Class Acts Rachel Sherman, 2007 Sherman's insightful ethnography sheds light on the interactional dimension of symbolic boundaries and class relations as they are lived by luxury hotel clients and the workers who serve them. We learn how both groups perform class through emotion work and deepen our understanding of the role played by niceness in constituting equality and reversing hierarchies. As such, *Class Acts* is a signal contribution to a growing literature on the place of the self concept in class boundaries. It will gain a significant place in a body of work that broadens our understanding of class by moving beyond structural determinants and taking into consideration the performative, emotional, cognitive, and expressive dimensions of inequality.--Michele Lamont, author of *The Dignity of Working Men: Morality and the Boundaries of Race, Class, and Immigration* Eye-opening, amusing, and appalling, Rachel Sherman's *Class Acts* explains how class inequality is normalized in the refined atmosphere of luxury hotels. This beautifully observed and engagingly written

ethnography describes what kinds of deference and personal recognition money can buy. Moreover, it shows how workers who provide luxury service avoid seeing themselves as subordinate and how those whose whims are catered to are made comfortable with their privilege. *Class Acts* is a sobering and timely account of the legitimation of extreme inequality in a culture that prizes egalitarianism.--Robin Leidner, University of Pennsylvania Rachel Sherman provides a penetrating and engrossing study of workers and guests in luxury hotels. Do workers resent the guests? Do guests disdain the workers? Sherman argues neither is true-and explains why.--Julia Wrigley, author of *Other People's Children*

Improving Hotel Starlac's Human Resources and Talent Management System Stephanie Pougnet, Carlos Martin-Rios, 2016 In the context of a war for talent, hospitality business leaders are competing to attract, develop, and retain high performers. The challenge is crucial in the tourism and hospitality sectors, whose competitive advantage relies on its workforce. Their human resource management (HRM) systems should contribute to increasing individual and organizational performance. Yet, HRM practices exhibit big discrepancies between small family-owned independent establishments and large corporate groups and chains owned by shareholders. In particular, the ongoing purchase of independent hotels by finance-based companies like private equity or pension funds sets the scene for HRM challenges at both individual and organizational levels. Hotel Starlac is an independent and small 5-star hotel located in Geneva, Switzerland.

The Palgrave Handbook of Wine Industry Economics Adeline Alonso Ugaglia, Jean-Marie Cardebat, Alessandro Corsi, 2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

Integrated Coastal Zone Management of Coral Reefs Kent Gustavson, Richard M. Huber, H. Jack Ruitenbeek, 2000 The applied research indicates that, to improve awareness, park education programs should be targeted specifically to the user groups primarily through outreach programs. Further, the Park's management programs should be highlighted, particularly the beneficial, tangible products and services (benefits) the Park provides to each user group... The closer the tie between reef conditions and business earnings, the greater the users' support for reef conservation. Coral reefs are sometimes referred to as canaries of the sea because of their early warning ability to show near-shore oceanic stress. Because of their biological diversity, they are also called rainforests of the sea. Coral reefs are vital to the well being of millions of people. Coral reef managers and government officials trying to save their valuable national resources have turned to research on coral reefs for help. The research presented in this publication merits a great deal of notice because the output is useful for decision support and training tools in integrated coastal zone management (ICZM). The work on cost-effectiveness analysis has developed integrated economic and ecological models, relying extensively on fuzzy logic procedures to model impacts and effects of interventions within the reef environment. By contrast, the marine system valuation work provides economic valuations of coral reefs, demonstrating the use of different modeling methods and treating key policy issues within this context. This publication will interest coastal zone experts and managers worldwide

Questionnaire Design, Interviewing and Attitude Measurement A. N. Oppenheim, 2000-10-17 This second edition of Dr Bram Oppenheim's established work, like the first, is a practical teaching text of survey methods. The new edition has extended its scope to include interviewing (both clip-board and depth interviewing), sampling and research design, data analysis, and a special chapter on pilot work. As before, the chapters on questionnaire design are supported by further chapters on attitude scaling methods, and on projective techniques. There is refreshingly critical treatment of problems such as faulty research designs, errors in sampling, ambiguities in question wording, biases in interviewing, losses of information, and the interpretation of attitude scales and of projective data. The book is laced throughout with instructive examples from many fields, ranging from marketing surveys to the study of children's political perceptions. Problems of reliability and validity are kept to the fore. Above all, the need for pilot work is emphasized at every stage. The book is intended for graduate methodology courses in the social sciences, but it is also designed to reach other professionals, including teachers, social workers, medical researchers, and opinion pollsters, who have to evaluate or carry out social surveys.
