Islamic context, much less in reference to Islamic law. The main contribution of the book is that it focuses on people with disabilities and depicts the place and status that Islamic law has assigned to them.

Geographies of Race and Food Rachel Slocum, Arun Saldanha, 2016-04-15 While interest in the relations of power and identity in food explodes, a hesitancy remains about calling these racial. What difference does race make in the fields where food is grown, the places it is sold and the manner in which it is eaten? How do we understand farming and provisioning, tasting and picking, eating and being eaten, hunger and gardening better by paying attention to race? This collection argues

there is an unacknowledged racial dimension to the production and consumption of food under globalization. Building on case studies from across the world, it advances the conceptualization of race by emphasizing embodiment, circulation and materiality, while adding to food advocacy an antiracist perspective it often lacks. Within the three socio-physical spatialities of food - fields, bodies and markets - the collection reveals how race and food are intricately linked. An international and multidisciplinary team of scholars complements each other to shed light on how human groups become entrenched in myriad hierarchies through food, at scales from the dining room and market stall to the slave trade and empire. Following foodways as they constitute racial formations in often surprising ways, the chapters achieve a novel approach to the process of race as one that cannot be reduced to biology, culture or capitalism.

The Oxford Introduction to Proto-Indo-European and the Proto-Indo-European World J. P. Mallory, D. Q. Adams, 2006-08-24 This book introduces Proto-Indo-European and explores what the language reveals about the people who spoke it. The Proto-Indo-Europeans lived somewhere in Europe or Asia between 5,500 and 8,000 years ago, and no text of their language survives. J. P. Mallory and Douglas Adams show how over the last two centuries scholars have reconstructed it from its descendant languages, the surviving examples of which comprise the world's largest language family. After a concise account of Proto-Indo-European grammar and a consideration of its discovery, they use the reconstructed language and related evidence from archaeology and natural history to examine the lives, thoughts, passions, culture, society, economy, history, and environment of the Proto-Indo-Europeans. Our distant ancestors had used the wheel, were settled arable farmers, kept sheep and cattle, brewed beer, got married, made weapons, and had 27 verbs for the expression of strife. The subjects to which the authors devote chapters include fauna, flora, family and kinship, clothing and textiles, food and drink, space and time, emotions, mythology, religion, and the continuing quest to discover the Proto-Indo-European homeland. Proto-Indo-European-English and English-Proto-Indo-European vocabularies and full indexes conclude the book. Written in a clear, readable style and illustrated with maps, figures, and tables, this book is on a subject of great and enduring fascination. It will appeal to students of languages, classics, and the ancient world, as well as to general readers interested in the history of language and of early human societies.

Lughat-UL-Quran 2 Ghulam Ahmad Parwez, 2015-01-18 In order to understand the true message and spirit of the Holy Quran, it is essential to know the language it has been revealed in. The first step is to understand the meaning of individual words. One needs to understand how words were used by the ancient Arabs by the time of Quranic revelation, and not depend on anyone's explanation or understanding as to what they mean today. Along with proper understanding of Arabic grammar, the true meanings of Quranic words, and their use with respect to the context in which they have been revealed in, one student of Quran may get closer to the Truth. The task of creating a Quranic dictionary or encyclopedia that would explain the classical meanings of Quranic words and their use along with significance was undertaken by Allama Ghulam

Ahmed Parwez in 1960, where he compiled Lughat-ul-Quran in Urdu language. Now this dictionary has been translated to English by Quranic Education Society in Norway, in order to appeal to a larger audience worldwide and to inspire modern Quranic students.

Purity and Danger Professor Mary Douglas, Mary Douglas, 2013-06-17 Purity and Danger is acknowledged as a modern masterpiece of anthropology. It is widely cited in non-anthropological works and gave rise to a body of application, rebuttal and development within anthropology. In 1995 the book was included among the Times Literary Supplement's hundred most influential non-fiction works since WWII. Incorporating the philosophy of religion and science and a generally holistic approach to classification, Douglas demonstrates the relevance of anthropological enquiries to an audience outside her immediate academic circle. She offers an approach to understanding rules of purity by examining what is considered unclean in various cultures. She sheds light on the symbolism of what is considered clean and dirty in relation to order in secular and religious, modern and primitive life.

