Unsettled Topics in the General Aviation Autonomy Landscape Anna Mracek Dietrich,2022-02-24 The extent of automation and autonomy used in general aviation (GA) has been accelerating dramatically. This has huge potential benefits for safety given that 75% of accidents in personal and on-demand GA are due to pilot error. However, an approach to certifying autonomous systems that relies on reversionary modes limits their potential to improve safety. Placing a human pilot in a situation where they are suddenly tasked with flying an airplane in a failed situation, often without sufficient situational awareness, is overly demanding. This, coupled with advancing technology that may not align with a deterministic certification paradigm, creates an opportunity for new approaches to certifying autonomous and highly automated aircraft systems. Unsettled Topics in the General Aviation Autonomy Landscape discusses how these new approaches must account for the multifaceted aviation approach to risk management which has interlocking requirements for airworthiness and operations (including training and airspace integration). If implemented properly, autonomy can take GA safety to the next level while simultaneously increasing the number and variety of aircraft and transportation options they provide. The Ministry of Public Input J. Lees-Marshment,2015-01-13 As political leaders acknowledge the limits of their power they increasingly integrate constructive input from inside and outside government into their decision-making. A Ministry or Commission of Public Input is necessary to collect, process and communicate input more effectively and politicians need to work with the public to identify solutions.

Multiplayer Online Games Guo Freeman,2018-02-12 Multiplayer Online Games (MOGs) have become a new genre of play culture, integrating communication and entertainment in a playful, computer-mediated environment that evolves through user interaction. This book comprehensively reviews the origins, players, and social dynamics of MOGs, as well as six major empirical research methods used in previous works to study MOGs (i.e., observation/ethnography, survey/interviews, content and discourse analysis, experiments, network analysis, and case studies). It concludes that MOGs represent a highly sophisticated, networked, multimedia and multimodal Internet technology, which can construct entertaining, simultaneous, persistent social virtual worlds for gamers. Overall, the book shows that what we can learn from MOGs is how games and gaming, as ubiquitous activities, fit into ordinary life in today's information society, in the moments where the increased use of media as entertainment, the widespread application of networked information technologies, and participation in new social experiences intersect. Key Features: Contains pertinent knowledge about online gaming: its history, technical features, player characteristics, social dynamics, and research methods Sheds light on the potential future

of online gaming, and how this would impact every aspect of our everyday lives - socially, culturally, technologically, and economically Asks promising questions based on cutting-edge research in the field of online game design and development

Public Health in the Context of Life-Limiting Illnesses: Patient-Centered Care in Advanced and Life-Limiting Illnesses

Mevhibe Hocaoglu,Richard John Siegert,Rebecca Jarden,Margaret Sandham,Irene Higginson,2024-08-01 It is estimated that at least 60% of persons dying have a prolonged advanced illness. The need for palliative and end-of-life care will increase due to the rapidly aging world population and the increase of multiple long-term conditions. For these reasons, palliative care is an integral part of public health and public health strategies. Palliative care as holistic person-centered care and has played a critical role in the recent public health emergency of the COVID-19 pandemic. There is a close association between public health, health promotion, and palliative care, and this research topic will highlight this association. Through a series of multi-disciplinary articles, we will explore public health in the context of life-limiting illnesses contributing to shaping person-centered care, including palliative, end-of-life, and rehabilitation. This research topic will discuss advanced and life-limiting illness as a public health challenge and explore the role of palliative and end-of-life care including rehabilitation in shaping person-centered care.

Public Health Jacek Czepiel,Alicja Domagała,Mariusz Duplaga,Tomasz Grodzicki,Janusz Hałuszka,Grażyna Jasieńska,Justyna Klingemann,Iwona Kowalska-Bobko,Andrzej Ryś,Monika Ścibor,Marzena Tambor,Beata Tobiasz-Adamczyk,Piotr Tyszko,2024-06-17 In Poland, for almost three decades, education in the field of public health has been provided in medical universities with the aim of creating an expert workforce to ensure appropriate action in this area. The book draws on the experience and knowledge of teachers associated with the School of Public Health of the Jagiellonian University - undoubtedly a leading institution in the country in this area - but experts from other centres also were invited in order to provide content of an appropriately high quality. (...) The textbook on public health, edited by professor Stanisława Golinowska, is highly recommended not only to medical university students, but also to all persons involved in health protection activities in Poland. For all interested in public health, this is must-read. Prof. Zbigniew Gaciong, MD, Medical University of Warsaw This textbook perfectly addresses the health challenges of the contemporary stage of civilization development in which public health is becoming an extremely complex and at the same time, dynamically evolving field. The scope of the textbook is clearly defined and its division into chapters and within them, into sections dedicated to specific issues, facilitates the search for the required content. The textbook also provides a wholesome understanding of public health, which covers the theoretical foundations, an overview of problems and challenges, as well as a description of the tools

