The Woodwright's Workbook Roy Underhill,2012-01-01 Roy Underhill is America's best-known master of traditional woodcraft. Creator of the popular PBS series *The Woodwright's Shop*, Roy has inspired millions--from professional craftsman to armchair woodworker--with his talent, knowledge, and enthusiasm. Roy returns here with his third book. *The Woodwright's Workbook* features step-by-step instructions for a selection of projects from his television series. All projects are illustrated with photographs and measured drawings. Included here are plans for tool chests, workbenches, lathes, and historical reproductions of items for the home: a six-board chest, rustic chairs with cattail seats, a churn for the kitchen, and the Rittenhouse hygrometer. Roy also explores building barns, forges, boats, and even colonial fortresses. A wonderful feature of this book is Roy's own translation of the humorous fifteenth-century poem *The Debate of the Carpenter's Tools*. He also provides a fascinating and useful 'field guide' to American tool marks that shows how to identify the specific tool used by the marks it left. Whether Roy is an old friend or a new acquaintance, let him be your guide to the world of traditional woodworking.

David Vizard's How to Port and Flow Test Cylinder Heads David Vizard,2012 Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.
