**What Video Games Have to Teach Us About Learning and Literacy. Second Edition** James Paul Gee, 2014-12-02  
Cognitive Development in a Digital Age James Paul Gee begins his classic book with I want to talk about video games—yes, even violent video games—and say some positive things about them. With this simple but explosive statement, one of America's most well-respected educators looks seriously at the good that can come from playing video games. This revised edition expands beyond mere gaming, introducing readers to fresh perspectives based on games like World of Warcraft and Half-Life 2. It delves deeper into cognitive development, discussing how video games can shape our understanding of the world. An undisputed must-read for those interested in the intersection of education, technology, and pop culture, *What Video Games Have to Teach Us About Learning and Literacy* challenges traditional norms, examines the educational potential of video games, and opens up a discussion on the far-reaching impacts of this ubiquitous aspect of modern life.

Hispanics and United States Film Gary D. Keller, 1994 In its role as handbook, *Hispanics and United States Film* provides the best single source of information on Hispanic personalities in American film and on American films with a Hispanic focus produced from 1896 to the present time. Hundreds of films, actors, and other figures of the film industry are referenced. This informational component of the book, which provides titles, dates, and other filmographic information, is supplemented by a bibliography on the subject.

*One Stormy Night* Yuichi Kimura, 2003-05-09 A tale of a hungry wolf and an equally hungry little billy goat who both take shelter in a dark cave during a thunderstorm and who try to find out who the other is. They talk about food mainly, and sigh. But thunder blots out the goat and grass when their favourite meals are mentioned.

**Survival of the Prettiest** Nancy Etcoff, 2011-02-02 A provocative and thoroughly researched inquiry into what we find beautiful and why, skewering the myth that the pursuit of beauty is a learned behavior. In *Survival of the Prettiest*, Nancy Etcoff, a faculty member at Harvard Medical School and a practicing psychologist at Massachusetts General Hospital, argues that beauty is neither a cultural construction, an invention of the fashion industry, nor a backlash against feminism—it's in our biology. Beauty, she explains, is an essential and ineradicable part of human nature that is revered and ferociously pursued in nearly every civilization—and for good reason. Those features to which we are most attracted are often signals of fertility and fecundity. When seen in the context of a Darwinian struggle for survival, our sometimes extreme attempts to

attain beauty—both to become beautiful ourselves and to acquire an attractive partner—suddenly become much more understandable. Moreover, if we understand how the desire for beauty is innate, then we can begin to work in our own interests, and not just the interests of our genetic tendencies.

**Beyond Memory** Max Mojapelo, 2008 South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities. *Beyond Memory: Recording the History, Moments and Memories of South African Music* is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of a man, Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a deejay at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries.

**Manufacturing Consent** Edward S. Herman, Noam Chomsky, 2011-07-06 A compelling indictment of the news media's role in covering up errors and deceptions (The New York Times Book Review) due to the underlying economics of publishing—from famed scholars Edward S. Herman and Noam Chomsky. With a new introduction. In this pathbreaking work, Edward S. Herman and Noam Chomsky show that, contrary to the usual image of the news media as cantankerous, obstinate, and ubiquitous in their search for truth and defense of justice, in their actual practice they defend the economic, social, and political agendas of the privileged groups that dominate domestic society, the state, and the global order. Based on a series of case studies—including the media's dichotomous treatment of "worthy" versus "unworthy" victims, "legitimizing" and "meaningless" Third World elections, and devastating critiques of media coverage of the U.S. wars against Indochina—Herman and Chomsky draw on decades of criticism and research to propose a Propaganda Model to explain the media's behavior and performance. Their new introduction updates the Propaganda Model and the earlier case studies, and it discusses several other applications. These include the manner in which the media covered the passage of the North American Free Trade Agreement and subsequent Mexican financial meltdown of 1994-1995, the media's handling of the

protests against the World Trade Organization, World Bank, and International Monetary Fund in 1999 and 2000, and the media's treatment of the chemical industry and its regulation. What emerges from this work is a powerful assessment of how propagandistic the U.S. mass media are, how they systematically fail to live up to their self-image as providers of the kind of information that people need to make sense of the world, and how we can understand their function in a radically new way.

**American Multiculturalism After 9/11** Derek Rubin, J. Verheul, 2009 This provocative and rich volume charts the post-9/11 debates and practice of multiculturalism, pinpointing their political and cultural implications in the United States and Europe.

**Environmental Change and Agricultural Sustainability in the Mekong Delta** Mart A. Stewart, Peter A. Coclanis, 2011-05-13 The Mekong Delta of Vietnam is one of the most productive agricultural areas in the world. The Mekong River fans out over an area of about 40,000 sq kilometers and over the course of many millennia has produced a region of fertile alluvial soils and constant flows of energy. Today about a fourth of the Delta is under rice cultivation, making this area one of the premier rice granaries in the world. The Delta has always proven a difficult environment to manipulate, however, and because of population pressures, increasing acidification of soils, and changes in the Mekong's flow, environmental problems have intensified. The changing way in which the region has been linked to larger flows of commodities and capital over time has also had an impact on the region: For example, its re-emergence in recent decades as a major rice-exporting area has linked it inextricably to global markets and their vicissitudes. And most recently, the potential for sea level increases because of global warming has added a new threat. Because most of the region is on average only a few meters above sea level and because any increase of sea level will change the complex relationship between tides and down-river water flow, the Mekong Delta is one of the areas in the world most vulnerable to the effects of climate change. How governmental policy and resident populations have in the past and will in coming decades adapt to climate change as well as several other emerging or ongoing environmental and economic problems is the focus of this collection.

