Theoretical and Empirical Insights into Child and Family Poverty Elizabeth Fernandez, Anat Zeira, Tiziano Vecchiato, Cinzia Canali, 2015-06-04 This book brings together a range of theoretical and empirical perspectives on conceptualization, measurement, multidimensional impacts and policy and service responses to address child and family poverty. It illuminates issues and trends through country level chapters, thus shedding light on dynamics of poverty in different jurisdictions. The book is structured into three sections: The first includes introductory chapters canvassing key debates around definition, conceptualization, measurement and theoretical and ideological positions. The second section covers impacts of poverty on specific domains of children's and families' experience using snapshots from specific countries/geographic regions. The third section focuses on programs, policies and interventions and addresses poverty and its impacts. It showcases specific interventions, programs and policies aimed at responding to children and families and communities and how they are or might be evaluated. Cross national case studies and evaluations illustrate the diversity of approaches and outcomes.

Social Love and the Critical Potential of People Silvia Cataldi, Gennaro Iorio, 2022-09-23 This book unveils the concept of social love as a kind of Karst River that flows through the history of sociology, reassessing it as a form criticism by people in everyday life. Adopting an interdisciplinary perspective, this book offers both theoretical and empirical reflections on social love. It shows that love is not only central to the human experience, but that it can also help to interpret and intervene in social problems such as climate change, poverty, xenophobia, and the (post-)Covid crisis, recognizing people as actors in social change. It explores the idea of love as a key element in the promotion of solidarity and recognition in today's plural and unequal societies. Based on empirical research on social love conducted through both qualitative and quantitative methods, especially in Europe and Latin America, this book explores the social dimension of love. Providing overviews on key questions and studies on current issues, the book is essential reference and resource for researchers, students, social workers, and professionals in social sciences, social philosophy, anthropology, social psychology, sociology of emotions and postmodern literature.

La preadolescenza Francesca Mazzucchelli, 2013

Young People's Transitions from Care to Adulthood Mike Stein, Emily Munro, 2008-04-15 The transition from care into

adulthood is a difficult step for any young person, but young people leaving care have a high risk of social exclusion, both in terms of material disadvantage and marginalisation. In *Young People's Transitions from Care to Adulthood* leading academics gather together the latest international research relating to the transition of young people leaving care, outlining and comparing the range of legal and policy frameworks, welfare regimes and innovative practice across 16 countries. The book also highlights the variations that exist between different groups leaving care. Featuring key messages for policy and practice, this book will give academics, practitioners and policymakers valuable insights into how to encourage resilience and improve outcomes for care leavers.

The Spirit of Utopia ,2000-08 I am. We are. That is enough. Now we have to start. These are the opening words of Ernst Bloch's first major work, *The Spirit of Utopia*, written mostly in 1915-16, published in its first version just after the First World War, republished five years later, 1923, in the version here presented for the first time in English translation. *The Spirit of Utopia* is one of the great historic books from the beginning of the century, but it is not an obsolete one. In its style of thinking, a peculiar amalgam of biblical, Marxist, and Expressionist turns, in its analytical skills deeply informed by Simmel, taking its information from both Hegel and Schopenhauer for the groundwork of its metaphysics of music but consistently interpreting the cultural legacy in the light of a certain Marxism, Bloch's *Spirit of Utopia* is a unique attempt to rethink the history of Western civilizations as a process of revolutionary disruptions and to reread the artworks, religions, and philosophies of this tradition as incentives to continue disrupting. The alliance between messianism and Marxism, which was proclaimed in this book for the first time with epic breadth, has met with more critique than acclaim. The expressive and baroque diction of the book was considered as offensive as its stubborn disregard for the limits of disciplines. Yet there is hardly a discipline that didn't adopt, however unknowingly, some of Bloch's insights, and his provocative associations often proved more productive than the statistical account of social shifts. The first part of this philosophical meditation--which is also a narrative, an analysis, a rhapsody, and a manifesto--concerns a mode of self-encounter that presents itself in the history of music from Mozart through Mahler as an encounter with the problem of a community to come. This we-problem is worked out by Bloch in terms of a philosophy of the history of music. The self-encounter, however, has to be conceived as self-invention, as the active, affirmative fight for freedom and social justice, under the sign of Marx. The second part of the book is entitled *Karl Marx, Death and the Apocalypse*. I am. We are. That's hardly anything. But enough to start.

Development Projects Observed Albert O. Hirschman,2014-12-10 Originally published in 1967, the modest and plainly descriptive title of *Development Projects Observed* is deceptive. Today, it is recognized as the ultimate volume of Hirschman's groundbreaking trilogy on development, and as the bridge to the broader social science themes of his subsequent writings. Though among his lesser-known works, this unassuming tome is one of his most influential. It is in this book that Hirschman first shared his now famous Principle of the Hiding Hand. In an April 2013 *New Yorker* issue, Malcolm

Gladwell wrote an appreciation of the principle, described by Cass Sunstein in the book's new foreword as a bit of a trick up history's sleeve. It can be summed up as a phenomenon in which people's inability to foresee obstacles leads to actions that succeed because people have far more problem-solving ability than they anticipate or appreciate. And it is in *Development Projects Observed* that Hirschman laid the foundation for the core of his most important work, *Exit, Voice, and Loyalty*, and later led to the concept of an exit strategy.

