Strategic Foresight Sarah Lai-Yin Cheah, 2020-03-09 Strategic foresight is discipline that organizations adopt to gather, interpret, manage information about the future environment they plan to operate in. This book introduces the concept of strategic foresight and advocates a holistic and systemic foresight approach comprising five phases that are suitable for organizations in the public and private sectors. Using real-life cases as practical examples, the book demonstrates how organizations can apply a range of foresight methods and resources across the phases from intelligence to implementation. The book offers an opportunity to learn by all key stakeholders. It enhances the understanding of the National Research Organization's Foresight exercise (as the complex social phenomenon) in its context. The case study of the National Research Organisation provides lessons and insights that can improve both the theoretical and practical implementation of the Foresight Exercise. Dr Mlungisi Cele Acting Head: National Advisory Council on Innovation Department of Science and Technology, Republic of South Africa Foresight methodologies have been widely spreading among business and research organizations worldwide during the last decades. The weakest point of many forward-looking activities so far was the lack of their practical use. The book shows, on a number of cases, how a Foresight study, being wisely designed and implemented, can become a useful navigation tool for increasing competitiveness in the fast changing environment. Dr Alexander Sokolov Professor, HSE National Research University, Russia Director, Institute for Statistical Studies and Economics of Knowledge / International Research and Educational Foresight Centre Very useful tool to describe how organizations assess the future and formulate strategic plans using a systemic foresight methodology Ibon Zugasti Managing Director in PROSPEKTIKER and Chair of the Millennium Project Node in Spain A comprehensive source of knowledge on complex issues of technology foresight process, from conception to commercialization of key technologies, made easy to understand and useful for aspiring futurists seeking to learn more about the matters at hand. Dr Surachai Sathitkunararat Executive Director, APEC Center for Technology Foresight (APEC CTF) Assistant to the President Office of National Higher Education, Science, Research and Innovation Policy Council (NXPO) Thailand This book provides a very good coverage of the end-to-end methodology for technology-based innovation through the use of diverse and relevant business use cases. Very often, books on this theme only

expound the approaches. Sarah goes beyond in sharing the pitfalls and challenges during the different stages of the systemic foresight methodology so that readers can learn and avoid the mistakes that other companies made. The emphasis on open innovation and intellectual property management is valuable as many organizations fail to deliver the vision due to insufficient attention on these two aspects. A must read if you wish to master strategic foresight. Dr Terence Hung Chief, Future Intelligence Technologies Rolls-Royce Singapore Pte Ltd Why do people want to know the future? People want to use budget efficiently or don't want to waste time? Aside from those who see the future, like fortune tellers, how do we make the future? Foresight is known as a method of creating the future in a way that many people has been using. So how is it different between Forecast and Foresight? This book will help answer that. Dr Kuniko Urashima Deputy Director of Foresight Center National Institute of Science and Technology Policy (NISTEP), Japan .

This Won't Hurt Marieke Bigg, 2023-02-16 'A hugely informative and quietly furious call to arms.' IRISH TIMES 'A ground-breaking new book.' EVENING STANDARD 'A must read.' DAILY EXPRESS 'She is balanced in her evidence analysis, forensic in her research.' TELEGRAPH 'A vital subject that needs to be discussed -KATY HESSEL, AUTHOR OF THE STORY OF ART WITHOUT MEN 'A valuable sociological perspective on women's bodies and health and an even more valuable (and optimistic) view of a better future for all.' GINA RIPPON The idea that medicine is gender-neutral is a myth. This isn't inflammatory rhetoric; it's simply true. From the way pain is felt, to how heart attacks are diagnosed, to the very role society plays in the health of the body, the medical landscape in place today is one that was designed for, and by, men. This book is about all the ways medicine is not gender-neutral, from research to treatment to diagnosis. Throughout history, flawed mindsets have paved the way for sub-par treatment, and the prevailing attitudes that still exist today have had terrible repercussions for women and their bodies. Blending fascinating examples with historical and cultural context, and reflecting on her own personal experience with healthcare, Dr Marieke Bigg explores how women's bodies have been ignored, misunderstood and misdiagnosed, whilst keeping an eye to a better future. This is a sharp and honest must-read, and an empowering tool for anyone committed to making this world safer to navigate for all.

