Theoretical and Empirical Insights into Child and Family Poverty Elizabeth Fernandez, Anat Zeira, Tiziano Vecchiato, Cinzia Canali, 2015-06-04 This book brings together a range of theoretical and empirical perspectives on conceptualization, measurement, multidimensional impacts and policy and service responses to address child and family poverty. It illuminates issues and trends through country level chapters, thus shedding light on dynamics of poverty in different jurisdictions. The book is structured into three sections: The first includes introductory chapters canvassing key debates around definition, conceptualization, measurement and theoretical and ideological positions. The second section covers impacts of poverty on specific domains of children's and families' experience using snapshots from specific countries/geographic regions. The third section focuses on programs, policies and interventions and addresses poverty and its impacts. It showcases specific interventions, programs and policies aimed at responding to children and families and communities and how they are or might be evaluated. Cross national case studies and evaluations illustrate the diversity of approaches and outcomes.

Social Love and the Critical Potential of People Silvia Cataldi, Gennaro Iorio, 2022-09-23 This book unveils the concept of social love as a kind of Karst River that flows through the history of sociology, reassessing it as a form criticism by people in everyday life. Adopting an interdisciplinary perspective, this book offers both theoretical and empirical reflections on social love. It shows that love is not only central to the human experience, but that it can also help to interpret and intervene in social problems such as climate change, poverty, xenophobia, and the (post-)Covid crisis, recognizing people as actors in social change. It explores the idea of love as a key element in the promotion of solidarity and recognition in today's plural and unequal societies. Based on empirical research on social love conducted through both qualitative and quantitative methods, especially in Europe and Latin America, this book explores the social dimension of love. Providing overviews on key questions and studies on current issues, the book is essential reference and resource for researchers, students, social workers, and professionals in social sciences, social philosophy, anthropology, social psychology, sociology of emotions and postmodern literature.

Young People's Transitions from Care to Adulthood Mike Stein, Emily Munro, 2008-04-15 The transition from care into

adulthood is a difficult step for any young person, but young people leaving care have a high risk of social exclusion, both in terms of material disadvantage and marginalisation. In *Young People's Transitions from Care to Adulthood* leading academics gather together the latest international research relating to the transition of young people leaving care, outlining and comparing the range of legal and policy frameworks, welfare regimes and innovative practice across 16 countries. The book also highlights the variations that exist between different groups leaving care. Featuring key messages for policy and practice, this book will give academics, practitioners and policymakers valuable insights into how to encourage resilience and improve outcomes for care leavers.

Child Care in the EC M. J. Colton, Walter Hellinckx, 1993 This work offers comparative data and analyses of how child care operates in the different countries of the EC.

Development Projects Observed Albert O. Hirschman, 2014-12-10 Originally published in 1967, the modest and plainly descriptive title of *Development Projects Observed* is deceptive. Today, it is recognized as the ultimate volume of Hirschman's groundbreaking trilogy on development, and as the bridge to the broader social science themes of his subsequent writings. Though among his lesser-known works, this unassuming tome is one of his most influential. It is in this book that Hirschman first shared his now famous Principle of the Hiding Hand. In an April 2013 *New Yorker* issue, Malcolm Gladwell wrote an appreciation of the principle, described by Cass Sunstein in the book's new foreword as a bit of a trick up history's sleeve. It can be summed up as a phenomenon in which people's inability to foresee obstacles leads to actions that succeed because people have far more problem-solving ability than they anticipate or appreciate. And it is in *Development Projects Observed* that Hirschman laid the foundation for the core of his most important work, *Exit, Voice, and Loyalty*, and later led to the concept of an exit strategy.

Child Poverty Bruce Bradbury, 2003 Addresses the definition, measurement and causes of child poverty, as well as the policy strategies that can be used to overcome it.

The Future of Mountain Agriculture Stefan Mann, 2012-11-08 Mountain agriculture is a socially and culturally unique system, but also a regionally important economic sector. In a globalising world, it is clear that fertile areas on all continents will always be used to produce large quantities of agricultural products in order to feed the world and, increasingly, provide biomass as a source of energy. It is far less clear, however, how land use in steep and more peripheral regions will evolve. By definition, farmland in mountain areas is more difficult to work because of steep slopes and missing accessibility. Climate conditions and poor soil quality often add to these adverse conditions. Through overcoming limited views from one region only or from one discipline, this book intends to draw a first truly international perspective on the issue of mountain farming.

Doing Better for Children OECD, 2009-09-01 Drawing on a wide range of data sources, this book constructs and analyses

different indicators of child well-being across the OECD covering six key areas: material well-being; housing and environment; education; health and safety; risk behaviours; and quality of school life.

Handbook on In-Work Poverty Henning Lohmann,Ive Marx,2018-01-26 There has been a rapid global expansion of academic and policy attention focusing on in-work poverty, acknowledging that across the world a large number of the poor are 'working poor'. Taking a global and multi-disciplinary perspective, this Handbook provides a comprehensive overview of current research at the intersection between work and poverty.

Does Money Affect Children's Outcomes? Kerris Cooper,2013 This research review examines whether money has a causal impact on children's outcomes. There is abundant evidence that children growing up in lower income households do less well than their peers on a range of wider outcomes. But is money important in itself, or do these associations simply reflect other differences between richer and poorer households, such as levels of parental education or attitudes towards parenting? The report examines the evidence on a wide range of different outcomes for children, including cognitive development and school achievement; social and behavioural development; physical health; mental health and subjective well-being; social inclusion; and parenting and the home environment.

Governing Work and Welfare in a New Economy Jonathan Zeitlin,David M. Trubek,2003 Europe and the United States confront common challenges in responding to the transformations of work and welfare in the 'new economy'. This volume examines new approaches to the governance of work and welfare in the EU and the US, surveys emergent trends and reflects on future possibilities.

