American Multinationals and Japan Mark Mason, 2020-03-23 This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why so little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy.

American Light Trucks and Utility Vehicles, 1967-1989 J. "Kelly" Flory, Jr., 2019-12-23 The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

The Films of Paul Morrissey Maurice Yacowar, 1993-05-28 The Films of Paul Morrissey is the first appraisal of one of the major figures of American independent cinema. An innovator in the narrative cinema that emerged from Andy Warhol's Factory, Morrissey, as established in this study, was also the force who shaped the most important films that have heretofore been attributed to Warhol. The director's experiments in the use of non-professional actors, controversial subject matter, and language are demonstrated through analysis of his most accomplished achievements, including *Mixed Blood*, *40 Deuce*, and *Spike of Bensonhurst*. The Films of Paul Morrissey furthermore reveals the director's challenge to the moral, social and political values of contemporary liberalism.