AI and Big Data's Potential for Disruptive Innovation Strydom, Moses, Buckley, Sheryl, 2019-09-27 Big data and artificial intelligence (AI) are at the forefront of technological advances that represent a potential transformational mega-trend—a new multipolar and innovative disruption. These technologies, and their associated management paradigm, are already rapidly impacting many industries and occupations, but in some sectors, the change is just beginning. Innovating ahead of emerging technologies is the new imperative for any organization that aspires to succeed in the next decade. Faced with the power of this AI movement, it is imperative to understand the dynamics and new codes required by the disruption and to adapt accordingly. AI and Big Data's Potential for Disruptive Innovation provides emerging research exploring the theoretical and practical aspects of successfully implementing new and innovative technologies in a variety of sectors including business,

transportation, and healthcare. Featuring coverage on a broad range of topics such as semantic mapping, ethics in AI, and big data governance, this book is ideally designed for IT specialists, industry professionals, managers, executives, researchers, scientists, and engineers seeking current research on the production of new and innovative mechanization and its disruptions.

Artificial Intelligence in Healthcare Adam Bohr, Kaveh Memarzadeh, 2020-06-21 Artificial Intelligence (AI) in Healthcare is more than a comprehensive introduction to artificial intelligence as a tool in the generation and analysis of healthcare data. The book is split into two sections where the first section describes the current healthcare challenges and the rise of AI in this arena. The ten following chapters are written by specialists in each area, covering the whole healthcare ecosystem. First, the AI applications in drug design and drug development are presented followed by its applications in the field of cancer diagnostics, treatment and medical imaging. Subsequently, the application of AI in medical devices and surgery are covered as well as remote patient monitoring. Finally, the book dives into the topics of security, privacy, information sharing, health insurances and legal aspects of AI in healthcare. - Highlights different data techniques in healthcare data analysis, including machine learning and data mining - Illustrates different applications and challenges across the design, implementation and management of intelligent systems and healthcare data networks - Includes applications and case studies across all areas of AI in healthcare data

Cash Flow Camilla Mørk Røstvik, 2022-04-25 The menstrual product industry has played a large role in shaping the last hundred years of menstrual culture, from technological innovation to creative advertising, education in classrooms and as employers of thousands in factories around the world. How much do we know about this sector and how has it changed in later decades? What constitutes 'the industry', who works in it, and how is it adapting to the current menstrual equity movement? *Cash Flow* provides a new academic study of the menstrual corporate landscape that links its twentieth-century origins to the current 'menstrual moment'. Drawing on a range of previously unexplored archival materials and interviews with industry insiders, each chapter examines one key company and brand: Saba in Norway, Essity in Sweden, Tambrands in the Soviet Union, Procter & Gamble in Britain and Europe, Kimberly-Clark in North America, and start-ups Clue and Thinx. By engaging with these corporate collections, the book highlights how the industry has survived as its consumers continually change.

When Women Lead Julia Boorstin, 2022-10-11 In her groundbreaking, deeply reported work, Julia Boorstin reveals the odds-defying leadership approaches of women running the world's most innovative and successful companies - and what we can learn from them. Now, in *When Women Lead*, Boorstin brings together the stories of over sixty of those female CEOs and leaders, and dozens of new studies. Her combination of narrative and research reveals how once-underestimated characteristics, from vulnerability and gratitude to divergent thinking, can be vital superpowers - and that anyone can work

these approaches to their advantage. Featuring new interviews with Gwyneth Paltrow, Jenn Hyman, Whitney Wolfe Herd, Lena Waithe, Shivani Siroya, and more, *When Women Lead* is a radical blueprint for the future of business, and our world at large. 'Filled with top-notch research, practical insight and stories from the most inspiring women in business, Julia Boorstin lays out a new, inclusive vision for leadership and our world at large that we all will benefit from.' - Arianna Huffington, Founder & CEO, Thrive 'When Women Lead is replete with concrete insights that have personally helped me navigate our unprecedented times of change. Weaving together perspectives from tech, business, politics, the cultural sphere and beyond, Boorstin's deep reporting and voracious inquiries serve not only as a tactical manual for individuals, but as a toolkit for building interdisciplinary connections.' - Bettina Korek, CEO of the Serpentine Galleries, London

