One World Mania Graham Dunkley, 2016-10-15 In this much-needed book, Graham Dunkley challenges the oft-repeated notion that free trade and global integration are the best means of development for all nations at all times – an idea that has proved even more misguided in the wake of the global financial crisis. By contrast, Dunkley reveals – through a wide range of statistical analysis and case studies – that at best the evidence is mixed. Looking systematically at issues such as trade-led growth, supply chains and financialization, *One World Mania* reveals the many problems that over-globalization has caused, often at great human cost. An indispensable guide for anyone wishing to understand the shortcomings of current global economic policies.

Disability, Criminal Justice and Law Linda Steele, 2020-04-29 Through theoretical and empirical examination of legal frameworks for court diversion, this book interrogates law's complicity in the debilitation of disabled people. In a post-deinstitutionalisation era, diverting disabled people from criminal justice systems and into mental health and disability services is considered therapeutic, humane and socially just. Yet, by drawing on Foucauldian theory of biopolitics, critical legal and political theory and critical disability theory, Steele argues that court diversion continues disability oppression. It can facilitate criminalisation, control and punishment of disabled people who are not sentenced and might not even be convicted of any criminal offences. On a broader level, court diversion contributes to the longstanding phenomenon of disability-specific coercive intervention, legitimates prison incarceration and shores up the boundaries of foundational legal concepts at the core of jurisdiction, legal personhood and sovereignty. Steele shows that the United Nations Convention on the Rights of Persons with Disabilities cannot respond to the complexities of court diversion, suggesting the CRPD is of limited use in contesting carceral control and legal and settler colonial violence. The book not only offers new ways to understand relationships between disability, criminal justice and law; it also proposes theoretical and practical strategies that contribute to the development of a wider re-imagining of a more progressive and just socio-legal order. The book will be

of interest to scholars and students of disability law, criminal law, medical law, socio-legal studies, disability studies, social work and criminology. It will also be of interest to disability, prisoner and social justice activists.

RISK MANAGEMENT AND DERIVATIVES Dr. Abhijit Gajghate I Dr. Mukul A. Burghate , The entire scope of financial decision making centres on the trade-off between risk and return. Decision making of any kind involves both positive and negative aspects. The objective of an investment decision is to get required rate of return with minimum risk. To achieve this objective, various instruments, practices and strategies have been devised and developed in the recent past. With the opening of boundaries for international trade and business, the world trade gained momentum in the last decade, the world has entered into a new phase of global integration and liberalisation. To overcome the risk arising out of these fluctuating variables and increased dependence of capital markets of one set of countries to the others, risk management practices have also been reshaped by inventing such instruments as can mitigate the risk element. These new popular instruments are known as financial derivatives which, not only reduce financial risk but also open us new opportunity for high risk takers. It is in this context, a Study Material on introduction to the subject 'RISK MANAGEMENT AND DERIVATIVES' is presented to the students of Professional Post-Graduate MBA degree. The book contains the syllabus from basics of the subjects going into the intricacies of the subjects. All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers. An attempt is made here by the author to assist the students by way of providing Study Material as per the curriculum with non-commercial considerations. The Shifts and the Shocks Martin Wolf,2014-09-11 From the chief economic commentator for the Financial Times—a brilliant tour d’horizon of the new global economy There have been many books that have sought to explain the causes and courses of the financial and economic crisis that began in 2007. The Shifts and the Shocks is not another detailed history of the crisis but is the most persuasive and complete account yet published of what the crisis should teach us about modern economies and economics. Written with all the intellectual command and trenchant judgment that have made Martin Wolf one of the world’s most influential economic commentators, The Shifts and the Shocks matches impressive analysis with no-holds-barred criticism and persuasive prescription for a more stable future. It is a book no one with an interest in global affairs will want to neglect.