Does Money Affect Children's Outcomes? Kerris Cooper, 2013 This research review examines whether money has a causal impact on children's outcomes. There is abundant evidence that children growing up in lower income households do less well than their peers on a range of wider outcomes. But is money important in itself, or do these associations simply reflect other differences between richer and poorer households, such as levels of parental education or attitudes towards parenting? The report examines the evidence on a wide range of different outcomes for children, including cognitive development and school achievement; social and behavioural development; physical health; mental health and subjective well-being; social inclusion; and parenting and the home environment.

Handbook on In-Work Poverty Henning Lohmann, Ivo Marx, 2018-01-26 There has been a rapid global expansion of academic and policy attention focusing on in-work poverty, acknowledging that across the world a large number of the poor are 'working poor'. Taking a global and multi-disciplinary perspective, this Handbook provides a comprehensive overview of current research at the intersection between work and poverty.

Governing Work and Welfare in a New Economy Jonathan Zeitlin, David M. Trubek, 2003 Europe and the United States confront common challenges in responding to the transformations of work and welfare in the 'new economy'. This volume examines new approaches to the governance of work and welfare in the EU and the US, surveys emergent trends and reflects on future possibilities.

Dr. Montessori's Own Handbook Maria Montessori, 2012-03-07 One of the truly great books on early childhood development, Maria Montessori's illustrated guide was written nearly a century ago in response to thousands of requests from American parents and teachers. In it, the noted educator provided copious information on how to use familiar, simple, easy-to-obtain classroom materials to make any home an effective learning environment. It was to be a children's house, where youngsters would be their own masters, and free to learn at their own pace. Sound cylinders, sandpaper letters, and numerical rods became features of the typical Montessori classroom. Designed to hone the child's visual, auditory, and tactile perceptions, tools such as these enabled the child to experiment and learn through the powers of observation, recognition, judgment, and classification. An essential teaching aid for parents and educators, this handbook features sections on teaching music, arithmetic and language, and developing sensory and motor skills.

Wild Law Cormac Cullinan, 2011-05-01 In this visionary book, Cormac Cullinan explains how, if the community of life on

Earth is to survive, a new understanding of nature and a new concept of legal systems are needed. Cullinan proposes a new approach or ‘Earth Jurisprudence’ and gives practical guidance on how to begin moving towards it. He shows that this philosophy could help develop new legal systems that would foster human connections to nature. It would encourage personal and social practices that ensure our planet remains liveable. *Wild Law* is an inspiring and stimulating book, which fuses politics, legal theory, ancient wisdom and personal experiences into a fascinating and eminently readable story.

An Introduction to the Voluntary Sector Justin Davis Smith, Colin Rochester, Rodney Hedley, 1995 In the 1990s, the voluntary and charity sector is being forced to become an increasingly important provider of health and social welfare in Britain. How can it respond to this pressure, who is running it and how should it be managed? As well as offering a full overview of the voluntary sector, the editor and contributors examine its history and importance within welfare provision and its current position and responsibilities. They also offer practical guidance for and analysis of the issues facing the voluntary sector today, including its legal framework in the UK and EC, fundraising, management and accountability.

Therapeutic Residential Care for Children and Youth James K Whittaker, Jorge Fernandez del Valle, Lisa Holmes, 2014-09-21 *Therapeutic Residential Care For Children and Youth* takes a fresh look at therapeutic residential care as a powerful intervention in working with the most troubled children who need intensive support. Featuring contributions from distinguished international contributors, it critically examines current research and innovative practice and addresses the key questions: how does it work, what are its critical “active ingredients” and does it represent value for money? The book covers a broad spectrum of established and emerging approaches pioneered around the world, with contributors from the USA, Canada, Scandinavia, Spain, Australia, Israel and the UK offering a mix of practice and research exemplars. The book also looks at the research relating to critical issues for child welfare service providers: the best time to refer children to residential care, how children can be helped to make the transition into care, the characteristics of children entering and exiting care, strategies for engaging families as partners, how the substantial cost of providing intensive is best measured against outcomes, and what research and development challenges will allow therapeutic residential care to be rigorously compared with its evidence-based community-centered alternatives. Importantly, the volume also outlines how to set up and implement intensive child welfare services, considering how transferable they are, how to measure success and value for money, and the training protocols and staffing needed to ensure that a programme is effective. This comprehensive volume will enable child welfare professionals, researchers and policymakers to develop a refined understanding of the potential of therapeutic residential care, and to identify the highest and best uses of this intensive and specialized intervention.