used both in research and in public policy at multiple levels: global, European, national and local. Prof. Andrzej M. Fal, Wrocław Medical University, President of the Polish Society of Public Health

The International Community and Statebuilding Patrice McMahon, Jon Western, 2012-02-07 This book brings together policymakers and academics to analyse the international community's performance in post-war statebuilding projects. In the past twenty years, statebuilding has emerged as a centerpiece of international efforts to stabilize violent conflicts. From the Balkans, to Iraq, to Afghanistan, it has become widely accepted that statebuilding—defined as the development of transparent and accountable political institutions, stable and sustainable economic structures, professional public administrations, and civilian-controlled security services—is essential to the long-term stability of post-conflict settlements. *The International Community and Statebuilding* brings together senior-level policymakers and academics in order to analyse the international community's performance in post-war statebuilding projects. Filling an important gap in the existing body of work on this topic, the contributors explore how international state builders have attempted to negotiate the intersections of multilateralism, competing strategic priorities and agendas, organizational complexity, and domestic politics. This book will be of much interest to students of statebuilding, peacebuilding, war and conflict studies, and International Relations in general.

The Road to Freedom Arthur C. Brooks, 2012-05-08 Entrepreneurship, personal responsibility, and upward mobility: These traditions are at the heart of the free enterprise system, and have long been central to America's exceptional culture. In recent years, however, policymakers have dramatically weakened these traditions -- by exploding the size of government, propping up their corporate cronies, and trying to reorient our system from rewarding merit to redistributing wealth. In *The Road to Freedom*, American Enterprise Institute President Arthur C. Brooks shows that this trend cannot be reversed through materialistic appeals about the economic efficiency of capitalism. Rather, free enterprise requires a moral defense rooted in the ideals of earned success, equality of opportunity, charity, and basic fairness. Brooks builds this defense and demonstrates how it is central to understanding the major policy issues facing America today. The future of the free enterprise system has become a central issue in our national debate, and Brooks offers a practical manual for defending it over the coming years. Both a moral manifesto and a prescription for concrete policy changes, *The Road to Freedom* will help Americans in all walks of life translate the philosophy of free enterprise into action, to restore both our nation's greatness and our own well-being in the process.

Services of General Interest Beyond the Single Market Markus Krajewski, 2015-06-23 This is the first book ever to assess comprehensively the impact of EU international agreements on services of general interest. Services of general interest remain high on the political and legal agenda of the European Union. However, the debates about the impact of EU law on services of general interest usually focus on internal market law such as the free movement of services, competition law,

state aid rules and the law of public procurement. The external and international dimensions of the European legal framework for services of general interest are often overlooked. This book addresses the impact of international trade and investment agreements on public services and the role these services play in EU external relations. It shows that the inherent tension between establishing and securing undistorted competition on markets and the logic of public services exists in international economic law in a similar way as in EU internal law. Given the contentiousness of international trade and investment agreements as well as the EU's external policies, the issues discussed in this volume are timely and relevant and contribute to the ongoing debate about the future of services of general interest in the EU with fresh ideas and perspectives. Markus Krajewski is Professor of Public and International Law at the University of Erlangen-Nuremberg, Germany.

