How to Fall in Love with Anyone Mandy Len Catron,2017-06-27 “A beautifully written and well-researched cultural criticism as well as an honest memoir” (Los Angeles Review of Books) from the author of the popular New York Times essay, “To Fall in Love with Anyone, Do This,” explores the romantic myths we create and explains how they limit our ability to achieve and sustain intimacy. What really makes love last? Does love ever work the way we say it does in movies and books and Facebook posts? Or does obsessing over those love stories hurt our real-life relationships? When her parents divorced after a twenty-eight year marriage and her own ten-year relationship ended, those were the questions that Mandy Len Catron wanted to answer. In a series of candid, vulnerable, and wise essays that takes a closer look at what it means to love someone, be loved, and how we present our love to the world, “Catron melds science and emotion beautifully into a thoughtful and thought-provoking meditation” (Bookpage). She delves back to 1944, when her grandparents met in a coal mining town in Appalachia, to her own dating life as a professor in Vancouver. She uses biologists’ research into dopamine triggers to ask whether the need to love is an innate human drive. She uses literary theory to show why we prefer certain kinds of love stories. She urges us to question the unwritten scripts we follow in relationships and looks into where those scripts come from. And she tells the story of how she decided to test an experiment that she’d read about—where the goal was to create intimacy between strangers using a list of thirty-six questions—and ended up in the surreal situation of having millions of people following her brand-new relationship. “Perfect fodder for the romantic and the cynic in all of us” (Booklist), How to Fall in Love with Anyone flips the script on love. “Clear-eyed and full of heart, it is mandatory reading for anyone coping with—or curious about—the challenges of contemporary courtship” (The Toronto Star).

Loves Me Not William J. O'Brien, Lesley Elliott, 2014-11-07 An essential guide for keeping relationships safe. In 2008, the horrific murder of Sophie Elliott by her former boyfriend and university lecturer, Clayton Weatherston, shocked New Zealand. During the police investigation it became clear Sophie's murderer was a typical abuser who had a track record of treating partners badly. Sophie's mother, Lesley Elliott, driven to research domestic and partner abuse, was astonished to find the very characteristics evident in abusive relationships were right there in Sophie's. Lesley quickly realised that if she and Sophie, 'through ignorance and naivety' missed the signs, then so could many others. It became obvious that education was the key; Lesley set up the Sophie Elliott Foundation to raise awareness among all young women, their friends and families to the signs of partner abuse. The Loves Me Not programme was developed by the Sophie Elliott Foundation along with the New Zealand Police and members of the Ministry of Social Development. Its primary aim is to help young people help themselves to keep safe. Loves Me Not includes advice and suggestions on how to identify problems, how to deal with them and where to seek help. Also included is 'One for the Boys', a chapter written by well-known clinical psychologist and commentator, Nigel Latta, as well as a chapter written by school guidance counsellor, Gayna McConnell.

The Things They Carried Tim O'Brien, 2009-10-13 A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school

classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

The Architecture of Happiness Alain de Botton, 2007-03-29 THE NUMBER ONE INTERNATIONAL BESTSELLER From one of our greatest voices in modern philosophy, author of *The Course of Love* and *The School of Life*, this book explores the fascinating hidden links between the buildings we live in and our long-term wellbeing. 'Engaging and intelligent . . . Full of splendid ideas, happily and beautifully expressed' Independent What makes a house truly beautiful? Why are many new houses so ugly? Why do we argue so bitterly about sofas and pictures - and can differences of taste ever be satisfactorily resolved? To answer these questions and many more, de Botton looks at buildings across the world, from medieval wooden huts to modern skyscrapers; he examines sofas and cathedrals, tea sets and office complexes, and teases out a host of often surprising philosophical insights. *The Architecture of Happiness* will take you on a beguiling tour through the history and psychology of architecture and interior design, and will change the way you look at your home. 'Alain de Botton takes big, complex subjects and writes about them with thoughtful and deceptive innocence' Observer 'Clever, provocative and fresh as a daisy' Literary Review

Assessment and Teaching of 21st Century Skills Patrick Griffin, Esther Care, 2014-10-21 This second volume of papers from the ATC21STM project deals with the development of an assessment and teaching system of 21st century skills. Readers

are guided through a detailed description of the methods used in this process. The first volume was published by Springer in 2012 (Griffin, P., McGaw, B. & Care, E., Eds., *Assessment and Teaching of 21st Century Skills*, Dordrecht: Springer). The major elements of this new volume are the identification and description of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. Features of the skills that need to be mirrored in their assessment are identified so that they can be reflected in assessment tasks. The tasks are formulated so that reporting of student performance can guide implementation in the classroom for use in teaching and learning. How simple tasks can act as platforms for development of 21st century skills is demonstrated, with the concurrent technical infrastructure required for its support. How countries with different languages and cultures participated and contributed to the development process is described. The psychometric qualities of the online tasks developed are reported, in the context of the robustness of the automated scoring processes. Finally, technical and educational issues to be resolved in global projects of this nature are outlined.

Medical Apartheid Harriet A. Washington, 2008-01-08 NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book. [Washington] has unearthed a shocking amount of information and shaped it into a riveting, carefully documented book. —New York Times From the era of slavery to the present day, starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, *Medical Apartheid* details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge—a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave-robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government's notorious Tuskegee experiment are revealed, as are similar, less-well-known medical atrocities conducted by the government, the armed forces, prisons, and private institutions. The product of years of prodigious research into medical journals and experimental reports long undisturbed, *Medical Apartheid* reveals the hidden underbelly of scientific research and makes possible, for the first time, an understanding of the roots of the African American health deficit. At last, it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers—and indeed the whole medical establishment—with such deep distrust.

Fundamentals of Electric Circuits Charles K. Alexander, Matthew N. O. The Praetorian STARShip : the untold story of the Combat Talon ,2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

The Secrets of the Self Muhammad Iqbal,2010-01-01 The Secrets of the Self is a book-length, philosophical poem rooted in metaphysical thought and ideology, as well as Islamic theology. Originally published in 1915, the poem speaks of the Self in relation to the universe, how it is the inner power and soul of each individual human. It instructs on how to improve the Self through Love and willpower, which can then help one control the forces within the universe. The poem includes stories that illustrate its points and promotes the spread of Islamic ideals. MUHAMMAD IQBAL (1877-1938) was a poet, prophet, and politician in British India. Born in Sialkot, Punjab, Iqbal converted to Islam with his family as a child. He studied literature and law at Cambridge, Munich, and Heidelberg before starting his own law practice and concentrating on his scholarly writing, which he authored primarily in Persian. Many of Iqbal's works promote Islamic revival, especially in South Asia, and he was a well-known leader of the All India Muslim League. Today, he is recognized as the official poet of Pakistan, and his birthday is celebrated as a national holiday.

Sound Of 1 Hand Out Of Print,1975-12-17 When The Sound of the One Hand came out in Japan in 1916 it caused a scandal. Zen was a secretive practice, its wisdom relayed from master to novice in strictest privacy. That a handbook existed recording not only the riddling koans that are central to Zen teaching but also detailing the answers to them seemed to mark Zen as rote, not revelatory. For all that, The Sound of the One Hand opens the door to Zen like no other book. Including koans that go back to the master who first brought the koan teaching method from China to Japan in the eighteenth century, this book offers, in the words of the translator, editor, and Zen initiate Yoel Hoffmann, the clearest, most detailed, and most correct picture of Zen that can be found. What we have here is an extraordinary introduction to Zen thought as lived thought, a treasury of problems, paradoxes, and performance that will appeal to artists, writers, and philosophers as well as Buddhists and students of religion.
