Anne Frank Anne Frank, 1972 Traces the life of a young Jewish girl who kept a diary during the two years she and her family hid from the Germans in an Amsterdam attic.

Building Information Modeling For Dummies Stefan Mordue, Paul Swaddle, David Philp, 2015-10-02 Everything you need to make the most of building information modeling If you're looking to get involved in the world of BIM, but don't quite know where to start, Building Information Modeling For Dummies is your one-stop guide to collaborative building using one coherent system of computer models rather than as separate sets of drawings. Inside, you'll find an easy-to-follow introduction to BIM and hands-on guidance for understanding drivers for change, the benefits of BIM, requirements you need to get started, and where BIM is headed. The future of BIM is bright—it provides the industry with an increased understanding of predictability, improved efficiency, integration and coordination, less waste, and better value and quality. Additionally, the use of BIM goes beyond the planning and design phase of the project, extending throughout the building life cycle and supporting processes, including cost management, construction management, project management, and facility operation. Now heavily adopted in the U.S., Hong Kong, India, Singapore, France, Canada, and countless other countries, BIM is set to become a mandatory practice in building work in the UK, and this friendly guide gives you everything you need to make sense of it—fast. Demonstrates how BIM saves time and waste on site Shows you how the information generated from BIM leads to fewer errors on site Explains how BIM is based on data sets that describe objects virtually, mimicking the way they'll be handled physically in the real world Helps you grasp how the integration of BIM allows every stage of the life cycle to work together without data or process conflict Written by a team of well-known experts, this friendly, hands-on guide gets you up and running with BIM fast.

Anne Frank: The Collected Works Anne Frank Fonds, 2019-05-30 Anne Frank's diary is one of the most recognised and widely read books of the Second World War. Hundreds of thousands of people visit the Anne Frank House on the Prinsengracht in Amsterdam each year to see the annexe where Anne and her family hid from the occupying forces, before

eventually being deported to Auschwitz in 1944. Only Anne's father, Otto, survived the Holocaust. *Anne Frank: The Collected Works* includes each of the versions of Anne's world-famous diary including the 'A' and 'B' diaries now in continuous, readable form, and the definitive text ('D') edited by renowned translator and author Mirjam Pressler. For the first time readers have access to Anne's letters, personal reminiscences, daydreams, essays and notebook of favourite quotes. Also included are background essays by notable writers such as historian Gerhard Hirschfeld (University of Stuttgart) and Francine Prose (Bard College) on topics such as 'Anne Frank's Life', 'The History of the Frank Family' and 'The Publication History of Anne Frank's diary', as well as numerous photographs of the Franks and the other occupants of the annexe. An essential book for scholars and general readers alike, *The Collected Works* brings together for the first time Anne Frank's complete writings, together with important images and documents. Supported by the Anne Frank Fonds in Basel, Switzerland, set up by Otto Frank to act as the guardian of Anne's work, this is a landmark publication marking the anniversary of 90 years since Anne's birth in 1929.

The Hiding Place Corrie ten Boom, John Sherrill, Elizabeth Sherrill, 2023-12-12 Timeless, Bestselling True Story of a World War II Hero Corrie ten Boom was the first licensed female watchmaker in the Netherlands who became a heroine of the Resistance, a survivor of Hitler's concentration camps, and one of the most remarkable evangelists of the twentieth century. In World War II she and her family risked their lives to help Jews and underground workers escape from the Nazis. In 1944 their lives were forever altered when they were betrayed, arrested, and thrown into the infamous Nazi death camps. Only Corrie among her family survived. This is her incredible true story--and ultimately the story of how faith, hope, and love triumphed over unthinkable evil. Now in a beautiful deluxe edition, this beloved book continues to declare that God's love will overcome, heal, and restore. Because there is no pit so deep that God's love is not deeper still, and no darkness so thick that His light can't break through.

Childlessness in Europe: Contexts, Causes, and Consequences Michaela Kreyenfeld, Dirk Konietzka, 2017-01-11 This book is published open access under a CC BY 4.0 license. This open access book provides an overview of childlessness throughout Europe. It offers a collection of papers written by leading demographers and sociologists that examine contexts, causes, and consequences of childlessness in countries throughout the region. The book features data from all over Europe. It specifically highlights patterns of childlessness in Germany, France, the United Kingdom, Finland, Sweden, Austria and Switzerland. An

additional chapter on childlessness in the United States puts the European experience in perspective. The book offers readers such insights as the determinants of lifelong childlessness, whether governments can and should counteract increasing childlessness, how the phenomenon differs across social strata and the role economic uncertainties play. In addition, the book also examines life course dynamics and biographical patterns, assisted reproduction as well as the consequences of childlessness. Childlessness has been increasing rapidly in most European countries in recent decades. This book offers readers expert analysis into this issue from leading experts in the field of family behavior. From causes to consequences, it explores the many facets of childlessness throughout Europe to present a comprehensive portrait of this important demographic and sociological trend.

Industry 4.0 Solutions for Building Design and Construction Farzad Pour Rahimian, Jack Steven Goulding, Sepehr Abrishami, Saleh Seyedzadeh, Faris Elghaish, 2021-12-20 This book provides in-depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in Architecture, Engineering, and Construction (AEC). Scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of Industry 4.0. Mainstream Building Information Management (BIM) is seen as a vehicle for addressing issues such as industry fragmentation, value-driven solutions, decision-making, client engagement, and design/process flow; however, advanced simulation, computer vision, Internet of Things (IoT), blockchain, machine learning, deep learning, and linked data all provide immense opportunities for dealing with these challenges and can provide evidenced-based innovative solutions not seen before. These technologies are perceived as the “true” enablers of future practice, but only recently has the AEC sector recognised terms such as “golden key” and “golden thread” as part of BIM processes and workflows. This book builds on the success of a number of initiatives and projects by the authors, which include seminal findings from the literature, research and development, and practice-based solutions produced for industry. It presents these findings through real projects and

case studies developed by the authors and reports on how these technologies made a real-world impact. The chapters and cases in the book are developed around these overarching themes: • BIM and AEC Design and Optimisation: Application of Artificial Intelligence in Design • BIM and XR as Advanced Visualisation and Simulation Tools • Design Informatics and Advancements in BIM Authoring • Green Building Assessment: Emerging Design Support Tools • Computer Vision and Image Processing for Expediting Project Management and Operations • Blockchain, Big Data, and IoT for Facilitated Project Management • BIM Strategies and Leveraged Solutions This book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the AEC industry and is essential reading for all involved in the sector. It is particularly suited for use in Masters-level programs in Architecture, Engineering, and Construction.

Curriculum Reform in the European Schools Sandra Leaton Gray, David Scott, Peeter Mehisto, 2018-05-29 This book is open access under a CC BY 4.0 license. This open access book examines the modern role of the European School system within the European Union, at a time when the global economy demands a new vision for contemporary education. The European schools are currently in a state of crisis: their 60-year-old tradition of bilingual and multilingual education is being strained by rapid EU expansion and the removal of English speaking teachers as a result of Brexit. Their tried and tested model of mathematics and science education has rapidly been overtaken by new developments in pedagogy and assessment research, while recruitment and retention of students and teachers has become increasingly fraught as European member states review what they are, and what they are not, prepared to fund. The authors draw on original and empirical research to assess the European Schools' place in a new Europe where the entire post-war European Project is potentially at risk. This well-researched volume will be of interest to practitioners working in European schools as well as students and scholars of EU politics and international education.