Oxford Handbook of Ethics of AI Markus D. Dubber, Frank Pasquale, Sunit Das, 2020-06-30 This volume tackles a quickly-evolving field of inquiry, mapping the existing discourse as part of a general attempt to place current developments in historical context; at the same time, breaking new ground in taking on novel subjects and pursuing fresh approaches. The term A.I. is used to refer to a broad range of phenomena, from machine learning and data mining to artificial general intelligence. The recent advent of more sophisticated AI systems, which function with partial or full autonomy and are capable of tasks which require learning and 'intelligence', presents difficult ethical questions, and has drawn concerns from many quarters about individual and societal welfare, democratic decision-making, moral agency, and the prevention of harm. This work ranges from explorations of normative constraints on specific applications of machine learning algorithms today-in everyday medical practice, for instance-to reflections on the (potential) status of AI as a form of consciousness with attendant rights and duties and, more generally still, on the conceptual terms and frameworks necessarily to understand tasks requiring intelligence, whether human or A.I.

Global Diffusion of EHealth: Making Universal Health Coverage Achievable World Health Organization, 2017-03-27 This third global survey of the WHO Global Observatory for eHealth (GOe) investigated how eHealth can support universal health coverage (UHC) in Member States. A total of 125 countries participated in the survey? a clear reflection of the growing interest in this area. The report considers eHealth foundations built through policy development funding approaches and capacity building in eHealth through the training of students and professionals. It then observes specific eHealth applications such as mHealth telehealth electronic health records systems and eLearning and how these contribute to the goals of UHC. Of interest is the extent to which legal frameworks protect patient privacy in EHRs as health care systems move towards delivering safer more efficient and more accessible health care. Finally the rapidly emerging areas of social media for health care as well as big data for research and planning are reported.

Artificial Intelligence in Medicine David Riaño, Szymon Wilk, Annette ten Teije, 2019-06-19 This book constitutes the refereed proceedings of the 17th Conference on Artificial Intelligence in Medicine, AIME 2019, held in Poznan, Poland, in

June 2019. The 22 revised full and 31 short papers presented were carefully reviewed and selected from 134 submissions. The papers are organized in the following topical sections: deep learning; simulation; knowledge representation; probabilistic models; behavior monitoring; clustering, natural language processing, and decision support; feature selection; image processing; general machine learning; and unsupervised learning.

The Oxford Handbook of Media and Social Justice Srividya Ramasubramanian, Omotayo O. Banjo, 2024-09-13 The urgency and complexity of contemporary social justice issues facing the world today mean that activists, scholars, and storytellers need a readily available compendium of cutting-edge scholarship on media and social justice. The Oxford Handbook of Media and Social Justice gathers over forty leading scholars and presents a state-of-the-art systematic overview of media and social justice. Representing leading voices across positionalities and perspectives, geographies and generations, meta-theories and methods, and issues and identities, the Handbook explores intersecting identities, social structures, and power networks within media ownership, representation, selection, uses, effects, networks, and social transformation. These theories, methods, and practices expose media and digital divides, polarization, marginalization, exclusion, alienation, invisibilities, stigma, and trivializations. Yet, they also showcase how individuals and communities also have agency through refusal and resistance. Each of the 32 chapters includes a brief history, key concepts, contemporary debates and dialogues, and future directions, and the volume concludes with reflections on resistances, reckoning, and reparative justice. Connecting critical media scholarship with intersectional feminism, postcolonial/anticolonial theory, Indigenous approaches, queer theory, diaspora studies, and environmental justice frameworks, the Handbook re-envision the role of media and technology with an inclusive trauma-informed approach to scholarship that is essential for the future of this research.

National EHealth Strategy Toolkit World Health Organization, 2012 Worldwide the application of information and communication technologies to support national health-care services is rapidly expanding and increasingly important. This is especially so at a time when all health systems face stringent economic challenges and greater demands to provide more and better care especially to those most in need. The National eHealth Strategy Toolkit is an expert practical guide that provides governments their ministries and stakeholders with a solid foundation and method for the development and implementation of a national eHealth vision action plan and monitoring fram.

