Gonzales,Nando Sigona,2017-07-06 Within and Beyond Citizenship brings together cutting-edge research in sociology and social anthropology on the relationship between immigration status, rights and belonging in contemporary societies of immigration. Themes, concepts and ideas covered include: The shifting position of the non-citizen in contemporary immigration societies; The intersection of human mobility, immigration control and articulations of citizenship; Activism and everyday practices of membership and belonging; Tension in policy and practice between coexisting traditions and regimes of rights; Mixed status families, belonging and citizenship; The ways in which immigration status (or its absence) intersects with social cleavages such as age, class, gender and 'race' to shape social relations. This book will appeal to academics and practitioners working in the disciplines of Social and Political Anthropology, Sociology, Social Policy, Human Geography, Political Sciences, Citizenship Studies and Migration Studies.

**Borderlines** Daniel Melo,2021-07-30 The current U.S. immigration nightmare is a product of capitalism. The familiar, heartbreaking stories of dangerous treks, migrant exploitation, asylum, family separation and detention all have their roots in the material conditions of the dominant economic system. Immigrants' place in American democracy has long been intertwined with questions of cheap labor and exploitation, sovereign power, and the preservation of class relations. Through different facets of the immigration system, *Borderlines* explores how power and profit are perpetuated by the divisions between migrant and citizen and the resulting dehumanization of both. It demonstrates the necessity of a radical working-class demand for economic and political justice across borders and the edges of democracy.

**Black Identities** Mary C. WATERS,2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

**Civic Education in the Twenty-First Century** Michael T. Rogers,Donald M. Gooch,2015-09-18 Imagine an America where politicians, governmental institutions, schools, new technologies, and interest groups work together to promote

informed, engaged citizens. *Civic Education in the Twenty-First Century* brings together scholars from various disciplines to show how such a United States is possible today. Inspired by Alexis de Tocqueville's analysis of American democracy in the early 1800s, this edited volume represents a multidimensional evaluation of civic education in its new and varied forms. While some lament a civics crisis in America today, *Civic Education in the Twenty-First Century* raises hope that we can have an informed and active citizenry. We find the activities of a number of politicians, government institutions, schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy. New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology. With *Civic Education in the Twenty-First Century*, we call for the United States to make these practices less isolated and more common throughout the country. The volume is broken into three major sections. First there are four chapters exploring the history and philosophical debates about civic education, particularly with respect to its role in America's educational institutions. Then, the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations. As some examples, this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement. This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry. Finally, the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education, engagement and our knowledge of them. From the virtual civics campus of Fort Hayes State to citizens' academies throughout the country, this section shows the possibilities for schools today to once again be civics actors and promoters.

Supernormal Stimuli: How Primal Urges Overran Their Evolutionary Purpose Deirdre Barrett, 2010-02-22 A Harvard psychologist explains how our once-helpful instincts get hijacked in our garish modern world. Our instincts—for food, sex, or territorial protection— evolved for life on the savannahs 10,000 years ago, not in today's world of densely populated cities, technological innovations, and pollution. We now have access to a glut of larger-than-life objects, from candy to pornography

to atomic weapons—that gratify these gut instincts with often-dangerous results. Animal biologists coined the term “supernormal stimuli” to describe imitations that appeal to primitive instincts and exert a stronger pull than real things, such as soccer balls that geese prefer over eggs. Evolutionary psychologist Deirdre Barrett applies this concept to the alarming disconnect between human instinct and our created environment, demonstrating how supernormal stimuli are a major cause of today’s most pressing problems, including obesity and war. However, Barrett does more than show how unfettered instincts fuel dangerous excesses. She also reminds us that by exercising self-control we can rein them in, potentially saving ourselves and civilization.

**Erasing Frankenstein** Elizabeth Effinger, 2024-07-23 Who gets to write poetry? Whose voices are made public? Whose voices are heeded? Erasing Frankenstein showcases a creative exchange between federally incarcerated women and members of the prison education think tank Walls to Bridges Collective at the Grand Valley Institution for Women in Kitchener, Ontario, and graduate and undergraduate students from the University of New Brunswick in Fredericton. Working collaboratively by long-distance mail, the artists and contributors made the first-ever poetic adaptation of Frankenstein, turning it into a book-length erasure poem, I or Us. An example of “found art,” an erasure poem is created by erasing or blacking out words in an existing text; what is left is the poem. The title reflects the nature of the project: participants have worked as “I”s, each creating their own erased pages, but together worked as an “us” to create a collaged “monster” of a

book. Erasing Frankenstein presents the original erasure poem I or Us alongside reflections from participants on the experience.

**Digital Youth** Kaveri Subrahmanyam, David Smahel, 2010-11-02 Youth around the world are fittingly described as digital natives because of their comfort and skill with technological hardware and content. Recent studies indicate that an overwhelming majority of children and teenagers use the Internet, cell phones, and other mobile devices. Equipped with familiarity and unprecedented access, it is no wonder that adolescents consume, create, and share copious amounts of content. But is there a cost? *Digital Youth: The Role of Media in Development* recognizes the important role of digital tools in the lives of teenagers and presents both the risks and benefits of these new interactive technologies. From social networking to instant messaging to text messaging, the authors create an informative and relevant guidebook that goes beyond description to include developmental theory and implications. Also woven throughout the book is an international sensitivity and understanding that clarifies how, despite the widespread popularity of digital communication, technology use varies between groups globally. Other specific topics addressed include: Sexuality on the Internet. Online identity and self-presentation. Morality, ethics, and civic engagement. Technology and health. Violence, cyberbullying, and victimization. Excessive Internet use and addictive behavior. This comprehensive volume is a must-have reference for researchers, clinicians, and graduate students across such disciplines as developmental/clinical child/school psychology, social psychology, media psychology, medical and allied health professions, education, and social work.
