The Great Stink of London Stephen Halliday, 2001-02-15 'An extraordinary history' PETER ACKROYD, The Times 'A lively account of (Bazalgette's) magnificent achievements. . . graphically illustrated' HERMIONE HOBHOUSE 'Halliday is good on sanitary engineering and even better on cloaca, crud and putrefaction . . . (he) writes with the relish of one who savours his subject and has deeply researched it. . . splendidly illustrated' RUTH RENDELL In the sweltering summer of 1858, sewage generated by over two million Londoners was pouring into the Thames, producing a stink so offensive that it drove Members of Parliament from the chamber of the House of Commons. The Times called the crisis 'The Great Stink'. Parliament had to act - drastic measures were required to clean the Thames and to improve London's primitive system of sanitation. The great engineer entrusted with this enormous task was Sir Joseph Bazalgette, who rose to the challenge and built the system of intercepting sewers, pumping stations and treatment works that serves London to this day. In the process, he cleansed the Thames and helped banish cholera. The Great Stink of London offers a vivid insight into Bazalgette's achievements and the era in which he worked and lived, including his heroic battles with politicians and bureaucrats that would transform the face and health of the world's then largest city.

[The Mark of the Dragonfly](#) Jaleigh Johnson, 2014-03-25 For fans of Frozen, The City of Ember, and The School of Good and Evil, the New York Times bestseller The Mark of the Dragonfly is a fast-paced adventure story about a mysterious girl and a fearless boy, set in a magical world that is both exciting and dangerous. Piper has never seen the Mark of the Dragonfly until she finds the girl amid the wreckage of a caravan in the Meteor Fields. The girl doesn't remember a thing

about her life, but the intricate tattoo on her arm is proof that she's from the Dragonfly Territories and that she's protected by the king. Which means a reward for Piper if she can get the girl home. The one sure way to the Territories is the 401, a great old beauty of a train. But a ticket costs more coin than Piper could make in a year. And stowing away is a difficult prospect—everyone knows that getting past the peculiar green-eyed boy who stands guard is nearly impossible. Life for Piper just turned dangerous. A little bit magical. And very exciting, if she can manage to survive the journey. Praise for *The Mark of the Dragonfly*: □ “This magnetic middle-grade debut...[is] a page-turner that defies easy categorization and ought to have broad appeal.”—Publishers Weekly, Starred □ “Heart, brains, and courage find a home in a steampunk fantasy worthy of a nod from Baum.”-- Kirkus Reviews, Starred □ “A fantastic and original tale of adventure and magic...Piper is a heroine to fall in love with: smart, brave, kind, and mechanically inclined to boot.”—School Library Journal, Starred “A complex and impeccably developed plot—there is plenty to recommend in this novel.”—The Bulletin “Appealing characters and lots of action make it a good choice for young adventure readers.”—Booklist

Behave Robert M. Sapolsky, 2017-05-02 Why do we do the things we do? Over a decade in the making, this game-changing book is Robert Sapolsky's genre-shattering attempt to answer that question as fully as perhaps only he could, looking at it from every angle. Sapolsky's storytelling concept is delightful but it also has a powerful intrinsic logic: he starts by looking at the factors that bear on a person's reaction in the precise moment a behavior occurs, and then hops back in time from there, in stages, ultimately ending up at the deep history of our species and its genetic inheritance. And so the first category of explanation is the neurobiological one. What goes on in a person's brain a second before the behavior happens? Then he pulls out to a slightly larger field of vision, a little earlier in time: What sight, sound, or smell triggers the nervous system to produce that behavior? And then, what hormones act hours to days earlier to change how responsive that individual is to the stimuli which trigger the nervous system? By now, he has increased our field of vision so that we are thinking about neurobiology and the sensory world of our environment and endocrinology in trying to explain what

happened. Sapolsky keeps going--next to what features of the environment affected that person's brain, and then back to the childhood of the individual, and then to their genetic makeup. Finally, he expands the view to encompass factors larger than that one individual. How culture has shaped that individual's group, what ecological factors helped shape that culture, and on and on, back to evolutionary factors thousands and even millions of years old. The result is one of the most dazzling tours de horizon of the science of human behavior ever attempted, a majestic synthesis that harvests cutting-edge research across a range of disciplines to provide a subtle and nuanced perspective on why we ultimately do the things we do...for good and for ill. Sapolsky builds on this understanding to wrestle with some of our deepest and thorniest questions relating to tribalism and xenophobia, hierarchy and competition, morality and free will, and war and peace. Wise, humane, often very funny, *Behave* is a towering achievement, powerfully humanizing, and downright heroic in its own right.