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: -

Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

MEDINFO 2019: Health and Wellbeing e-Networks for All L. Ohno-Machado,B. Séroussi,2019-11-12 Combining and integrating cross-institutional data remains a challenge for both researchers and those involved in patient care. Patient-generated data can contribute precious information to healthcare professionals by enabling monitoring under normal life conditions and also helping patients play a more active role in their own care. This book presents the proceedings of MEDINFO 2019, the 17th World Congress on Medical and Health Informatics, held in Lyon, France, from 25 to 30 August 2019. The theme of this year's conference was 'Health and Wellbeing: E-Networks for All', stressing the increasing importance of networks in healthcare on the one hand, and the patient-centered perspective on the other. Over 1100 manuscripts were submitted to the conference and, after a thorough review process by at least three reviewers and assessment by a scientific program committee member, 285 papers and 296 posters were accepted, together with 47 podium abstracts, 7 demonstrations, 45 panels, 21 workshops and 9 tutorials. All accepted paper and poster contributions are included in these proceedings. The papers are grouped under four thematic tracks: interpreting health and biomedical data, supporting care delivery, enabling precision medicine and public health, and the human element in medical informatics. The posters are divided into the same four groups. The book presents an overview of state-of-the-art informatics projects from multiple regions of the world; it will be of interest to anyone working in the field of medical informatics.

Pharmaceutical Care in Digital Revolution Claudia Rijcken,Ardalan Mirzaei,2019-03-15 Pharmaceutical Care in Digital Revolution demonstrates how blending human and digital pharmaceutical care can establish optimal Apothecary Intelligence (AI). Organized into four parts, it examines digital health advances that will synergize the pharmaceutical care process and prepares stakeholders for a dynamic future, fueled with innovation. Beginning with the global picture on health care systems, patients' expectations, and current pharmaceutical care practices, the book covers details of relevant digital technologies as well as compliance, ethical, educational, and cultural aspects to take successful steps towards digital pharmaceutical care. The text includes links to lectures and technology facts, tutorials on how to implement advances in your own working environment, and examples of stakeholders who are successful in building synergy between digital and pharma. Pharmaceutical Care in Digital Revolution is a practical resource to equip pharmaceutical care stakeholders, such as pharmacists, physicians, pharmacy technicians, and students as well as those in surrounding ecosystems like payers or regulators. It is a crucial reference to understand how technological innovation is changing the paradigm in which we

provide current and future pharmaceutical care and how to keep it accessible, affordable, and sustainable. - Learn about advances in digital health technology and apply them as a change leader to create circular pharmaceutical care - Provides insights on future pharmaceutical care and implement essential conditions to create the best outlook for patients - Access links, QR codes, and explanatory animations as educational material to the book

The Future of ASEAN Hassanal Bolkiah, 2014-09-18 The Singapore Lecture Series was inaugurated in 1980 by the Institute of Southeast Asian Studies with a founding endowment from the Monetary Authority of Singapore (MAS), and augmented by a generous donation in 1983 from Exxon Mobil Asia Pacific. The Singapore Lecture is designed to provide the opportunity for distinguished statesmen, scholars, and writers and other similarly highly qualified individuals specializing in banking and commerce, international economics and finance and philosophical and world strategic affairs to visit Singapore. The presence of such eminent personalities will allow Singaporeans, especially the younger executive and decision-makers in both the public and private sectors, to have the benefit of exposure to - through the Lecture, televised discussions, and private consultations - leaders of thought and knowledge in various fields, thereby enabling them to widen their experience and perspectives. On 22 April 2014, the 34th Singapore Lecture was delivered by His Majesty Sultan Haji Hassanal Bolkiah Mu'izzaddin Waddaulah, Sultan and Yang Di-Pertuan of Brunei Darussalam, under the distinguished Chairmanship of Mr Teo Chee Hean, Deputy Prime Minister, Coordinating Minister for National Security and Minister for Home Affairs, Singapore.

