An Economist's Lessons on Happiness Richard A. Easterlin, 2021-03-01 Once called the “dismal science,” economics now offers prescriptions for improving people’s happiness. In this book Richard Easterlin, the “father of happiness economics,” draws on a half-century of his own research and that conducted by fellow economists and psychologists to answer in plain language questions like: Can happiness be measured? Will more money make me happier? What about finding a partner? Getting married? Having a baby? More exercise? Does religion help? Who is happier—women or men, young or old, rich or poor? How does happiness change as we go through different stages of life? Public policy is also in the mix: Can the government increase people’s happiness? Should the government increase their happiness? Which countries are the happiest and why? Does a country need to be rich to be happy? Does economic growth improve the human lot? Some of the answers are surprising (no, more money won’t do the trick; neither will economic growth; babies are a mixed blessing!), but they are all based on reason and well-vetted evidence from the fields of economics and psychology. In closing, Easterlin traces the genesis of the ongoing “Happiness Revolution” and considers its implications for people’s lives down the road.

*An Introduction to Mathematical Modeling* Edward A. Bender, 2012-05-23 Employing a practical, learn by doing approach, this first-rate text fosters the development of the skills beyond the pure mathematics needed to set up and manipulate mathematical models. The author draws on a diversity of fields — including science, engineering, and operations research — to provide over 100 reality-based examples. Students learn from the examples by applying mathematical methods to formulate, analyze, and criticize models. Extensive documentation, consisting of over 150 references, supplements the models, encouraging further research on models of particular interest. The lively and accessible text requires only minimal scientific background. Designed for senior college or beginning graduate-level students, it assumes only elementary calculus and basic probability theory for the first part, and ordinary differential equations and continuous probability for the second section. All problems require students to study and create models, encouraging their active participation rather than a mechanical approach. Beyond the classroom, this volume will prove interesting and rewarding to anyone concerned with the development of mathematical models or the application of modeling to problem solving in a wide array of applications.

**A Primer on Managing Sovereign Debt-Portfolio Risks** Thordur Jonasson, Mr. Michael G. Papaioannou, 2018-04-06

This paper provides an overview of sovereign debt portfolio risks and discusses various liability management operations (LMOs) and instruments used by public debt managers to mitigate these risks. Debt management strategies analyzed in the context of helping reach debt portfolio targets and attain desired portfolio structures. Also, the paper outlines how LMOs could be integrated into a debt management strategy and serve as policy tools to reduce potential debt portfolio vulnerabilities. Further, the paper presents operational issues faced by debt managers, including the need to develop a risk management framework, interactions of debt management with fiscal policy, monetary policy, and financial stability, as well as efficient government bond markets.

The SAGE Handbook of Research in International Education Mary Hayden, Jack Levy, Jeff Thompson, 2015-10-13 The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as 'international', 'global' and 'multicultural' are being re-evaluated. Fully updated and revised, and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia, and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and explores key contemporary developments, including: internationalism in the context of teaching and learning leadership, standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education, including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.

*American Pastoral* Philip Roth, 2011 An ordinary man finds that his life has been made extraordinary by the catastrophic intrusion of history, when, in 1968, his adored daughter plants a bomb that kills a stranger, hurling her father out of the longed-for American pastoral and into the ingenious American berserk. Never before has Roth written with clear conviction.-- Time.

**Urban China** World Bank, 2014-07-29 In the last 30 years, China's record economic growth lifted half a billion people out of poverty, with rapid urbanization providing abundant labor, cheap land, and good infrastructure. While China has avoided some of the common ills of urbanization, strains are showing as inefficient land development leads to urban sprawl and ghost towns, pollution threatens people's health, and farmland and water resources are becoming scarce. With China's urban population projected to rise to about one billion - or close to 70 percent of the country's population - by 2030, China's

leaders are seeking a more coordinated urbanization process. Urban China is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization. The report takes as its point of departure the conviction that China's urbanization can become more efficient, inclusive, and sustainable. However, it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas. The report proposes six main areas for reform: first, amending land management institutions to foster more efficient land use, denser cities, modernized agriculture, and more equitable wealth distribution; second, adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services; third, placing urban finances on a more sustainable footing while fostering financial discipline among local governments; fourth, improving urban planning to enhance connectivity and encourage scale and agglomeration economies; fifth, reducing environmental pressures through more efficient resource management; and sixth, improving governance at the local level.

Professionalism in the Information and Communication Technology Industry John Weckert, Richard Lucas, 2013-10-15 Professionalism is arguably more important in some occupations than in others. It is vital in some because of the life and death decisions that must be made, for example in medicine. In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation. The core idea behind this book is that Information and Communication Technology (ICT) is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind.

*EqualBITE*, 2017-11-01 “The ivory tower, like other stately homes in the UK, might present a grand façade to the world but closer inspection reveals a dark, spidery basement full of inequalities.” Gender imbalances still exist across all areas of higher education. From salaries and promotion, to representation in the curriculum, formal approaches and good intentions rarely address the full complexity. *EqualBITE* digs into the messy reality of higher education gender issues, presenting people’s stories, experiences and frustrations and – more importantly – what can be done. University of Edinburgh students and staff share real-life experiences of gender challenges and opportunities, and their constructive responses. The book condenses current academic research into practical actions that do make a difference. *EqualBITE* is a pragmatic and positive response to gender issues in academia – a catalyst for creating a culture which is better for everyone. “We were so pleased to see this new guide to one aspect of diversity—gender equality—and to see how good it is: the book is comprehensive; it is raw, honest and personal; and it is very well written. It is a book both for reading cover-to-cover and for dipping into, and it will be enormously influential.” – Jim Smith Director of Science, Wellcome Trust & Gemma Tracey Diversity & Inclusion Programme Manager – Science & Research, Wellcome Trust “The balance between data and lived experience equip the reader with the vital understanding of the depth of institutionalised inequality...This is recommended reading for anyone working in higher education who truly wants to create a fairer culture of women.” – Talat Yaqoob Director, Equate Scotland “I really enjoyed reading the recipes – they combine humour with practical advice on how to tackle important gender issues.” – Fiona Watt Vice-Dean Research and Impact, Faculty of Life Science and Medicine, King's College London

**Fateful Choices** Ian Kershaw, 2013-04-04 In 1940 the world was on a knife-edge. The hurricane of events that marked the opening of the Second World War meant that anything could happen. For the aggressors there was no limit to their ambitions; for their victims a new Dark Age beckoned. Over the next few months their fates would be determined. In *Fateful Choices* Ian Kershaw re-creates the ten critical decisions taken between May 1940, when Britain chose not to surrender, and December 1941, when Hitler decided to destroy Europe's Jews, showing how these choices would recast the entire course of history.
