**Neuropsychiatric Disorders** Koho Miyoshi,Yasushi Morimura,Kiyoshi Maeda,2014-11-02 Around the world societies are facing growing aging populations with the concomitant increase in neuropsychiatric disorders. Neuropsychiatric disorders are organic brain diseases with psychiatric symptoms, as in Alzheimer's and Parkinson's diseases, that cause cognitive impairment, including dementia, amnesic syndrome, and personality-behavioral changes. As a clinical science, neuropsychiatry aims to explore the complex interrelationship between behavior and brain function from a variety of perspectives, including those of psychology, neurology, and psychiatry. This concise and updated monograph comprises the latest findings in the field and includes chapters on delusional symptoms, mood disorders and neurotic symptoms, cognitive impairment, behavioral and personality changes, and recently, cerebral alterations revealed in PTSD patients and in endogenous psychoses through neuroimaging and neuropathology. These findings will certainly widen the realm of neuropsychiatry going forward and will prove of great value to specialists as well as to academics and trainees in neurology, psychiatry, neuropsychology, neuroradiology, neuropathology, neurophysiology, neurochemistry, and clinical genetics. Ultimately, neuropsychiatry aims to prevent and reduce the suffering of individuals with the psychiatric symptoms of cerebral disorders.

*Human Vaccines* Kayvon Modjarrad, Wayne C. Koff, 2016-10-15 *Human Vaccines: Emerging Technologies in Design and Development* discusses the advances in molecular biology, biophysics, and informatics—among other disciplines—that have provided scientists with the tools to create new vaccines against emerging and re-emerging pathogens. For example, the virus-like particle technologies that led to licensing of highly efficacious HPV vaccines have only come into full realization in the last 10 years. Their success has, in turn, accelerated the pace with which nanoparticle vaccines are being developed. Given the rapidity with which the field is changing and the absence of any text documenting this change, there is a need for a resource that surveys these new vaccine technologies, assesses their potential, and describes their applications. This book provides that resource and complements traditional vaccinology books, but also serves as an excellent standalone for researchers and students with basic knowledge in immunology. - Introduces new topics in vaccine immunology in the context vaccine design and production - Consolidates the growing body of knowledge on new vaccine technologies that have only emerged in the past 2 - 3 decades - Reviews the currently licensed vaccines that have utilized leading-edge technologies and how this has translated into improved efficacy and safety - Provides a broad overview of innovative vaccine technologies, including immunological aspects

*The Washington Manual Nephrology Subspecialty Consult* David Windus, 2008 Written by residents, fellows, and attending physicians, this thoroughly updated handbook is ideal for residents called on to do an inpatient consult, for students working on an inpatient medicine service, and for specialists seeking information on nephrology and general

internal medicine management. The book covers inpatient and outpatient approaches, symptoms and diseases, and acute and chronic problems with the same front-lines practicality as the world-famous Washington Manual® of Medical Therapeutics. Sections cover general approaches to kidney disease; electrolytes and acid-base disorders; acute kidney injury and continuous renal replacement; causes of kidney disease; pregnancy and nephrolithiasis; and chronic kidney disease. Appendices list dosing adjustments for antimicrobials and antiretrovirals for patients with renal impairment. Key points about the diagnosis and management of disorders are bulleted for easy reference. This edition also includes illustrations. The Washington Manual® is a registered mark belonging to Washington University in St. Louis to which international legal protection applies.
