Hoosiers and the American Story Madison, James H., Sandweiss, Lee Ann, 2014-10 A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Songs We Learn from Trees Chris Beckett,Alemu Tebeje,2020-05-28 Finalist for the 2021 Glenna Luschei Prize for African Poetry This is the very first anthology of Ethiopian poetry in English, packed with all the energy, wit and heartache of a beautiful country and language. From folk and religious poems, warrior boasts, praises of women and kings and modern plumbing; through a flowering of literary poets in the twentieth century; right up to thirty of the most exciting contemporary Amharic poets working both inside and outside the country. These poems ask what it means to be Ethiopian today, part of a young fast-growing economy, heirs to the one African state which was never colonised, but beset by deep political, ethnic and moral problems.

The Digital Condition Felix Stalder,2018-03-16 Our daily lives, our culture and our politics are now shaped by the digital condition as large numbers of people involve themselves in contentious negotiations of meaning in ever more dimensions of life, from the trivial to the profound. They are making use of the capacities of complex communication infrastructures, currently dominated by social mass media such as Twitter and Facebook, on which they have come to depend. Amidst a confusing plurality, Felix Stalder argues that are three key constituents of this condition: the use of existing cultural materials for one's own production, the way in which new meaning is established as a collective endeavour, and the underlying role of algorithms and automated decision-making processes that reduce and give shape to massive volumes of data. These three characteristics define what Stalder calls 'the digital condition'. Stalder also examines the profound political implications of this new culture. We stand at a crossroads between post-democracy and the commons, a concentration of power among the few or a genuine widening of participation, with the digital condition offering the potential for starkly different outcomes. This ambitious and wide-ranging theory of our contemporary digital condition will be of great interest to students and scholars in media and communications, cultural studies, and social, political and cultural theory, as well as to a wider readership interested in the ways in which culture and politics are changing today.

The Apple Grower Michael Phillips,2005 For decades fruit growers have sprayed their trees with toxic chemicals in an

attempt to control a range of insect and fungal pests. Yet it is possible to grow apples responsibly, by applying the intuitive knowledge of our great-grandparents with the fruits of modern scientific research and innovation. Since *The Apple Grower* first appeared in 1998, orchardist Michael Phillips has continued his research with apples, which have been called organic's final frontier. In this new edition of his widely acclaimed work, Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs. Some of the cutting-edge topics he explores include: The use of kaolin clay as an effective strategy against curculio and borers, as well as its limitations Creating a diverse, healthy orchard ecosystem through understory management of plants, nutrients, and beneficial microorganisms How to make a small apple business viable by focusing on heritage and regional varieties, value-added products, and the community orchard model The author's personal voice and clear-eyed advice have already made *The Apple Grower* a classic among small-scale growers and home orchardists. In fact, anyone serious about succeeding with apples needs to have this updated edition on their bookshelf.

Agenda 2021-2030 Exposed Rebel Press Media, 2021-05-14 Rebel Press Media delves deep into the untold truth about how the mainstream media has sold out and continues to lie about what's really going on... Connecting the dots between the current state of the world and the truth about the next world wars, population control, vaccine chips, and passports. Rebel Media Press explains how The Great Reset will unfold and how our governments, globalists, China, and Russia will dictate future politics in the West. What impact will Build Back Better have on you? What will happen in the next world war? What role will the coronavirus play in advancing the New World Order? What does it all mean, and how can you prepare for the next chapter of our history?

Stasi Wolf David Young, 2017-02-09 How do you solve a murder when you can't ask any questions? The gripping new thriller from the bestselling, award-winning author of *Stasi Child*. East Germany, 1975. Karin Müller, sidelined from the murder squad in Berlin, jumps at the chance to be sent south to Halle-Neustadt, where a pair of infant twins have gone missing. But Müller soon finds her problems have followed her. Halle-Neustadt is a new town - the pride of the communist state - and she and her team are forbidden by the Stasi from publicising the disappearances, lest they tarnish the town's flawless image. Meanwhile, in the eerily nameless streets and tower blocks, a child snatcher lurks, and the clock is ticking to rescue the twins alive . . . 'This fast-paced thriller hooks the readers from the start' *The Sun* 'A masterful evocation of the claustrophobic atmosphere of communist era East Germany . . . an intricate, absorbing page-turner' *Daily Express* 'The perfect blend of action, suspense and excitement. This is top notch crime! I will be shouting about this book to everyone, everywhere. Northern Crime 'One of the most fascinating and original detectives in contemporary crime fiction . . . a hugely accomplished novel' (*For Winter Nights*) 'For me David Young has cemented his place on the bookshelf alongside my Cold War thrillers by John le Carré and Len Deighton' *The Quiet Knitter*

Stealth Assessment Valerie Jean Shute, Matthew Ventura, 2013 An approach to performance-based assessments that

embeds assessments in digital games in order to measure how students are progressing toward targeted goals. To succeed in today's interconnected and complex world, workers need to be able to think systemically, creatively, and critically. Equipping K-16 students with these twenty-first-century competencies requires new thinking not only about what should be taught in school but also about how to develop valid assessments to measure and support these competencies. In *Stealth Assessment*, Valerie Shute and Matthew Ventura investigate an approach that embeds performance-based assessments in digital games. They argue that using well-designed games as vehicles to assess and support learning will help combat students' growing disengagement from school, provide dynamic and ongoing measures of learning processes and outcomes, and offer students opportunities to apply such complex competencies as creativity, problem solving, persistence, and collaboration. Embedding assessments within games provides a way to monitor players' progress toward targeted competencies and to use that information to support learning. Shute and Ventura discuss problems with such traditional assessment methods as multiple-choice questions, review evidence relating to digital games and learning, and illustrate the stealth-assessment approach with a set of assessments they are developing and embedding in the digital game *Newton's Playground*. These stealth assessments are intended to measure levels of creativity, persistence, and conceptual understanding of Newtonian physics during game play. Finally, they consider future research directions related to stealth assessment in education.