**Game Engine Black Book: DOOM** Fabien Sanglard, It was early 1993 and id Software was at the top of the PC gaming

industry. Wolfenstein 3D had established the First Person Shooter genre and sales of its sequel Spear of Destiny were skyrocketing. The technology and tools id had taken years to develop were no match for their many competitors. It would have been easy for id to coast on their success, but instead they made the audacious decision to throw away everything they had built and start from scratch. Game Engine Black Book: Doom is the story of how they did it. This is a book about history and engineering. Don't expect much prose (the author's English has improved since the first book but is still broken). Instead you will find inside extensive descriptions and drawings to better understand all the challenges id Software had to overcome. From the hardware -- the Intel 486 CPU, the Motorola 68040 CPU, and the NeXT workstations -- to the game engine's revolutionary design, open up to learn how DOOM changed the gaming industry and became a legend among video games.

**Channels of Propaganda** J. Michael Sproule, 1994 Defining propaganda as efforts by special interests to win over the public covertly by infiltrating messages into various channels of public expression ordinarily viewed as politically neutral, this book argues that propaganda has become pervasive in American life. Pointing out that the 1990s society is inundated with propaganda from numerous sources (including government, business, researchers, religious groups, the news media, educators, and the entertainment industry) the book exposes these channels of propaganda and the cumulative effect they have on public opinion and the functioning of American democracy. Chapter 1 reviews materials on diverse vantage points from which American writers and opinion leaders have tried to reconcile mass persuasion with the democratic way of life during the 20th century. Chapters 2-6 examine propaganda in: (1) government (e.g., Federal Bureau of Investigation, aid to the Contras, Star Wars, presidential styles); (2) research and religion (e.g., national security, private sector, religion and politics); (3) news (e.g., getting good coverage, pressure groups, and business); (4) classroom (e.g., business propaganda, pressure groups, textbooks, pressures on teachers); and (5) entertainment (e.g., film, television). Chapters 7 and 8 question: (1) what action a democratic people should take to safeguard intelligent discussion and free choice from the taint of devious communication; (2) to what extent propaganda casts a shadow over public life; and (3) whether large-scale, engineered persuasion can ever be squared with the ideal of democratic public deliberation. Extensive chapter notes and an index are included. (NKA)

**Gun Violence in America** Alexander DeConde, 2003 An in-depth analysis of the folklore surrounding gun use and the state of the debate in today's political climate.

**Black Passenger Yellow Cabs** Stephen F. D. Bryan, 2009-09 Black Passenger Yellow Cabs is an erotic auto/ethnographic memoir exploring in easy layperson's terms the socio-psycho-sexual dynamics of Japan and the erotic capital of the Western male. It offers an exploration of deviant behavior in an exotic land and a journey from self-destruction to self-actualization.

*American Cinema/American Culture* John Belton, 2012-04-01 American Cinema/American Culture looks at the interplay between American cinema and mass culture from the 1890s to 2011. It begins with an examination of the basic narrative and stylistic features of classical Hollywood cinema. It then studies the genres of silent melodrama, the musical, American comedy, the war/combat film, film noir, the western, and the horror and science fiction film, investigating the way in which movies shape and are shaped by the larger cultural concerns of the nation as a whole. The book concludes with a discussion of post World War II Hollywood, giving separate chapter coverage to the effects of the Cold War, 3D, television, the counterculture of the 1960s, directors from the film school generation, and the cultural concerns of Hollywood from the 1970s through 2011. Ideal for Introduction to American Cinema courses, American Film History courses, and Introductory Film Appreciation courses, this text provides a cultural overview of the phenomenon of the American movie-going experience. An updated study guide is also available for American Cinema/American Culture. Written by Ed Sikov, this guide introduces each topic with an explanatory overview written in more informal language, suggests screenings and readings, and offers self-tests.

Rebel Music Hisham Aidi, 2014-12-02 In this pioneering study, Hisham Aidi—an expert on globalization and social movements—takes us into the musical subcultures that have emerged among Muslim youth worldwide over the last decade. He shows how music—primarily hip-hop, but also rock, reggae, Gnawa and Andalusian—has come to express a shared

Muslim consciousness in face of War on Terror policies. This remarkable phenomenon extends from the banlieues of Paris to the favelas of Rio de Janeiro, from the park jams of the South Bronx to the Sufi rock bands of Pakistan. The United States and other Western governments have even tapped into these trends, using hip hop and Sufi music to de-radicalize Muslim youth abroad. Aidi situates these developments in a broader historical context, tracing longstanding connections between Islam and African-American music. Thoroughly researched, beautifully written, *Rebel Music* takes the pulse of a revolutionary soundtrack that spans the globe.

**In the Absence of the Sacred** Jerry Mander, 1991 Mander goes beyond television (which he proclaimed as being dangerous to personal health and sanity in *Four Arguments for the Elimination of Television*) to critique our technological society as a whole, challenge its utopian promises, and track its devastating impact on native cultures worldwide. Will interest all readers concerned about our environment and quality of life.-- Publishers Weekly.
