If you buy only one book on Office 2007, Special Edition Using Microsoft® Office 2007 is the only book you need. If you own a copy of Office 2007, you deserve a copy

of this book! Although this book is aimed at the Office veteran, Ed and Woody's engaging style will appeal to beginners, too. Written in clear, plain English, readers will feel as though they are learning from real humans and not Microsoft clones. Sprinkled with a wry sense of humor and an amazing depth of field, this book most certainly isn't your run-of-the-mill computer book. You should expect plenty of hands-on guidance and deep but accessible reference material. This isn't your Dad's Office! For the first time in a decade, Microsoft has rolled out an all-new user interface. Menus? Gone. Toolbars? Gone. For the core programs in the Office family, you now interact with the program using the Ribbon—an oversize strip of icons and commands, organized into multiple tabs, that takes over the top of each program's interface. If your muscles have memorized Office menus, you'll have to unlearn a lot of old habits for this version.

Advanced Microsoft Office PowerPoint 2007 Wayne Kao,Jeff Huang,2007-12-27 This is the only book that will help an intermediate PowerPoint user improve their skills to an advanced level. In doing so, they can benefit both professionally and personally. This is not a comprehensive book that will bore you with every detail of PowerPoint, but a guide to specific actions you can take to create the ultimate presentation. The book covers the powerful formatting engine new to PowerPoint 2007, and how it can be used for applying soft shadows, reflection, and glows to make a presentation look attractive. It also covers PowerPoint's new 3D engine. The book goes into deep technical detail about the Office 2007 theme engine and how color schemes, effect schemes, and font schemes work; as well as the new PowerPoint XML file format, showing you how to edit PowerPoint files without using PowerPoint at all. The authors walk through programming a macro and explain how to format shapes, diagrams, charts, text, tables with gradient and picture fills and different kinds of lines (e.g. a beveled compound line with a diamond arrowhead). Also covered are those all important slide show shortcuts that few people know about like -- seeing your private notes while presenting on a projector, starting the slide show from the current slide without fumbling through the user interface, and how to black out the slide show screen with one key press.