The Germans and Their Art Hans Belting, Professor for Art History and Media Theory Hans Belting, 1998-01-01 This study focuses on the attitudes Germans have towards their art from the Romantic period to the present, and discusses the ways they have tried to find their identity as a nation through this art. Belting proposes that German art criticism is divided by opposing ideologies and contradictions.

The Mind of War Grant Hammond, 2012-01-11 The ideas of US Air Force Colonel John Boyd have transformed American military policy and practice. A first-rate fighter pilot and a self-taught scholar, he wrote the first manual on jet aerial combat; spearheaded the design of both of the Air Force's premier fighters, the F-15 and the F-16; and shaped the tactics that saved lives during the Vietnam War and the strategies that won the Gulf War. Many of America's best-known military and political leaders consulted Boyd on matters of technology, strategy, and theory. In *The Mind of War*, Grant T. Hammond offers the first complete portrait of John Boyd, his groundbreaking ideas, and his enduring legacy. Based on extensive interviews with Boyd and those who knew him as well as on a close analysis of Boyd's briefings, this intellectual biography brings the work of an extraordinary thinker to a broader public.

International Handbook of Information Technology in Primary and Secondary Education Joke Voogt, Gerald Knezek, 2008-08-26 The major focus of this Handbook is the design and potential of IT-based student learning environments. Offering the latest research in IT and the learning process, distance learning, and emerging technologies for education, these

chapters address the critical issue of the potential for IT to improve K-12 education. A second important theme deals with the implementation of IT in educational practice. In these chapters, barriers and opportunities for IT implementation are studied from several perspectives. This Handbook provides an integrated and detailed overview of this complex field, making it an essential reference.

Becoming Myself Stasi Eldredge,2013-08-01 God has dreams—just for you *Becoming Myself* is a hope-filled book for anyone who wonders if her life will ever change—if she will ever change.In Stasi Eldredge’s most intimate book yet, she shares her own struggles with self-worth, weight, and her past as she shows readers how God is faithfully unveiling who we truly are. Stasi urges you to lay down your past thoughts about yourself and receive God’s incredible dreams for you instead. We cannot heal ourselves. We cannot become ourselves by ourselves. But we are not by ourselves. The King of love wants to help us become. God desires to restore us—the real us. As he heals our inner life, he calls us to rise to the occasion of our lives. The most important journey any woman can take is the journey into becoming her true self through the love of God. It's a beautiful paradox. The more of God’s you become, the more yourself you become—the “self” he had in mind when he thought of you before the creation of the world. Discover your truest self—the woman God created you to be—in *Becoming Myself*.

An Anthropology of Images Hans Belting,2022-07-12 A compelling theory that places the origin of human picture making in the body In this groundbreaking book, renowned art historian Hans Belting proposes a new anthropological theory for interpreting human picture making. Rather than focus exclusively on pictures as they are embodied in various media such as painting, sculpture, or photography, he links pictures to our mental images and therefore our bodies. The body is understood as a living medium that produces, perceives, or remembers images that are different from the images we encounter through handmade or technical pictures. Refusing to reduce images to their material embodiment yet acknowledging the importance of the historical media in which images are manifested, *An Anthropology of Images* presents a challenging and provocative new account of what pictures are and how they function. The book demonstrates these ideas with a series of compelling case studies, ranging from Dante's picture theory to post-photography. One chapter explores the tension between image and medium in two media of the body, the coat of arms and the portrait painting. Another, central chapter looks at the relationship between image and death, tracing picture production, including the first use of the mask, to early funerary rituals in which pictures served to represent the missing bodies of the dead. Pictures were tools to re-embodiment the deceased, to make them present again, a fact that offers a surprising clue to the riddle of presence and absence in most pictures and that reveals a genealogy of pictures obscured by Platonic picture theory.

Why We Evaluate Gregory R. Maio,James M. Olson,1999-11-01 As the first book to examine the psychological motivations underlying people's attitudes, as well as why people form attitudes, this volume presents empirical research describing

theoretical perspectives and practical applications. The editors assembled the leaders in the field to examine the topics of attitude function persuasion, individual-differences approaches, and the role of motivation within a variety of psychological disciplines, including social, personality, consumer, and environmental.

A Discourse on Winning and Losing John Boyd, 2017 Boyd's initial focus was a 193 slide summation of military history in the Patterns of Conflict brief and his effort soon expanded dramatically. His insights led him to introduce the theory of maneuver warfare as critical to military success in general, as it had been for successful air-to-air tactics where his intellectual journey began. His study and thought led him to produce a series of other briefings. They included a 37 slide briefing entitled An Organic Design for Command and Control, a 58-slide briefing entitled The Strategic Game of ? and ?, a 27-slide briefing entitled The Conceptual Spiral, and one of the few essays he ever wrote called Destruction and Creation. The larger Discourse ends with his summation entitled Revelation. To this is added a four slide brief on The Essence of Winning and Losing produced on 28 June 1995. It is an effort to compress all that he had learned into a simple, yet elegant and comprehensive, conclusion embedded in his concept of O-O-D-A Loops, what they mean and why they are important.-- Provided by publisher.
