International Relations and Security in the Digital Age Johan Eriksson, Giampiero Giacomello, 2007-02 This book examines the impact of the information revolution on international and domestic security, attempting to remedy both the lack of theoretically informed analysis of information security and the US-centric tendency in the existing literature. *International Relations and Security in the Digital Age* covers a range of topics, including: critical infrastructure protection, privacy issues, international cooperation, cyber terrorism, and security policy. It aims to analyze the impact of the information revolution on international and domestic security; examine what existing international relations theories can say about this challenge; and discuss how international relations theory can be developed to better meet this challenge. The analysis suggests that Liberalism's focus on pluralism, interdependence and globalization, Constructivism's emphasis on language, symbols and images (including 'virtuality'), and some elements of Realist strategic studies (on the specific topic of information warfare) contribute to a better understanding of digital age security. This book will be of interest to students of security studies, globalization, international relations, and politics and technology.

Among Tibetan Texts E. Gene Smith, 2001-06-15 For three decades, E. Gene Smith ran the Library of Congress's Tibetan Text Publication Project of the United States Public Law 480 (PL480) - an effort to salvage and reprint the Tibetan literature that had been collected by the exile community or by members of the Bhotia communities of Sikkim, Bhutan, India, and Nepal. Smith wrote prefaces to these reprinted books to help clarify and contextualize the particular Tibetan texts: the prefaces served as rough orientations to a poorly understood body of foreign literature. Originally produced in print quantities of twenty, these prefaces quickly became legendary, and soon photocopied collections were handed from scholar to scholar, achieving an almost cult status. These essays are collected here for the first time. The impact of Smith's research on the academic study of Tibetan literature has been tremendous, both for his remarkable ability to synthesize diverse materials into coherent accounts of Tibetan literature, history, and religious thought, and for the exemplary critical scholarship he brought to this field.

Global Capitalism and the Crisis of Humanity William I. Robinson, 2014-07-28 This exciting new study provides an original and provocative exposé of the crisis of global capitalism in its multiple dimensions - economic, political, social, ecological, military, and cultural. Building on his earlier works on globalization, William I. Robinson discusses the nature of the new global capitalism, the rise of a globalized production and financial system, a transnational capitalist class, and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis-ridden and out of control. Robinson concludes with an exploration of how diverse social and political forces are responding to the crisis and alternative scenarios for the future.

Agent Orange on Trial Peter H. Schuck, 1987 *Agent Orange on Trial* is a riveting legal drama with all the suspense of a courtroom thriller. One of the Vietnam War's farthest reaching legacies was the Agent Orange case. In this unprecedented personal injury class action, veterans charge that a valuable herbicide, indiscriminately sprayed on the luxuriant Vietnam jungle a generation ago, has now caused cancers, birth defects, and other devastating health problems. Peter Schuck brilliantly recounts the gigantic confrontation between two million ex-soldiers, the chemical industry, and the federal government. From the first stirrings of the lawyers in 1978 to the court plan in 1985 for distributing a record \$200 million settlement, the case, which is now on appeal, has extended the frontiers of our legal system in all directions. In a book that is as much about innovative ways to look at the law as it is about the social problems arising from modern science, Schuck restages a sprawling, complex drama. The players include dedicated but quarrelsome veterans, a crusading litigator, class action organizers, flamboyant trial lawyers, astute court negotiators, and two federal judges with strikingly different judicial styles. High idealism, self-promotion, Byzantine legal strategies, and judicial creativity combine in a fascinating portrait of a human struggle for justice through law. The Agent Orange case is the most perplexing and revealing example until now of a new legal genre: the mass toxic tort. Such cases, because of their scale, cost, geographical and temporal dispersion, and causal uncertainty, present extraordinarily difficult challenges to our legal system. They demand new approaches to procedure, evidence, and the definition of substantive legal rights and obligations, as well as new roles for judges, juries, and regulatory agencies. Schuck argues that our legal system must be redesigned if it is to deal effectively with the increasing number of chemical disasters such as the Bhopal accident, ionizing radiation, asbestos, DES, and seepage of toxic wastes. He imaginatively reveals the clash between our desire for simple justice and the technical demands of a complex legal system.

Great Powers and Outlaw States Gerry Simpson, 2004-04-22 The presence of Great Powers and outlaw states is a central but under-explored feature of international society. In this book, Gerry Simpson describes the ways in which an international legal order based on 'sovereign equality' has accommodated the Great Powers and regulated outlaw states since the beginning of the nineteenth-century. In doing so, the author offers a fresh understanding of sovereignty which he terms juridical sovereignty to show how international law has managed the interplay of three languages: the languages of Great Power prerogative, the language of outlawry (or anti-pluralism) and the language of sovereign equality. The co-existence and interaction of these three languages is traced through a number of moments of institutional transformation in the global order from the Congress of Vienna to the 'war on terrorism'.

Genealogical and Family History of Northern New York William Richard Cutter, 1910

Life is Good Alex Capus, 2018-03-15 Max has been married to Tina for twenty-five years. She is the love of his life, but now he must come to terms with the fact that she is to spend a year away on a work assignment—away, for the first time, from their home, their children and their life together. Her absence leaves him feeling like an Odysseus in reverse: he stays put while his Penelope goes out into the world. Max, alone with his three teenage sons for the first time, is left contemplating life and the daily routine of the little bar of which he is the proprietor. As he spends more time with the regulars their problems begin to become his own. This new novel by Alex Capus is a hymn to trust, friendship and life's small pleasures. Told with his trademark humor, *Life is Good* is a novel about finding contentment in rootedness as the world speeds up.