Slouching Towards Utopia J. Bradford DeLong,2022-09-06 An instant New York Times and Wall Street Journal bestseller from one of the world’s leading economists, offering a grand narrative of the century that made us richer than ever, but left us unsatisfied “A magisterial history.”—Paul Krugman Named a Best Book of 2022 by Financial Times * Economist * Fast Company Before 1870, humanity lived in dire poverty, with a slow crawl of invention offset by a growing population. Then came a great shift: invention sprinted forward, doubling our technological capabilities each generation and utterly transforming the economy again and again. Our ancestors would have presumed we would have used such powers to build utopia. But it was not so. When 1870–2010 ended, the world instead saw global warming; economic depression, uncertainty, and inequality; and broad rejection of the status quo. Economist Brad DeLong’s *Slouching Towards Utopia* tells the story of how this unprecedented explosion of material wealth occurred, how it transformed the globe, and why it failed to deliver us to utopia. Of remarkable breadth and ambition, it reveals the last century to have been less a march of progress than a slouch in the right direction.

Debates in Monetary Macroeconomics Steven Pressman, John Smithin, 2022-11-30 This edited volume presents the key unresolved debates in monetary macroeconomics, covering the five topics of budget, trade, taxes, exchange rates and monetary policy. For each topic, there are two authors — one arguing for a certain policy and one against. The book takes an approach eschewing mathematics or econometrics, instead presenting arguments in the spirit of political economy - while incorporating the most recent thinking in macroeconomics. This approach, combined with the objective of encouraging debate, makes the book ideal reading for students of monetary macroeconomics, researchers seeking alternative views, and the general public.

The Coal Question; an Inquiry Concerning the Progress of the Nation, and the Probable Exhaustion of Our Coal-Mines William Stanley Jevons, 1865

The Penal Crisis and the Clapham Omnibus David J. Cornwell, 2009 Designed for a wide readership, this book looks at the problems that have led to the penal crisis in the UK. It argues that informed media and public opinion - including much chatter on the Clapham omnibus - has finally 'turned the corner' and that the time is ripe for a concerted pragmatic U-turn in criminal justice policy-making based increasingly on well understood restorative justice principles. *The Penal Crisis and the Clapham Omnibus* poses questions and tries to give straightforward answers to matters that commonly arise in discussions about restorative justice and argues that the idea of resistance from the public to more enlightened approaches to 'doing justice' is misplaced.

Global Youth Development Index and Report 2016 Commonwealth Secretariat, 2016-10-21 There are more young people in the world today than ever before. Yet surprisingly little is known about the current state of affairs in youth development. Measuring the well-being of young people continues to be a challenge, even though its importance is widely recognised. The Commonwealth's youth flagship report, the Global Youth Development Index and Report, provides an evidence-based overview of the state of development for the nearly 1.8 billion young people between the ages of 15 and 30 in the world. The Youth Development Index (YDI) is a composite index of 18 indicators that collectively measure progress on youth development in 183 countries, including 49 of the 53 Commonwealth countries. The YDI has five domains, measuring levels of education, health and well-being, employment and opportunity, political participation and civic participation among young people.

Foundations of Marketing Thought D.G. Brian Jones, Mark Tadajewski, 2017-12-12 The study and teaching of marketing as a university subject is generally understood to have originated in America during the early 20th century emerging as an applied branch of economics. This book tells a different story describing the influence of the German

Historical School on institutional economists and economic historians who pioneered the study of marketing in America and Britain during the late 19th and early 20th centuries. Drawing from archival materials at the University of Wisconsin, Harvard Business School, and the University of Birmingham, this book documents the early intellectual genealogy of marketing science and traces the ideas that early American and British economists borrowed from German scholars to study and teach marketing. Early marketing scholars both in America and Britain openly credited the German School, and its ideology based on social welfare and distributive justice was a strong motivation for many institutional economists who studied marketing in America, predating the modern macro-marketing school by many decades. Challenging many traditional beliefs, this book provides an authoritative new narrative of the origins of marketing thought. It will be of great interest to educators, scholars and advanced students with an interest in marketing theory and history, and in the history of economic thought.