Privacy in the Digital Age Nancy S. Lind, Erik T. Rankin, 2015-06-19 A collection of expert essays examines the privacy rights that have been lost in the post-9/11 era—giving students and others the knowledge they need to take back their constitutional protections. This timely two-volume collection shares information every citizen should have, tackling the erosion of privacy rights engendered by the ability of digital technology to intercept, mine, and store personal data, most often without the knowledge of those being monitored. Examining its subject through the lens of Fourth Amendment rights, the work focuses on technological advances that now gather personal data on an unprecedented scale, whether by monitoring social media, tracking cell phones, or using thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google. Organized by hot-button topics confronting U.S. citizens in the post-9/11 era, the work reviews the original intent of the Fourth Amendment and then traces the development and erosion of interpretations of that amendment in the 21st century. Topical essays offer a comprehensive treatment and understanding of current Fourth Amendment issues, including those that have been brought before the courts and those relative to the continuing governmental and societal emphasis on security and public safety since the Columbine shootings in 1999 and the events of September 11, 2001.

Young People and Housing Ray Forrest, Ngai-ming Yip, 2013 *Young People and Housing* brings together new research exploring the economic, social, and cultural challenges that face young people in search of permanent housing. Featuring international case studies from Asia, Europe, and Australia, *Young People and Housing* is a collection of groundbreaking work from leading scholars in housing policy. Younger generations across a wide range of societies face increasing difficulties in gaining access to housing. Housing occupies a pivotal position in the transition from parental dependence to adult independence. Delayed independence has significant implications for marriage and family formation, fertility, inter and intra generational tensions, social mobility and social inequalities. The social and cultural dimensions are, of course, enormously varied with strong contrasts between Asian and Western societies in terms of intergenerational norms and

practices in relation to housing. Nevertheless, younger households in China (including Hong Kong), Japan, the USA, Australasia and Europe face very similar challenges in the housing sphere. Moreover, concerns about the housing future for younger generations are gaining greater policy and popular prominence in many countries.

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011, scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research, but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus (hereafter referred to as the H5N1 virus) that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility: the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response, a series of international discussions on the nature of dual-use life science arose. These discussions addressed the complex social, technical, political, security, and ethical issues related to dual-use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives.

Food Fortification in a Globalized World M.G.Venkatesh Mannar, Richard F. Hurrell, 2018-06-29 Food Fortification in a Globalized World outlines experiences over the past 50 years—and future potential—for the application of food fortification across a variety of foods in the industrialized and developing world. The book captures recent science and applications trends in fortification, including emerging areas such as biofortification, nutraceuticals and new nutrient intake recommendations, standards, policy and regulation. The book proposes a balanced and effective food fortification strategy for nations to adopt. In covering the most technical scientific details in an approachable style, this work is accessible to a range of practitioners in industry, government, NGOs, academia and research. Food fortification has become an increasingly significant strategy to address gaps in micronutrient intakes in populations with measurable impact in both industrialized and developing countries. While the positive impacts are well recognized there are new concerns in some countries that excessive fortification of foods, outdated nutritional labeling rules and misleading marketing tactics used by food manufacturers may result in young children consuming harmful amounts of some vitamins and minerals. - Presents the latest science on fortification for the prevention of micronutrient deficiencies - Includes emerging areas such as biofortification, nutraceuticals and new nutrient intake recommendations, standards, regulations, practices and policies from around the world - Summarizes evidence of application of food fortification and measured impact on public health - Discusses how public policy impacts fortification of foods and nutritional deficiencies - Considers the complex economics of and market for fortified foods

Expanding the Donor Base in Higher Education Noah D. Drezner, 2013-04-17 Winner of the Association of Fundraising Professionals 2014 Skystone Partners Research Prize in Philanthropy and Fundraising Traditionally, institutions have relied

on wealthy White men to reach their fundraising goals. But as state investment in public higher education lessens and institutions look to philanthropy to move from excellence to eminence, advancement officers continually need to engage all populations, including many that have historically been excluded from fundraising strategies. Based on theory, research, and past practice, *Expanding the Donor Base in Higher Education* explores how colleges and universities can build culturally sensitive fundraising and engagement strategies. This edited book presents emerging research on different communities that have not traditionally been approached for fundraising—including Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) alumni, African Americans, Latinos, graduate students, young alumni, women, and faculty donors. Chapters discuss and analyze successful programs and provide practical suggestions and strategies to create and implement fundraising programs that engage these new donor populations. *Expanding the Donor Base in Higher Education* is an essential resource for any institution looking to expand their pool of donors and cultivate a more philanthropic mindset among alumni and students.
