Numerous examples of text analysis using the categories introduced, and discussion about what the analysis shows. Exercises to test comprehension, along with answers for guidance. The third edition is updated throughout, and is based closely on the fourth edition of Halliday and Matthiessen's Introduction to Functional Grammar. A Cognitive-Functional Approach to Nominalization in English Liesbet Heyvaert,2015-06-03 The book presents a systematic theoretical account of the fundamental constructional mechanisms that underlie deverbal nominalization in general, and it makes an original descriptive contribution by discussing a number of nominalization systems in detail. The main theoretical motif is that nominalization strongly calls for a functional rather than purely structural approach. The book goes more deeply into a number of functional constructs needed to model nominalization (drawn from Cognitive Grammar and Systemic-Functional Grammar) and it elaborates on the internal functional organization of nominal and clausal structure [e.g. the notions of type specification, instantiation and grounding (Langacker 1991) are discussed in detail and shown to be crucial for the analysis of deverbal nominalization]. It is argued that deverbal nominalizations are basically re-classifications of verbal predicates into nominal constructions. This re-classification either applies at word rank or it involves the rank shift (Halliday 1966) of a clause-like unit, with its internal structure preserved (e.g. signing the contract quickly). The re-classified

unit then adopts a specific nominal strategy, with some form of nominal determination and quantification (e.g. her signing the contract quickly). The descriptive part of the book zooms in on nominalizations that are derived at word rank (deverbal -er nominals) and on nominalizations applying to 'a temporal clausal heads' (e.g. John's playing the piano) and finite clauses. Of the gerundive and finite types of nominalization, those that function in factive contexts are focused on. In the analysis of deverbal -er nominals a case is made for a 'subject' analysis of the system and an elaborate discussion of the clausal middle construction (e.g. this book reads easily) - which is argued to show systematic resemblances with non-agentive -er nominals - is included. Of the remaining nominalization types (John's playing the piano; playing the piano; the fact that he plays the piano; that he plays the piano), especially the nominal behaviour (e.g. proper name vs. common noun strategy) and (in the case of gerundive nominals) the various structural and semantic subtypes that can be distinguished among them are discussed.

Functional English Grammar Graham Lock,1995-11-24 This text explores ways in which English grammar enables speakers and writers to represent the world, to interact with one another, and to create coherent messages. The hardback edition provides second language teachers with a functional description of English grammar, in which grammar is viewed not as a set of rules but as a communicative resource. It explores ways in which English grammar enables speakers and writers to represent their experience of the world, to interact with one another, and to create coherent messages. Each chapter includes a focus on areas of difficulty for second language learners, numerous authentic examples, tasks that allow the

reader to apply the concepts introduced, and discussion questions. A final chapter covers issues in the learning and teaching of grammar, and reviews methodological options for the second or foreign language classroom.
