NASA Operations Manual Dr. David Baker, 2018-10-30 Established in 1958 in response to Russia's Sputnik 1, launched on 4 October as the world's first artificial satellite, NASA - the National Aeronautics and Space Administration - emerged out of the National Advisory Committee for Aeronautics which had been formed in 1915. The NASA Operations Manual tells the story of America's civilian space agency, the facilities it operates, where they are and what they do. It explains how much

NASA costs the American taxpayer and looks at what it returns to the taxpayer in benefits to the economy. NASA has forged a niche in modern history that extends beyond the realisation of age-old dreams to leave Earth and explore the heavens - it has become a synonym for achievement, performance and greatness, in setting goals and achieving them, in failing and learning how to recover, in connecting people around the world with international programmes to explore our solar system and live our ambitions, and in improving the lives of people everywhere through its inventions, discoveries, its technology and its engineering. Sixty years after NASA took hold of the reins of US civilian space programmes, the agency has a bold vision for great and ambitious goals, taking humans back to the Moon and on to Mars, perhaps visiting an asteroid, or setting up an interplanetary transport system on the way. And all the time, providing inspiration for a new generation. With more than 300 photographs, line drawings and charts, this book tours the United States, describing the centres of excellence and the facilities where rockets are tested, satellites are built and humans prepare for space. With summary review of research laboratories, test rigs, experimental platforms and engineering facilities, this book describes the 60 years of NASA as it has evolved through changing requirements and expanding capabilities, building on the past and preparing for a bold future.

Castellotti Cesare De Agostini, 2002-09 A driver of great courage, a young man full of life generous: Eugenio Castellotti lived just 26 years and five months - not much more than James Dean - and was a symbol of a love of motor racing, of challenge and risk. A victory of heart over reason was what they called his greatest success, the 1956 Mille Miglia win and it is to the beat of his heart that most of his brief existence is inexorably linked. A life which, for the first time, has been reconstructed after vast detailed research and is now a new book, published simultaneously by Giorgio Nada Editore in two versions, Italian and English. The author is Cesare De Agostini, one of the best-known motor sport writers, who has also given us the biographies of Tazio Nuvolari, Gilles Villeneuve and Clay Regazzoni, three authentic best sellers. His elegant writing style, rich with poetic inflection, goes well the mere chronological reconstruction of Castellotti's life. He digs deep into the soul of the man, to enable the reader to participate not only in the facts but also the feelings, the passions, the emotions of this young man. This new book is complemented by an extraordinary collection of photographs, brought together by Gianni Cancellieri: beautiful pictures, many of them unpublished, that come from private collections and some of the most prestigious archives in Europe and America.