Wild Law Cormac Cullinan,2011-05-01 In this visionary book, Cormac Cullinan explains how, if the community of life on Earth is to survive, a new understanding of nature and a new concept of legal systems are needed. Cullinan proposes a new approach or 'Earth Jurisprudence' and gives practical guidance on how to begin moving towards it. He shows that this philosophy could help develop new legal systems that would foster human connections to nature. It would encourage personal and social practices that ensure our planet remains liveable.Wild Law is an inspiring and stimulating book, which fuses politics, legal theory, ancient wisdom and personal experiences into a fascinating and eminently readable story.

Dr. Montessori's Own Handbook Maria Montessori,2012-03-07 One of the truly great books on early childhood development, Maria Montessori's illustrated guide was written nearly a century ago in response to thousands of requests from American parents and teachers. In it, the noted educator provided copious information on how to use familiar, simple, easy-to-obtain classroom materials to make any home an effective learning environment. It was to be a children's house, where youngsters would be their own masters, and free to learn at their own pace. Sound cylinders, sandpaper letters, and numerical rods became features of the typical Montessori classroom. Designed to hone the child's visual, auditory, and tactile

perceptions, tools such as these enabled the child to experiment and learn through the powers of observation, recognition, judgment, and classification. An essential teaching aid for parents and educators, this handbook features sections on teaching music, arithmetic and language, and developing sensory and motor skills.

A Failed Parricide Roberto Finelli, 2015-11-24 According to an established interpretation, the transition from Hegel's materialism to Marx's materialism signifies a progressive development from an abstract-idealist theory of becoming, to a theory of the concrete actions of human beings within history. A Failed Parricide by Roberto Finelli offers an innovative reading of the Marx-Hegel relationship, arguing that the young Marx remained structurally subaltern to Hegel's distinctive conception of the subject that becomes itself in relation to alterity. Marx's early critique of Hegel is represented as a 'failed parricide', relying upon an organicist and spiritualist anthropology derived from Feuerbach's presumed materialism. Only in Marx's mature critique of political economy will he be able to return to this 'primal scene' and produce a distinctive theory of the role of formal determinations in social and political modernity. First published in Italian by Bollati Boringhieri Editore as *Un parricidio mancato. Il rapporto tra Hegel e il giovane Marx*, Turin, 2004.

Highlights of Findings from the Rochester Youth Development Study Katharine Browning, Terence P. Thornberry, Pamela K. Porter, 1999 The Rochester Youth Development Study, a longitudinal study of 1,000 urban adolescents, is 1 of 3 coordinated projects supported by the Office of Juvenile Justice and Delinquency Prevention (OJJDP) since 1986 through its Program of Research on the Causes and Correlates of Delinquency (Causes and Correlates). The Rochester study is investigating the causes and consequences of adolescent delinquency and drug use by following a sample of high-risk urban adolescents from their early teenage years through their early adult years. The findings highlighted in this Fact Sheet are based on those presented in *Taking Stock: An Overview of Findings From the Rochester Youth Development Study* (Thornberry et al., 1998).

Therapeutic Residential Care for Children and Youth James K Whittaker, Jorge Fernandez del Valle, Lisa Holmes, 2014-09-21 *Therapeutic Residential Care For Children and Youth* takes a fresh look at therapeutic residential care as

a powerful intervention in working with the most troubled children who need intensive support. Featuring contributions from distinguished international contributors, it critically examines current research and innovative practice and addresses the key questions: how does it work, what are its critical “active ingredients” and does it represent value for money? The book covers a broad spectrum of established and emerging approaches pioneered around with world, with contributors from the USA, Canada, Scandinavia, Spain, Australia, Israel and the UK offering a mix of practice and research exemplars. The book also looks at the research relating to critical issues for child welfare service providers: the best time to refer children to residential care, how children can be helped to make the transition into care, the characteristics of children entering and exiting care, strategies for engaging families as partners, how the substantial cost of providing intensive is best measured against outcomes, and what research and development challenges will allow therapeutic residential care to be rigorously compared with its evidence-based community-centered alternatives. Importantly, the volume also outlines how to set up and implement intensive child welfare services, considering how transferable they are, how to measure success and value for money, and the training protocols and staffing needed to ensure that a programme is effective. This comprehensive volume will enable child welfare professionals, researchers and policymakers to develop a refined understanding of the potential of therapeutic residential care, and to identify the highest and best uses of this intensive and specialized intervention.

The Return of Curiosity Nicholas Thomas, 2016-08-15 The Spy Museum, the Vacuum Cleaner Museum, the National Mustard Museum—not to mention the Art Institute, the Museum of Modern Art, and the Getty Center: museums have never been more robust, curating just about everything there is and assuming a new prominence in public life. *The Return of Curiosity* explores museums in the modern age, offering a fresh perspective on some of our most important cultural institutions and the vital function they serve as stewards of human and natural history. Reflecting on art galleries, science and history institutions, and collections all around the world, Nicholas Thomas argues that, in times marked by incredible insecurity and turbulence, museums help us sustain and enrich society. Moreover, they stimulate us to think in new ways about our world, compelling our curiosity and showing us the importance of understanding one another. Thomas looks at museums not simply as storehouses of old things but as the products of meaningful relationships between curators, the public, history, and culture. These relationships, he shows, don't always go smoothly, but they do always offer new insights into the many ways we value—and try to preserve—the world we live in. The result is a refreshing and hopeful look at museums as a cultural force, one that, by gathering together paintings, tropical birds, antiques, or even our own bodies, offers an illuminating reflection of who we are.
