*Clear Skies* Jessica Scott Kerrin, 2019-08-01 As the US/Soviet Space Race heats up in 1961, eleven-year-old Arno finds his dreams of becoming an astronomer exploding like an extragalactic supernova. It is the summer of 1961, and eleven-year-old Arno Creelman wants nothing more than to be an astronomer. His claustrophobia rules out flying in a cramped space capsule, so instead, Arno dreams of exploring the galaxies with powerful telescopes back on Earth. Arno's first move: Enter a local radio contest and win a visit to the new observatory that is about to open near his town. The ribbon will be cut by Arno's idol, Jean Slayter-Appleton, a renowned astronomer whose weekly columns Arno clips for his own notebooks. When he finally manages to phone in and correctly answer the skill-testing astronomy question, Arno is thrilled. Then a new boy moves to the neighborhood, and he seems to challenge Arno in every way. Robert even believes in astrology, which Arno argues is not a science at all. Before long, Arno is feeling left behind, on the outs with his friends and even abandoned by his beloved dog, Comet. How did Arno's dream become a cosmic nightmare? *Environmental Policies In Asia: Perspectives From Seven Asian Countries* Jing Huang, Shreekant Gupta, 2014-06-13

*Environmental Policies in Asia* highlights the environmental challenges Asian planners and policymakers face as the continent undergoes rapid economic growth in the 21st Century. Edited by Jing Huang and Shreekant Gupta, with contributions from leading Asian scholar practitioners, this timely and unique volume is the first of its kind to look at environmental policies and governance from the perspective of seven dynamic Asian countries. These include developed economies of Japan and Singapore, emerging giants such as China and India and rapidly developing nations such as Vietnam, Indonesia and Malaysia. The volume discusses environmental challenges that stem from issues as local as poor recycling practices, to ones that are as vast and complex as global climate change. Engaging, accessible, and pan-Asian in scope, the essays also present creative ways in which these challenges are being addressed. This book is valuable to anyone who is keen on understanding Asia, its growth, and whether its rise is environmentally sustainable.

**China's Technological Catch-Up Strategy** Michael T. Rock,Michael Toman,2015-02-09 Prior to 1979, China had a bifurcated and geographically-dispersed industrial structure made up of a relatively small number of large-scale, state-owned enterprises in various industries alongside numerous small-scale, energy-intensive and polluting enterprises. Economic reforms beginning in 1979 led to the rapid expansion of these small-scale manufacturing enterprises in numerous energy-intensive industries such as aluminum, cement, iron and steel, and pulp and paper. Subsequently, the government adopted a new industrial development strategy labeled grasp the large, let go the small. The aims of this new policy were to close many of the unprofitable, small-scale manufacturing plants in these (and other) industries, create a small number of large enterprises that could compete with OECD multinationals, entice these larger enterprises to engage in high-speed technological catch-up, and save energy. China's Technological Catch-Up Strategy traces the impact of this new industrial development strategy on technological catch-up, energy use, and CO2 emissions. In doing so, the authors explore several detailed, enterprise-level case studies of technological catch-up; develop industry-wide estimates of energy and CO2 savings from specific catch-up interventions; and present detailed econometric work on the determinants of energy intensity. The authors conclude that China's strategy has contributed to substantial energy and CO2 savings, but it has not led to either a peaking of or a decline in CO2 emissions in these industries. More work is needed to cap and reduce China's CO2 emissions.

**Ready for Takeoff?** Charles E. Schlumberger,Nora Weisskopf,2014-10-02 This book identifies the premises and prerequisites of the low-cost carriers (LCC) model, and assesses whether it could be successful in less-developed countries,

in particular in Sub-Saharan Africa. Specific attention is given to the impact of LCCs on traffic stimulation through lower fares, competition, and fare levels in the market.

**Biographical Memoirs** National Academy of Sciences,1995-02-01 Biographic Memoirs: Volume 67 contains the biographies of deceased members of the National Academy of Sciences and bibliographies of their published works. Each biographical essay was written by a member of the Academy familiar with the professional career of the deceased. For historical and bibliographical purposes, these volumes are worth returning to time and again.