These Precious Days Ann Patchett, 2021-11-23 A BARACK OBAMA TOP BOOK OF 2021 'A heartfelt and witty collection of essays on everything from marriage and knitting to the inevitability of death' Guardian 'A pitch-perfect collection ... She can turn a sentence like no one else: her writing is clear, honest, witty, and just full of unsentimental humanity' Nigella Lawson 'Profound and clever and funny and wise' Meg Mason, author of *Sorrow & Bliss* _____ An irresistible collection of essays and memoir from the internationally bestselling, Women's Prize-winning author of *The Dutch House* 'Any story that starts will also end.' As a writer, Ann Patchett knows what the outcome of her fiction will be. Life, however, often takes turns we do not see coming. Patchett ponders this as she explores family, friendship, marriage, failure, success, and what it all means. Ranging from the personal - her portrait of the three men she called her fathers; how a chance encounter with Tom Hanks led to one of the most important friendships of her life; how to answer when someone asks why you don't have children - to the sublime - the unexpected influence of Snoopy; the importance of knitting; the pleasure to be found in children's books - each essay transforms the particular into the universal, letting us all see our own worlds anew. Illuminating, penetrating, funny and generous, *These Precious Days* is joyful time spent in the company of one of our greatest living authors. 'Patchett's essays are both sharp and humane ... like a hugely enjoyable conversation with a particularly brilliant friend' Sadie Jones

Regression Modeling Strategies Frank E. Harrell,2013-03-09 Many texts are excellent sources of knowledge about individual statistical tools, but the art of data analysis is about choosing and using multiple tools. Instead of presenting isolated techniques, this text emphasizes problem solving strategies that address the many issues arising when developing multivariable models using real data and not standard textbook examples. It includes imputation methods for dealing with missing data effectively, methods for dealing with nonlinear relationships and for making the estimation of transformations a formal part of the modeling process, methods for dealing with too many variables to analyze and not enough observations, and powerful model validation techniques based on the bootstrap. This text realistically deals with model uncertainty and its effects on inference to achieve safe data mining.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelect space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Percy Jackson and the Olympians, Book Three: Titan's Curse Rick Riordan, 2007-05 In this third book of the acclaimed series, Percy and his friends are escorting two new half-bloods safely to camp when they are intercepted by a mantichore and learn that the goddess Artemis has been kidnapped.

Americanized: Rebel Without a Green Card Sara Saedi, 2018-02-06 In development as a television series from Reese Witherspoon's Hello Sunshine production company and ABC Studios! This hilarious, poignant and true story of one teen's experience growing up in America as an undocumented immigrant from the Middle East is an increasingly necessary read in today's divisive world. Perfect for fans of Mindy Kaling and Trevor Noah's books. "Very funny but never flippant, Saedi mixes '90s pop culture references, adolescent angst and Iranian history into an intimate, informative narrative." —The New York Times At thirteen, bright-eyed, straight-A student Sara Saedi uncovered a terrible family secret: she was breaking the law simply by living in the United States. Only two years old when her parents fled Iran, she didn't learn of her undocumented status until her older sister wanted to apply for an after-school job, but couldn't because she didn't have a Social Security number. Fear of deportation kept Sara up at night, but it didn't keep her from being a teenager. She desperately wanted a green card, along with clear skin, her own car, and a boyfriend. *Americanized* follows Sara's progress toward getting her green card, but that's only a portion of her experiences as an Iranian-American teenager. From discovering that her parents

secretly divorced to facilitate her mother's green card application to learning how to tame her unibrow, Sara pivots gracefully from the terrifying prospect that she might be kicked out of the country at any time to the almost-as-terrifying possibility that she might be the only one of her friends without a date to the prom. This moving, often hilarious story is for anyone who has ever shared either fear. Seven Times Smarter Laurel Schmidt, 2007-12-18 What Is Smart? There's evidence of so much more than reading, writing, and 'rithmetic in every child -- at least seven distinct intelligences, according to the theory of multiple intelligences, developed by Harvard's Dr. Howard Gardner. In *Seven Times Smarter*, veteran educator Laurel Schmidt offers a parent-friendly explanation of this theory and of the ways that kids are -- simply put -- word smart, picture smart, music smart, body smart, logic smart, people smart, and self-smart. These intelligences aren't fixed at birth. They can be nurtured and strengthened, meaning that in the right environment, kids get smarter. *Seven Times Smarter*, an invaluable resource for parents, teachers, and caregivers, provides the perfect way to create this environment. Unlike other craft or activity books that just fill time and keep kids busy, *Seven Times Smarter* prompts kids aged six to fourteen to work their brains and cultivate new skills using recycled or low-cost materials found in every home -- and enjoy it! It offers an exploration of what it means to be smart, checklists to recognize the seven intelligences in your child, book lists to develop and celebrate all the ways your child is smart, and fifty creative, constructive activities that are good for kids playing alone or in a group, supervised or independently, including: * Memory Tours -- If a memory book is too straightforward for your artistic child, try an un-book, a memory box, or a calendar. * Hanging Gardens -- Indoors or out, even the smallest garden plot can yield a bumper crop of mathematical, linguistic, scientific, and kinesthetic skills. * The Boredom Brigade -- Boredom is a springboard for imagination; imaginary structures, identities, occupations, and friends are just some of the ways kids develop their inter- and intra-personal intelligences. * Junk Yard Genius -- There's an education in junk; in fact, it's easy to turn your broken radio, alarm clock, fan, blow-dryer, or scale into a project that could fascinate kids for days.