Points of Passage Tobias Brinkmann, 2013-10-01 Between 1880 and 1914 several million Eastern Europeans migrated West. Much is known about the immigration experience of Jews, Poles, Greeks, and others, notably in the United States. Yet, little is known about the paths of mass migration across "green borders" via European railway stations and ports to destinations in other continents. Ellis Island, literally a point of passage into America, has a much higher symbolic significance than the often inconspicuous departure stations, makeshift facilities for migrant masses at European railway stations and port cities, and former control posts along borders that were redrawn several times during the twentieth century. This volume focuses on the journeys of Jews from Eastern Europe through Germany, Britain, and Scandinavia between 1880 and 1914. The authors investigate various aspects of transmigration including medical controls, travel conditions, and the role of the steamship lines; and also review the rise of migration restrictions around the globe in the decades before 1914.

On the Lessons in Proverbs Richard Chenevix Trench, 1856

The Ancient Novel and Beyond Stelios Panayotakis, Maaike Zimmerman, Wytse Keulen, 2017-07-31 This volume comprises the revised versions of selected papers read at the International Conference on the Ancient Novel (Groningen, July 2000). The papers cover a wide range of scholarly issues that were prominent in the programme of the conference, and feature the most recent approaches to research on the ancient novel. The essays combine judicious use of literary theory with traditional scholarship, and examine the ancient novels and related texts, such as Oriental tales and Christian narrative, both in their larger, literary, cultural and social context, and as sources of inspiration for Byzantine and modern fiction. This book is important not only for classicists and literary historians, but also for a general public of those interested in narrative fiction.

Routledge International Handbook of Food Studies Ken Albala,2013-05-07 Over the past decade there has been a remarkable flowering of interest in food and nutrition, both within the popular media and in academia. Scholars are increasingly using foodways, food systems and eating habits as a new unit of analysis within their own disciplines, and students are rushing into classes and formal degree programs focused on food. Introduced by the editor and including original articles by over thirty leading food scholars from around the world, the Routledge International Handbook of Food Studies offers students, scholars and all those interested in food-related research a one-stop, easy-to-use reference guide. Each article includes a brief history of food research within a discipline or on a particular topic, a discussion of research methodologies and ideological or theoretical positions, resources for research, including archives, grants and fellowship opportunities, as well as suggestions for further study. Each entry also explains the logistics of succeeding as a student and professional in food studies. This clear, direct Handbook will appeal to those hoping to start a career in academic food studies as well as those hoping to shift their research to a food-related project. Strongly interdisciplinary, this work will be of interest to students and scholars throughout the social sciences and humanities.

Islamic Medical Ethics in the Twentieth Century Vardit Rispler-Chaim,2021-09-20 This book treats the most prominent issues in medical ethics in the twentieth century, such as abortion, artificial insemination, organ transplantation, euthanasia etc., as discussed by Muslim religious scholars, physicians and jurists. Despite the semi-equal spread of medical knowledge among the peoples of the world and the shared dilemmas brought about by modern medicine, Muslims tend to follow their own medical ethics, which agree ultimately with the basic requirements of Islamic religion and law.

Tracing the Jerusalem Code Kristin B. Aavitsland,Line M. Bonde,2021-04-19 With the aim to write the history of Christianity in Scandinavia with Jerusalem as a lens, this book investigates the image - or rather the imagination - of Jerusalem in the religious, political, and artistic cultures of Scandinavia through most of the second millennium. Jerusalem is conceived as a code to Christian cultures in Scandinavia. The first volume is dealing with the different notions of Jerusalem in the Middle Ages. Tracing the Jerusalem Code in three volumes Volume 1: The Holy City Christian Cultures in Medieval Scandinavia (ca. 1100-1536) Volume 2: The Chosen People Christian Cultures in Early Modern Scandinavia (1536-ca. 1750)