Education Nouvelle Et Sciences de L'éducation Bernard Schneuwly, 2006 This book is about the tumultuous and even passionate relationship between New Education and Educational Sciences, which are regarded as an inseparable «couple»,

intrinsically linked and surprisingly fruitful. Yet they remain irreconcilable and are mutually contradictory in a number of their elements and characteristics. Do Educational Sciences offer a scientific base or ideological support for New Education? Do the numerous new educational initiatives and reforms provide a «laboratory» for Educational Sciences or alternatives to the new scientific paradigms? Is this at the risk of their merging? And what is the price of these tensions? Specialists in the history of Educational Sciences and New Education from various geographical, cultural and disciplinary horizons explore the complex links between this powerful reforming movement and the nascent disciplinary field that emerged during the first half of the 20th century. Cet ouvrage analyse les relations tumultueuses - passionnelles même - de l'Education nouvelle et des Sciences de l'éducation: un couple indissociable - intrinsèquement lié et d'une étonnante fécondité - autant qu'inconciliable, nombre de leurs présupposés et caractéristiques se contredisant mutuellement. Les Sciences de l'éducation offrent-elles la base scientifique ou l'appui idéologique de l'Education nouvelle ? Les nombreuses expériences et réformes éducatives constituent-elles des laboratoires des Sciences de l'éducation ou des alternatives aux nouveaux paradigmes scientifiques ? Au risque de leur fusion ? Au prix de quelles tensions ? Des spécialistes de l'histoire des Sciences de l'éducation et de l'Education nouvelle d'horizons géographiques, culturels et disciplinaires divers explorent les rapports complexes entre ce puissant mouvement réformiste et le champ disciplinaire naissant durant la première moitié du 20e siècle.

Highlights of Findings from the Rochester Youth Development Study Katharine Browning, Terence P.

Thornberry, Pamela K. Porter, 1999 The Rochester Youth Development Study, a longitudinal study of 1,000 urban adolescents, is 1 of 3 coordinated projects supported by the Office of Juvenile Justice and Delinquency Prevention (OJJDP) since 1986 through its Program of Research on the Causes and Correlates of Delinquency (Causes and Correlates). The Rochester study is investigating the causes and consequences of adolescent delinquency and drug use by following a sample of high-risk urban adolescents from their early teenage years through their early adult years. The findings highlighted in this Fact Sheet are based on those presented in Taking Stock: An Overview of Findings From the Rochester Youth Development Study (Thornberry et al., 1998).

Improper Life Timothy C. Campbell, 2011-10-28 How biopolitics can get beyond its obsession with death

The Return of Curiosity Nicholas Thomas, 2016-08-15 The Spy Museum, the Vacuum Cleaner Museum, the National Mustard Museum—not to mention the Art Institute, the Museum of Modern Art, and the Getty Center: museums have never been more robust, curating just about everything there is and assuming a new prominence in public life. The Return of Curiosity explores museums in the modern age, offering a fresh perspective on some of our most important cultural institutions and the vital function they serve as stewards of human and natural history. Reflecting on art galleries, science and history institutions, and collections all around the world, Nicholas Thomas argues that, in times marked by incredible insecurity and turbulence, museums help us sustain and enrich society. Moreover, they stimulate us to think in new ways

about our world, compelling our curiosity and showing us the importance of understanding one another. Thomas looks at museums not simply as storehouses of old things but as the products of meaningful relationships between curators, the public, history, and culture. These relationships, he shows, don't always go smoothly, but they do always offer new insights into the many ways we value—and try to preserve—the world we live in. The result is a refreshing and hopeful look at museums as a cultural force, one that, by gathering together paintings, tropical birds, antiques, or even our own bodies, offers an illuminating reflection of who we are.

The School Reform Landscape Christopher Tienken, Donald C. Orlich, 2013 *The School Reform Landscape: Fear, Mythologies, and Lies* describes this nation's policymakers awkwardly stumbling through education reforms based on highly questionable political ideology and high-stakes assessments for all children. Provided are a series of actions that use fear and very unsound research studies to eliminate the American school systems and replace them with a dual-system, which discriminates against the poor, handicapped and students with little social capital. The authors provide a series of needed actions to make American public education the best it can be.

Juvenile Crime, Juvenile Justice Institute of Medicine, National Research Council, Commission on Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Law and Justice, Panel on Juvenile Crime: Prevention, Treatment, and Control, 2001-06-05 Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and get tough pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents—trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance—the probability that delinquency or criminal activities decrease with age—and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the

juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

The Philosophy of the Imagination in Vico and Malebranche Paolo Fabiani, 2009 This book is a retrospective view of modern philosophical anthropology through the works of two of its greatest exponents. the author demonstrates how mythology, the philosophy of history and language and Vico's concept of man had as a constant referral point Malebranche's psychology with its Cartesian formulation. The idolatrous and mythopoietic imagination that is described in *La Scienza Nuova* (New Science) has much in common with the pagan mind (that is to say the mind subjugated to passions, sensitivity and fantasy that is described in *La Recherche* (The Search after Truth). Some of the themes discussed here are myth, the metaphoric nature of thought, idolatry, the formation of mentality, the relationships which bind passions and representations and the association of ideas through iconic images. Also discussed are other themes such as the structure of society and imagination, imitation, persuasion and social relationships, communication within society between illustrious imaginations. Moreover in Malebranche has been found a complex and complete theory of imaginative universals (*universali fantastici*). The philosophy of the imagination in Vico and Malebranche is translated and edited by Giorgio A. Pinton.
