Victims of the Book François Proulx,2019-11-08 Victims of the Book uncovers a long-neglected but once widespread subgenre: the fin-de-siècle novel of formation in France. Novels about and geared toward adolescent male readers were imbued with a deep worry over young Frenchmen's masculinity, as evidenced by titles like *Crise de jeunesse* (Youth in Crisis, 1897), *La Crise virile* (Crisis of Virility, 1898), *La Vie stérile* (A Sterile Life, 1892), and *La Mortelle Impuissance* (Deadly Impotence, 1903). In this book, François Proulx examines a wide panorama of these novels, many of which have rarely been studied, as well as polemical essays, pedagogical articles, and medical treatises on the perceived threats posed by young Frenchmen's reading habits. Against this cultural backdrop, he illuminates all that was at stake in representations of the male reader by prominent novelists of the period, including Jules Vallès, Paul Bourget, Maurice Barrès, André Gide, and Marcel Proust. In the final decades of the nineteenth century, social commentators insistently characterized excessive reading as an emasculating illness that afflicted French youth. Fin-de-siècle writers responded to this pathologization of reading with a profusion of novels addressed to young male readers, paradoxically proposing their own novels as potential cures. In the early twentieth century, this corpus was critically revisited by a new generation of writers. Victims of the Book shows how Gide and Proust in particular reworked the fin-de-siècle paradox to subvert cultural norms about literature and masculinity, proposing instead a queer pact between writer and reader.

Attachment Ross A. Thompson,Jeffry A. Simpson,Lisa J. Berlin,2021-04-23 Nine central issues relevant to attachment theory and research constitute this volume: Defining attachment and attachment security, Measuring the security of attachment, The nature and functioning of internal working models, Stability and change in attachment security, Influence of early attachment, Culture and attachment, Separation and loss, Attachment-based interventions, and Attachment, systems, and services. This is a time of widening interest in attachment theory, and this book exists alongside others that provide perspective on the field as a whole. The authors of these chapters have synthesized their views into fresh perspectives that,

juxtaposed with others addressing the same questions, offer novel and useful insights into the current status of attachment theory and research, and perspective on its future--

Information Theory, Inference and Learning Algorithms David J. C. MacKay,2003-09-25 Information theory and inference, taught together in this exciting textbook, lie at the heart of many important areas of modern technology - communication, signal processing, data mining, machine learning, pattern recognition, computational neuroscience, bioinformatics and cryptography. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse-graph codes for error-correction. Inference techniques, including message-passing algorithms, Monte Carlo methods and variational approximations, are developed alongside applications to clustering, convolutional codes, independent component analysis, and neural networks. Uniquely, the book covers state-of-the-art error-correcting codes, including low-density-parity-check codes, turbo codes, and digital fountain codes - the twenty-first-century standards for satellite communications, disk drives, and data broadcast. Richly illustrated, filled with worked examples and over 400 exercises, some with detailed solutions, the book is ideal for self-learning, and for undergraduate or graduate courses. It also provides an unparalleled entry point for professionals in areas as diverse as computational biology, financial engineering and machine learning.

Water Quality Field Guide ,1983 The purposes of this guide are to provide information to Soil Conservation Service (SCS) Field Office Personnel on the control of nonpoint sources of pollution from agricultural lands and to incorporate a water quality perspective into all conservation planning. Nonpoint source pollution is both a relatively concern and a complex phenomenon with many unknowns. Knowing the extent to which agricultural sources contribute to the total pollution load, the extent to which various control practices decrease this load, and the effect of reducing the pollutants delivered to a water body are basic to the achievement of water quality.--Page 3

Using Technology with Classroom Instruction That Works Howard Pitler,Elizabeth R. Hubbell,Matt Kuhn,2012-08-02 Technology is ubiquitous, and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most

appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples—across grade levels and subject areas, and drawn from real-life lesson plans and projects—of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and—most of all—more effective.

This volume presents and discusses current trends and issues in technology-enhanced learning from a European research and development perspective. This multifaceted and multidisciplinary topic is considered from four different viewpoints, each of which constitutes a separate section in the book. The sections include general as well as domain-specific principles of learning that have been found to play a significant role in technology-enhanced environments, ways to shape the environment to optimize learners' interactions and learning, and specific technologies used by the environment to empower learners. An additional section discusses the work presented in the preceding sections from a computer science perspective and an implementation perspective. This book comes out of the work in Kaleidoscope: a European Network of Excellence in which over 1,000 people from more than 90 institutes across Europe participate. Kaleidoscope brings together researchers from diverse disciplines and cultures, through their collaboration and sharing of scientific outcomes, they are helping move the field of technology-enhanced learning forward.

City of Clowns Daniel Alarcón, 2015-11-03 A gorgeously rendered graphic novel of Daniel Alarcón's story City of Clowns. From the author of The King Is Always Above the People, which was longlisted for the 2017 National Book Award for Fiction. Oscar "Chino" Uribe is a young Peruvian journalist for a local tabloid paper. After the recent death of his philandering father, he must confront the idea of his father's other family, and how much of his own identity has been shaped by his father's murky morals. At the same time, he begins to chronicle the life of street clowns, sad characters who populate the violent and corrupt city streets of Lima, and is drawn into their haunting, fantastical world. This remarkably affecting story by Daniel Alarcón was included in his acclaimed first book, War by Candlelight, and now, in collaboration with artist Sheila Alvarado, it takes on a new, thrilling form. This graphic novel, with its short punches of action and images, its stark contrasts between light and dark, truth and fiction, perfectly corresponds to the tone of Chino's story. With the city of Lima as a character, and the bold visual language from the story, City of Clowns is moving, menacing, and brilliantly vivid.

Interactive Lecture Demonstrations David R. Sokoloff, Ronald K. Thornton, 2006-09-18 Interactive Lecture Demonstrations (ILDs) are designed to enhance conceptual learning in physics lectures through active engagement of students in the learning process. Students observe real physics demonstrations, make predictions about the outcomes on a prediction sheet, and collaborate with fellow students by discussing their predictions in small groups. Students then examine the results of the live demonstration (often displayed as real-time graphs using computer data acquisition tools), compare these results with their predictions, and attempt to explain the observed phenomena. ILDs are available for all of the major topics in the introductory physics course and can be used within the traditional structure of an introductory physics course. All of the printed materials needed to implement them are included in this book.
