**Language in International Business** Mary Yoko Brannen, Terry Mughan, 2016-11-07 Tracing the treatment of language in international business as represented in the Journal of International Business Studies, this seminal collection critically explores the conceptualizations of language that have been adopted or ignored by international business scholars over the years and showcases nine articles that have played an important role in establishing and advancing the field. In today's increasingly globalized context of business, significantly richer theories from interdisciplinary perspectives are needed to explain the complexity of the interplay between multiple facets of language and how they affect day-to-day operations. With insights from linguistics, psychology and organizational theory, Language in International Business provides an assessment of scholarly efforts to uncover the profound impact that language has on global business today and proposes some important ways in which this nascent field of language in international business may be further advanced. **Location of International Business Activities** Academy of International Business .,2014-12-02 In recent years an extensive range of new research has been revisiting the topic of the location of international business activities, from a variety of different perspectives and background interests. This work has been inspired in part by two apparently quite different but actually related contemporary trends: on the one hand, an emergence or revitalization of clusters of activities co-located in or around selected global city regions or fast growing metropolitan areas; and on the other hand, an increased global dispersion of activities conducted within the value chains managed or coordinated by many large multinational

enterprises and their business partners. The former trend has given rise to discussions of how the elite of the cultural-cognitive economy of the 21st century (in Allen Scott's terminology) or the creative class (Richard Florida's term) are now being drawn or brought back to major urban centers; while the latter trend is associated with debates over outsourcing, and the economic and social consequences of shifts in the ownership and location of distinct nodes of value chains once production systems become more fragmented and the component parts of such systems become more geographically dispersed. An increased interest in the subject of international business location has been shown by scholars in Strategic Management, in Economic Geography, and in Regional Science, as well as in our own interdisciplinary field of International Business Studies. However, as is often the case in academic research communities, these bodies of scholarship have tended to develop at something of a distance from one another, each conversing internally more than they have with one another. Location of International Business Activities aims to promote a greater conversation between those interested in the topic of Location from various different backgrounds or starting points. The articles are taken from a special issue on the theme of the Multinational in Geographic Space which was published by The Journal of International Business Studies in 2013.

The result is a Handbook that acknowledges and builds on a variety of research traditions (from mainstream to critical), updates existing knowledge in relation to current challenges, and sets the direction for future research and developments, making this an invaluable resource for researchers in the field, and across related areas of international business, management, and intercultural relations. Part 1: Multiple Research Paradigms for the Study of Culture Part 2: Research Methods in Cross-Cultural Management Part 3: Cross-Cultural Management and Intersecting Fields of Study Part 4: Individuals and Teams in Cross-Cultural Management Part 5: Global mobility and Cross-Cultural Management Part 6: Developing Intercultural Competence

Seev Hirsch, *International Business Review* *Multinational Enterprises and the Global Economy* has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . Alain Verbeke, *Journal of International Business Studies* The second edition of *Multinational Enterprises and the Global Economy* provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. *Journal of International Business Studies* This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries

attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK

This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese
