Behaviour: The Lost Modules Jen Foster,2023-09-02 Oh hey! Thank you for being here. Let me introduce myself. My name is Jen Foster and I am an educator. A few years ago, I started an Instagram account dedicated to teaching. I started by just sharing everything and anything and loving having a community of keen beans like me. But it didn't take me long to spot something quite odd. Scrolling through thousands of teachers' experiences around the world there were two things that stood out like a sore thumb: Behaviour was this huge obstacle in teaching;The guidance around behaviour was either inconsistent, vague or unhelpful. So, I decided to learn everything I could about behaviour. I explored outside the education shelves and bought way too many books about neuroscience, positive psychology, business, and parenting. The more I learnt, the more I reflected on my own practice and my own experiences in schools. I asked educators in my community their opinions on behaviour, and this is what I found out: 93% felt that they had inadequate behaviour training as a trainee teacher 88% feel they have inadequate behaviour training as a qualified teacher So, isn't it about time we shined a spotlight on behaviour? Behaviour: The lost Modules is the book you wish you had read before stepping into a classroom. The book you wish had been required reading on your university reading list. A book that is practical, easy to read and tells you what you need to know about behaviour in primary schools. A book by a teacher for teachers, drawing on common sense, personal experiences and current research.

Increasing teachers understanding and skills around emotional development can prevent many long term mental health difficulties in our schools and in our communities. Key topics such as attachment theory, emotion coaching, tackling disruptive behaviour and the trauma continuum are introduced and explained, with advice and tips for a classroom setting offered throughout. The experiences of practitioners in the field are presented

alongside those of researchers, offering a range of diverse perspectives including education, psychology and health. This is an essential text for trainee and practising teachers.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and

Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
