Final Environmental Impact Statement for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-level Radioactive Waste at Yucca Mountain, Nye County, Nevada ,2002 The purpose of this environmental impact statement (EIS) is to provide information on potential environmental impacts that could result from a Proposed Action to construct, operate and monitor, and eventually close a geologic repository for the disposal of spent nuclear fuel and high-level radioactive waste at the Yucca Mountain site in Nye County, Nevada. The EIS also provides information on potential environmental impacts from an alternative referred to as the No-Action Alternative, under which there would be no development of a geologic repository at Yucca Mountain.

Science Learning and Instruction Marcia C. Linn,Bat-Sheva Eylon,2011-05-20 Science Learning and Instruction describes advances in understanding the nature of science learning and their implications for the design of science instruction. The authors show how design patterns, design principles, and professional development opportunities coalesce to create and sustain effective instruction in each primary scientific domain: earth science, life science, and physical science. Calling for more in depth and less fleeting coverage of science topics in order to accomplish knowledge integration, the book highlights the importance of designing the instructional materials, the examples that are introduced in each scientific domain, and the professional development that accompanies these materials. It argues that unless all these efforts are made simultaneously, educators cannot hope to improve science learning outcomes. The book also addresses how many policies, including curriculum, standards, guidelines, and standardized tests, work against the goal of integrative understanding, and

discusses opportunities to rethink science education policies based on research findings from instruction that emphasizes such understanding.

Precalculus, Student Solutions Manual Cynthia Y. Young,2010-02-15 Engineers looking for an accessible approach to calculus will appreciate Young's introduction. The book offers a clear writing style that helps reduce any math anxiety they may have while developing their problem-solving skills. It incorporates Parallel Words and Math boxes that provide detailed annotations which follow a multi-modal approach. Your Turn exercises reinforce concepts by allowing them to see the connection between the exercises and examples. A five-step problem solving method is also used to help engineers gain a stronger understanding of word problems.

Precalculus Cynthia Y. Young,2017-11-07 Precalculus was developed to create a program that seamlessly align with how teachers teach and fully supports student learning. Cynthia Young's goal was to create an intuitive, supportive product for students without sacrificing the rigor needed for true conceptual understanding and preparation for Calculus. Precalculus helps bridge the gap between in-class work and homework by mirroring the instructor voice outside the classroom through pedagogical features.

Shaping Contracts for Work Gabrielle Elisabeth Golding,2023-12-15 Shaping Contracts for Work provides an in-depth examination of the common law's role in shaping employment contracts through the mechanism of implied terms. It constructs a theory which views the nature of the employment contract as distinct from other types of work contract. Terms implied by law into employment contracts, as well as their potential to operate in other non-standard contracts for the performance of work, are critically examined by reference to the test that courts adopt when they are asked to imply such terms. In part one, Golding provides an overarching survey of the law which governs express and implied terms in contracts. In doing so, she considers the broader judicial role in implying terms and assesses how it can fundamentally alter the nature of the relationship between contracting parties. Part two draws comparisons between England and Australia, tracing the origins and status of select terms across both jurisdictions, and exploring how the application of these terms is often presumed. Golding also examines the duties of mutual trust, confidence, and good faith in both jurisdictions, investigating their potential application in employment contracts. In part three, Golding demonstrates why courts need to better articulate their understanding of what constitutes an 'employment contract' as a distinctive class of contract. By focussing on the impact of terms implied by law, this work adds a unique dimension to the debate concerning the regulation of waged work in the context of ever-increasing non-standard modes of work.
