*A Text-Book of the History of Sculpture* Allan Marquand,2015-06-04 Excerpt from A Text-Book of the History of Sculpture  
The object of this volume is to provide students in schools and colleges with a concise survey of the history of sculpture, so that they may be able to comprehend intelligently the sculpture of the past and the present in the countries with which our own civilization has been and is most intimately connected. It has seemed unnecessary to treat of prehistoric sculpture in general; its connection with the flow of civilization is at present too remote and ill defined. Nor have we entered upon the history of Saracenic, Indian, Chinese, and Japanese sculpture, although all of these have had some influence on European art. The various phases of Oriental art are, from an historical standpoint, in great measure still a mystery to the Western world. This is equally true of the art of the semi-civilized nations whose influence once spread so widely upon our own hemisphere. That portion of the general history of sculpture which comes within our survey is itself imperfectly known. In some countries it has been easy to trace the general development of the art; in others, the lack of systematic scientific study still hides from us most important treasures. The history of sculpture can be studied best with the assistance of casts and photographs. In the absence of the originals, these are preeminently the source upon which we must rely. **A History of Sculpture** Ernest H. Short, 2015-06-02 Excerpt from A History of Sculpture Much that might properly occur in the preface of this book will be found in its opening chapter. I there set out the ground to be covered, and define the point of view from which I have treated my facts. These few remarks will, accordingly, be addressed to any who may think that a work bearing the title A History of Sculpture requires a word of introduction. My justification for the title and, indeed, for the work as a whole, is that I have not attempted to write a new text-book. In my view, all great art is essentially national art. It can therefore only be understood in the light of national and international history. For this reason, I have given much more attention to the artistic interpretation of historical events and social circumstances than most historians of the arts have deemed necessary. Throughout I have written from the standpoint of one who believes that the great schools of sculpture were created, not by individuals of genius, but by the peoples to whom they appealed. A work written on these lines can fairly claim to be A History of Sculpture. This general scheme has entailed several consequences. A History of Sculpture (Classic Reprint) Harold North Fowler, 2017-10-18 Excerpt from A History of Sculpture It has not been my purpose to compile a dictionary of sculptors, but I have included in the book a considerable number of names, believing that the usefulness of the book would be thereby increased, though I am quite aware that some of the names I have omitted, especially in the chapters on modern sculpture, may be no less important than some of those that I have mentioned. A choice had to be made, and I have chosen as best I could. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Calder is strangely drawn to the sculpture, while other people have less-than-friendly feelings towards it. Both the boy and the sculpture seem to be out of place . . . and then, on the same night, they disappear! Calder's friends Petra and Tommy must fly out to help his father find him. But this mystery has more twists and turns than a Calder mobile . . . with more at stake than first meets the eye.

*Art Themes* Marjorie Cohee Manifold,2017-11-20 Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as artists. You will be taught about a variety of art themes, genres, materials, and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media, as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings, and processes, while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning, by understanding better the art others create, as well as making it yourself.
