Politically Exposed Persons Theodore S. Greenberg,Larissa Gray,Delphine Schantz,Carolyn Gardner,Michael Latham,2010-04-19 In recent years, revelations of grand corruption and the plunder of state assets have led to greater scrutiny of financial relationships with politically exposed persons (PEPs) senior government officials and their family members and close associates. Notwithstanding the efforts by many financial institutions and regulatory authorities to prevent corrupt PEPs from entering and using the financial system to launder the proceeds of corruption, there has been an overall failure in the effective implementation of international standards on PEPs. Implementation of an effective PEP regime is a critical component in the prevention and detection of transfers of proceeds of crime and, therefore, ultimately in the process of recovering them. 'Politically Exposed Persons: Preventive Measures for the Banking Sector' is designed to help banks and regulatory authorities address the risks posed by PEPs and prevent corrupt PEPs from using domestic and international financial systems to launder the proceeds of corruption. The book provides recommendations and good practices aimed at improving compliance with international standards and increasing supervisory effectiveness. It is an important tool for individuals, governments, financial and private sector companies, and international organizations involved in developing and implementing standards aimed at fighting corruption and money laundering, and trying to recover stolen assets and the proceeds of corruption.

Getting the Right Teachers into the Right Schools Vimala Ramachandran,Tara Béteille,Toby Linden,Sangeeta Dey,Prerna Goel Chatterjee,2017-11-15 India's landmark Right of Children to Free and Compulsory Education Act (2009) guarantees education to all children aged 6-14 years. The Act mandates specific student-teacher ratios and emphasizes teacher quality. Writing this into legislation took seven years, but the seven years since has proven that ensuring effective teachers are recruited and placed in all schools in a time-bound manner is considerably more challenging. This report takes a detailed look at the complexity of the teacher management landscape in elementary and secondary schools in nine Indian states. On a daily basis, the administrative machinery of these states has to manage between 19,000 to nearly a million teachers in different types of schools and employment contracts, and cope with recruiting thousands more and distributing them equitably across schools. This report examines the following issues: official requirements for becoming a schoolteacher in India; policies and processes for teacher recruitment, deployment and transfers; salaries and benefits of teachers; professional growth of teachers; and grievance redressal mechanisms for teachers. For the first time in India, this report compares and contrasts stated policy with actual practice in teacher management in the country, using a combination of primary and secondary data. In so doing, the report reveals the hidden challenges and the nature of problems faced by administrators in attempting to build an effective teacher workforce which serves the needs of all of India's 200 million school children. The report examines states with varying characteristics, thus generating knowledge and evidence likely to be of interest to policy makers and practitioners in a wide range of contexts.

Manual for Developing Intercultural Competencies (Open Access) Darla K. Deardorff,2019-08-16 This book presents a structured yet flexible methodology for developing intercultural competence in a variety of contexts, both formal and informal. Piloted around the world by UNESCO, this methodology has proven to be effective in a range of different contexts and focused on a variety of different issues. It, therefore can be considered an important resource for anyone concerned with effectively managing the growing cultural diversity within our societies to ensure inclusive and sustainable development.

Intercultural competence refers to the skills, attitudes, and behaviours needed to improve interactions across difference, whether within a society (differences due to age, gender, religion, socio-economic status, political affiliation, ethnicity, and so on) or across borders. The book serves as a tool to develop those competences, presenting an innovative adaptation of what could be considered an ancient tradition of storytelling found in many cultures. Through engaging in the methodology, participants develop key elements of intercultural competence, including greater self-awareness, openness, respect, reflexivity, empathy, increased awareness of others, and in the end, greater cultural humility. This book will be of great interest to intercultural trainers, policy makers, development practitioners, educators, community organizers, civil society leaders, university lecturers and students - all who are interested in developing intercultural competence as a means to understand and appreciate difference, develop relationships with those across difference, engage in intercultural dialogue, and bridge societal divides.