**Mother Earth and Uncle Sam** Rena I. Steinzor,2009-05-21 In this compelling study, Rena Steinzor highlights the ways in which the government, over the past twenty years, has failed to protect children from harm caused by toxic chemicals. She believes these failures—under-funding, excessive and misguided use of cost/benefit analysis, distortion of science, and devolution of regulatory authority—have produced a situation in which harm that could be reduced or eliminated instead persists. Steinzor states that, as a society, we are neglecting our children's health to an extent that we would find unthinkable as individual parents, primarily due to the erosion of the government's role in protecting public health and the environment. At this pace, she asserts, our children will inherit a planet under grave threat. We can arrest these developments if a critical mass of Americans become convinced that these problems are urgent and the solutions are near at hand. By focusing on three specific case studies—mercury contamination through the human food chain, perchlorate (rocket fuel) in drinking water, and the effects of ozone (smog) on children playing outdoors—Steinzor creates an analysis grounded in law, economics, and science to prove her assertions about the existing dysfunctional system. Steinzor then recommends a concise and realistic series of reforms that could reverse these detrimental trends and serve as a blueprint for restoring effective governmental intervention. She argues that these recommendations offer enough material to guide government officials and advocacy groups toward prompt implementation, for the sake of America's—and the world's—future generations.

**The Thinkers** Assistant Professor of Political Science E J Fagan,2024-06-12 Increasing, political parties have adopted not only different policies, but different sets of facts. Information Wars examines the role of partisan think tanks in creating these alternate realities. Partisan think tanks such as the Heritage Foundation and Center for American Progress have become de facto formal party organizations, serving as close advisors and staff for the Republican and Democratic parties. It examines their impact on the policy process, polarization, and democracy. It also traces their development during American history, finding a close link between their activities and the growth of polarization in Congress. The book mixes historical analysis, qualitative case studies, and large-n quantitative analysis to examine the causes and consequences of the growth of partisan think tanks and their impact on American party politics--

**Routledge Handbook of Environmental Policy in China** Eva Sternfeld, 2017-06-12 During the last few decades, China has accomplished unprecedented economic growth and has emerged as the second largest economy in the world. This 'economic miracle' has led hundreds of millions of people out of poverty, but has also come at a high cost. Environmental degradation and the impact of environmental pollution on health are nowadays issues of the greatest concern for the Chinese public and the government. The Routledge Handbook of Environmental Policy in China focuses on the environmental challenges of China's rapidly growing economy and provides a comprehensive overview of the policies developed to address the environmental crisis. Leading international scholars and practitioners examine China's environmental governance efforts from an interdisciplinary perspective. Divided into five parts, the handbook covers the following key issues: Part I: Development of Environmental Policy in China - Actors and Institutions Part II: Key issues and Strategies for Solution Part III: Policy Instruments and Enforcement Part IV: Related Policy Fields - Conflicts and Synergies Part V: China's Environmental Policy in the International Context This comprehensive handbook will be an invaluable resource to students and scholars of environmental policy and politics, development studies, Chinese studies, geography and international relations.

**COVID-19 in South, West, and Southeast Asia** Mohd Mizan Aslam, Rohan Gunaratna, 2022-12-19 Aslam and Gunaratna bring together a broad analysis of the responses of states in Asia to the threats presented by the COVID-19 pandemic in its early phase. While the impact of the pandemic has undoubtedly been disastrous, it has also taught many lessons about social, political, economic, and security norms in modern civilization. The contributors to this book look at how these lessons have been learned—often the hard way—by a range of states including India, Pakistan, Sri Lanka, Singapore, Indonesia, Thailand, Brunei Darussalam, and Jordan, as well as by international organizations including ASEAN. They look at a range of issues, going beyond the most apparent healthcare concerns to also look at challenges such as the gig economy, terrorism, extremism, religious identity, and cybersecurity. Using these country-based case studies, this book establishes a framework for understanding these challenges and establishing best practice and scalable solutions for addressing them. A valuable resource for scholars and practitioners trying to understand how the world will and won't be changed by the impact of COVID-19, especially in the realms of security, society, and economy.

**Clean Air Issues in the 112th Congress** James E. McCarthy, 2011-04 Although air quality has improved substantially in the U.S. in the 40 years of the EPA's Clean Air Act regulation, many issues remain unresolved. Recently, members of Congress from both parties have raised questions regarding the cost-effectiveness of, and authority for, EPA actions. This

report focuses on three areas of likely interest to the 112th Congress: greenhouse gas regulations, emissions from power plants (including interstate pollution and mercury emissions), and air quality standards. Contents: Intro.; EPA's Greenhouse Gas Regulations; Legislation on Climate Change; Emissions from Power Plants; Clean Air Interstate Rule; Clean Air Mercury Rule; Air Quality Standards; Other Issues. Illustrations. This is a print on demand report.