Rise Of Megacities, The: Challenges, Opportunities And Unique Characteristics Jerzy Kleer, Katarzyna Anna Nawrot, 2018-02-13 Megacities of over 10 million inhabitants are unique entities in their own right, both challenging and supporting the policies, governance and cohesion of states. In developing and developed economies, the rise of megacities can be seen to have negative and positive effects; from exacerbating and deepening societal problems inherent in inequality and poverty, to increasing opportunities for innovation, education, interconnectivity and development. The Rise of Megacities takes a multidisciplinary and interdisciplinary approach to analysis of their growth. It examines both the major new challenges that the expansion of megacities brings for development at large, and the opportunities they might create for the public good. In addition, it shows how more established cities, such as Tokyo, New York or European examples can provide lessons for governance and development of rapidly urbanizing populations. Using case studies and academic theory it takes into account both the similarities and differences of megacities and gives a comprehensive study of them. This book is perfect for students and researchers of development economics, urban studies, international relations and the social sciences, as well as those interested in how the world economy is changing through globalization.

What's In, What's Out Amanda Glassman, Ursula Giedion, Peter C. Smith, 2017-10-10 Vaccinate children against deadly pneumococcal disease, or pay for cardiac patients to undergo lifesaving surgery? Cover the costs of dialysis for kidney patients, or channel the money toward preventing the conditions that lead to renal failure in the first place? Policymakers

dealing with the realities of limited health care budgets face tough decisions like these regularly. And for many individuals, their personal health care choices are equally stark: paying for medical treatment could push them into poverty. Many low- and middle-income countries now aspire to universal health coverage, where governments ensure that all people have access to the quality health services they need without risk of impoverishment. But for universal health coverage to become reality, the health services offered must be consistent with the funds available—and this implies tough everyday choices for policymakers that could be the difference between life and death for those affected by any given condition or disease. The situation is particularly acute in low- and middle income countries where public spending on health is on the rise but still extremely low, and where demand for expanded services is growing rapidly. *What's In, What's Out: Designing Benefits for Universal Health Coverage* argues that the creation of an explicit health benefits plan—a defined list of services that are and are not available—is an essential element in creating a sustainable system of universal health coverage. With contributions from leading health economists and policy experts, the book considers the many dimensions of governance, institutions, methods, political economy, and ethics that are needed to decide what's in and what's out in a way that is fair, evidence-based, and sustainable over time.

Fundamentals of Clinical Data Science Pieter Kubben, Michel Dumontier, Andre Dekker, 2018-12-21 This open access book comprehensively covers the fundamentals of clinical data science, focusing on data collection, modelling and clinical applications. Topics covered in the first section on data collection include: data sources, data at scale (big data), data stewardship (FAIR data) and related privacy concerns. Aspects of predictive modelling using techniques such as classification, regression or clustering, and prediction model validation will be covered in the second section. The third section covers aspects of (mobile) clinical decision support systems, operational excellence and value-based healthcare. *Fundamentals of Clinical Data Science* is an essential resource for healthcare professionals and IT consultants intending to develop and refine their skills in personalized medicine, using solutions based on large datasets from electronic health records or telemonitoring programmes. The book's promise is “no math, no code” and will explain the topics in a style that is optimized for a healthcare audience.

Sensors for Health Monitoring Nilanjan Dey, Jyotisma Chaki, Rajesh Kumar, 2019-09-09 *Sensors for Health Monitoring* discusses the characteristics of U-Healthcare systems in different domains, providing a foundation for working professionals and undergraduate and postgraduate students. The book provides information and advice on how to choose the best sensors for a U-Healthcare system, advises and guides readers on how to overcome challenges relating to data acquisition and signal processing, and presents comprehensive coverage of up-to-date requirements in hardware, communication and calculation for next-generation uHealth systems. It then compares new technological and technical trends and discusses how they address expected u-Health requirements. In addition, detailed information on system operations is presented and challenges

in ubiquitous computing are highlighted. The book not only helps beginners with a holistic approach toward understanding u-Health systems, but also presents researchers with the technological trends and design challenges they may face when designing such systems. - Presents an outstanding update on the use of U-Health data analysis and management tools in different applications, highlighting sensor systems - Highlights Internet of Things enabled U-Healthcare - Covers different data transmission techniques, applications and challenges with extensive case studies for U-Healthcare systems
